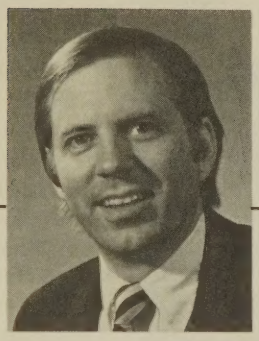
A Message to Alumni

. . . From the Association President

R. Joseph Olk, M.D. '75



Annual Appeal results are in for fiscal '85. Overall giving from grateful patients, their families, the medical staff, alumni and other friends of the institution reached a record $1.5 million, up almost $500,000 from last year. The hard work of the Trustees and other volunteers, including our own Class Agents and Executive Council members, has obviously paid off.

Bringing both our donor and dollar totals from our alumni constituency up to more acceptable levels will be a critical goal during the months ahead and I hope each of you will respond appropriately when asked to participate in supporting our alma mater in the many programs which are reported through the *Record*.

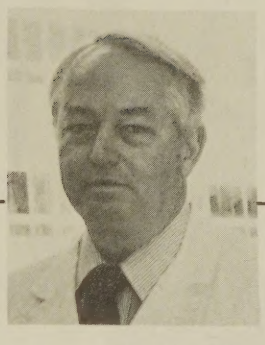
The need for more personalized involvement on the part of our volunteers to increase participation levels as well as gift size from Rush graduates was discussed at length at the Class Agent Workshop last September and emphasized again at the fall meeting of the Executive Council. I want to extend special thanks to all those who assisted in signing letters, making phone calls, etc., to make the case for support of Rush Medical College. Some inroads have been made on the latter issue, with the average gift to the Annual Appeal increasing from $266 to $408 this year. Our participation rate of seven percent is somewhat low, however, and we *must* strive to bring that figure up to a more respectable 20 percent by the end of this fiscal year on June 30. Let's work on it! It has been gratifying for me, and others who have served on the Council of the Alumni Association much longer than I, to witness the growing philanthropic response from younger Rush grads who are joining the Benjamin Rush Society. Two years ago, not one on the roster had graduated after 1973; as of January 31, there are 16 of us who have joined and I am proud to say that seven are members of my class, 1975. I challenge all of you to beat our record!

I call your attention to reports (starting on page 8) of the various alumni activities which took place on Friday, September 21, 1984, at the Medical Center. It was a whirlwind day, beginning with the Class Agent Workshop, which was followed by the Executive Council's fall session, the first annual luncheon meeting of the Benjamin Rush Society and, to cap it all off, the third annual alumni-sponsored TGIF for Rush University students. We were honored to have several "elder statesmen" in

(see 'President' on page 19)

. . . From the Rush Medical College Dean

Henry P. Russe, M.D.



The past six months have been busy ones for me, the Medical College, and Rush-Presbyterian-St. Luke's Medical Center.

I had the pleasure of meeting Rush alumni at dinners sponsored by the Alumni Association in San Francisco and Honolulu, held in conjunction with conferences of the American College of Surgeons and the AMA. Dr. Henikoff and I were charmed by your warm reception. A note of special thanks to **Byron G. Young, M.D. '73,** who hosted the gathering in Hawaii at the Waialae Country Club.

In November, I reported to members of the medical staff and Rush Medical College faculty at the semi-annual faculty and medical staff meeting in my dual capacity as dean and vice president for medical affairs.

The traditional "white coat" ceremony was held in September to welcome officially 120 entering students as they embarked on the adventure of becoming Rush physicians. Fifty-four of those students had applied for the eight places in the alternative curriculum program. I attended a reception in December for those special few and was gratified by their enthusiastic response to this exciting new program.

The fall of 1984 passed in a flurry of activity as we prepared a detailed self-study document for submission to the Liaison Committee on Medical Education in preparation for its November visit. Since then the committee has granted Rush Medical College a six-year accreditation, the maximum approval allowed for a university of our youth. On July 1, we welcomed 153 new members to the house staff, which now totals 446.

Over the past several months, the Medical Center has acquired occupational health centers in four locations, serving some 2,000 firms in the Chicago area, and we are exploring similar opportunities in other parts of the city. We have also initiated the establishment of a corporate health center at One Financial Place, a new award-winning office complex in the south Loop area which houses the Chicago Board Options and Midwest Stock Exchanges, in order to develop additional referrals to private practitioners at the Medical Center.

We are proud of our new Bone Marrow Transplant Center opened last spring. The six-bed unit is usually at full capacity and we anticipate its expansion in the near future. We sponsored a very successful national symposi-

(see 'Dean' on page 23)

Faculty for the symposium marking the thirtieth anniversary of the Section of Medical Oncology included: (back row) Emil M. Frei III, M.D., B.J. Kennedy, M.D., D. Paul Carbone, M.D., James Holland, M.D., Evan Hersh, M.D., Thomas C. Hall, M.D., and (front row) Jules E. Harris, M.D., the Samuel G. Taylor III, M.D., Professor of Oncology and director, Section of Medical Oncology, with Samuel G. Taylor III, M.D., and Lewis Thomas, M.D.

Three Decades of Progress in Cancer Care

Until 1972, it was not even recognized as an official subspecialty, "...but medical oncology is now the fourth largest board-certified subspecialty in the country," Thomas C. Hall, M.D., told an audience of 275 physicians and nurses on October 11 at the Medical Center.

The occasion was a Thirtieth Anniversary Symposium, sponsored by one of the oldest medical oncology groups in the country, the Section of Medical Oncology at Rush-Presbyterian-St. Luke's Medical Center. Dr. Hall is director of the Cancer Research Center of Hawaii.

"Three Decades of Progress in Cancer Care" was the theme. Dr. Hall was just one of a number of distinguished clinician/scientists from across the country who spent a day at the Medical Center charting the course cancer therapy has taken over the years and speculating where it may go in the future.

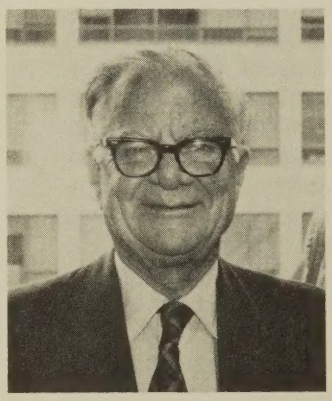
The Wadsworth Memorial Lecture speaker for the symposium was the eminent clinician/scientist/essayist, Lewis Thomas, M.D. Dr. Thomas spoke on his landmark theory of immunological surveillance. He was also guest speaker at a dinner the night before the symposium which celebrated both the thirtieth anniversary of the Section of Medical Oncology and the eighteenth birthday of its founder, **Samuel G. Taylor III, M.D. '32.**

The Rush alumnus, emeritus professor of medicine at his alma mater and a specialist in endocrinology, was one of the first clinicians in the country to recognize the importance of hormones in the treatment of cancer, especially breast cancer. His interest in innovative cancer therapies led to the establishment of the Section of Medical Oncology in 1954.

The symposium concluded with a look into the future, provided by James Holland, M.D., of the Mt. Sinai School of Medicine, New York. He made several predictions for the next 30 years including a major role for computers in cancer medicine: "We really won't make headway until *every* doctor's office is plugged into an interactive network of information on treatments and current clinical studies."

The Section of Medical Oncology at the Medical Center is one of the most active participants in cooperative clinical trials in the country.

1985 Distinguished Alumnus: Samuel G. Taylor III, M.D. '32



Dr. Taylor

Dr. Taylor will receive the 1985 Distinguished Alumnus Award at the Commencement Banquet during Alumni Weekend (see story on page 5).

Noted for his leadership in the field of medical oncology, Dr. Taylor has been instrumental in the organization and direction of the Illinois Cancer Council, the Comprehensive Cancer Center for the State of Illinois. He has served on a number of study committees and task forces of the National Institutes of Health and has been active in the American Cancer Society for more than 25 years.

The author of more than 100 scientific articles, Dr. Taylor has been singled out for special recognition by the American Cancer Society and the American College of Surgeons. In 1978, the Samuel G. Taylor III, M.D., Chair of Oncology was established in his honor at Rush Medical College.

Come One, Come All to Alumni Weekend '85

Your colleagues have been hard at work preparing for another reunion weekend which promises to surpass even last year's record success.

The Reunion Planning Committee, with representatives from the fifth, tenth and fiftieth-year anniversary classes, has been meeting since September under the continued leadership of **Steven Gitelis, M.D. '75,** chairman.

Members of the reunion classes have already received a preliminary schedule of the activities planned for June 6, 7 and 8, and now it's time to share the information with Rush alumni-at-large of all ages. We think you'll find there's something for everyone.

Launching the weekend on a serious note, members of the **Executive Council** will hold their semi-annual **meeting** on **Thursday afternoon, June 6.** Then the fun begins. . .

The Rush Medical College Committee on Student Affairs has again invited all Rush graduates to attend its third annual **faculty/student music recital** which will take place from 5 to 6:30 p.m. Thursday evening in the foyer of Room 500. A **cocktail/social hour** immediately afterwards will give you a chance to break the ice with colleagues you haven't seen in years. Members of the **Benjamin Rush Society,** who have demonstrated their support of Rush Medical College through leadership gifts (current annual subscription is $1,500) will be recognized at a special **dinner** that same evening.

Friday is **Alumni Day** and there are several social and educational programs on the docket, beginning with the traditional **Breakfast With the Dean** and **Annual Meeting,** hosted by Henry P. Russe, M.D. Tables will be reserved for members of the three reunion classes to allow them to catch up on old times. The James A. Campbell, M.D., Alumni Service Award will be presented to three very deserving candidates: **R. Gordon Brown, M.D. '39, James W. Merricks, M.D. '34,** and **Stanley E. Monroe, M.D. '36.**

After breakfast, alumni will have an opportunity to witness the high caliber of physician still being produced at Rush when members of the graduating class are spotlighted as discussants in the fourth annual **Alumni Clinicopathological Conference,** co-sponsored with the Department of Pathology. Come prepared to be intellectually stimulated and challenged by this very popular program. Next on the agenda is **Medical Grand Rounds** which will be presented by **William F. Graettinger, M.D.,** F.A.C.E., member of the **Class of '75,** assistant professor of medicine/cardiology at the University of New Mexico School of Medicine in Albuquerque. Bill is also son of our own John S. Graettinger, M.D., senior attending, internal medicine, and associate dean of graduate medical education. The topic will be: "Alcohol and the Heart: A Match Made in Heaven or Hell?"

June 6, 7 and 8
—It's Time To Come Back

After a quick soup-and-sandwich lunch, we will reconvene for a fascinating **mini-course** on the exciting new in vitro fertilization program under the direction of W. Paul Dmowski, M.D., Ph.D., senior attending in obstetrics and gynecology and director of the Section of Reproductive Endocrinology/Infertility. If no sensitive procedures are underway, guided tours of the laboratory facilities will be provided.

Other **tours** of today's Rush-Presbyterian-St. Luke's Medical Center will be offered at the end of the afternoon for those who are interested. Stops will include the Academic Facility, the Rush University Library and Rare Book Room, the new Atrium Building and more.

Friday evening festivities include a **cocktail reception, dinner** and **dancing** at the **Drake Hotel.** The Commencement Banquet, sponsored by the Alumni Association, honors members of the graduating Class of 1985 and members of the golden anniversary Class of 1935. Awards will be presented to faculty members selected by the seniors and the **1985 Distinguished Alumnus Award** will be given to a longtime friend of Rush, **Samuel G. Taylor III, M.D. '32.** The evening program will conclude with dancing to the Jack Kramer Orchestra.

For those early risers who are up to it, **Saturday** at the **Medical Center** provides several opportunities to attend departmental **Grand Rounds.** Members of the Class of 1935 and their guests will be welcomed by the **Trustees** at a special **luncheon** preceding commencement. They will also be invited to march in full academic regalia in the commencement procession, 50 years after the "real thing." All Rush alumni are invited to attend the 111th **Commencement** activities for Rush Medical College (and the 13th for Rush University) at **Medinah Temple** on Saturday at 2 p.m.

That concludes the 1985 program; more detailed information can be found in the calendar on the back cover of this issue and in the registration materials which will follow later in the spring. For now, though, we hope you are holding June 6, 7 and 8 for a visit back to campus. Out-of-towners should call the Drake (312/787-2200) to reserve rooms (at a reduced rate of $85 per night) which are being held for Rush alumni for Thursday and Friday, first-come, first-served.

We look forward to seeing you in June.

A Special Reunion Invitation To '74 and '76 Grads

In the early days of Rush's reactivation many of us who matriculated together actually received our medical degrees at different times, due to the three and four-year program option.

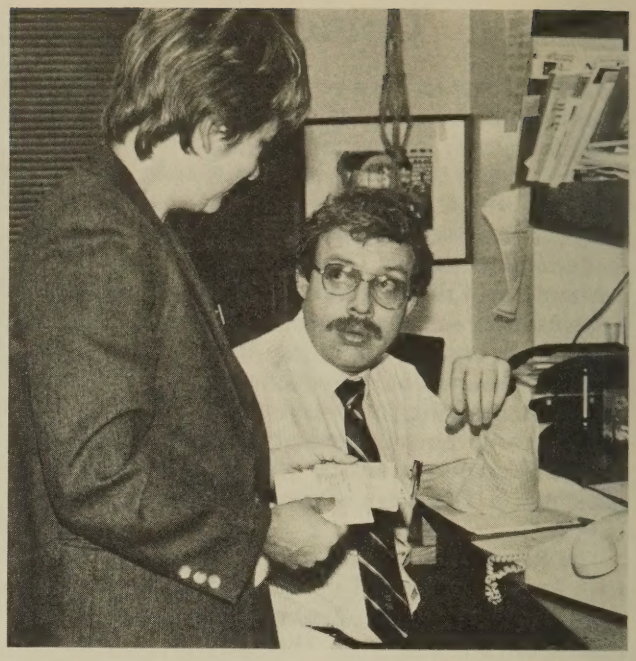
We, of the Class of '75, hereby issue a special invitation to members of the Classes of '74 and '76 to come back to help celebrate our tenth reunion, even though this is technically not your year. We would love to see you again and hope you can join us even if it's just for part of the three-day Alumni Weekend '85.

Steven Gitelis, M.D. '75
Chairman
Reunion Planning Committee

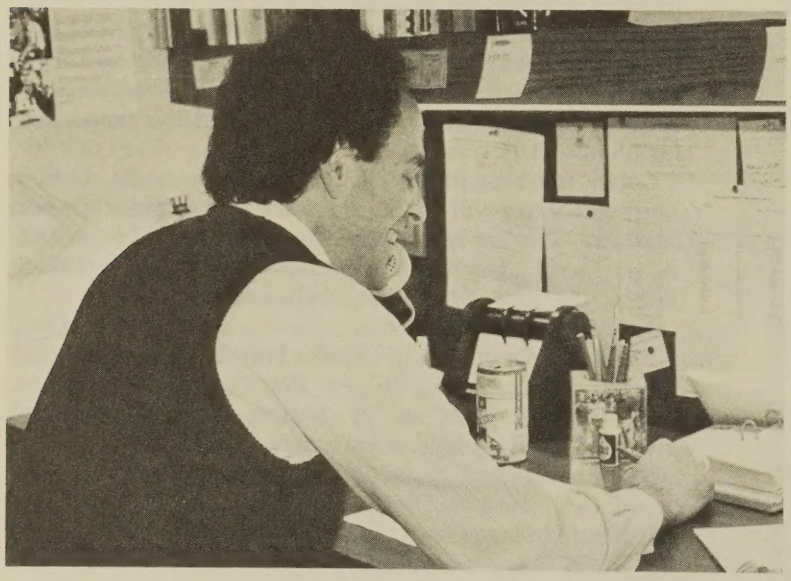
Calling Alumni

A phonathon crew got together February 20 to urge former classmates to attend Alumni Weekend '85, June 6, 7 and 8 in Chicago. A total of 102 calls were made, reaching 68 graduates. A good turnout is expected by '35, '75 and '80 grads since 83 members of those anniversary classes have already confirmed plans to attend. Join them!

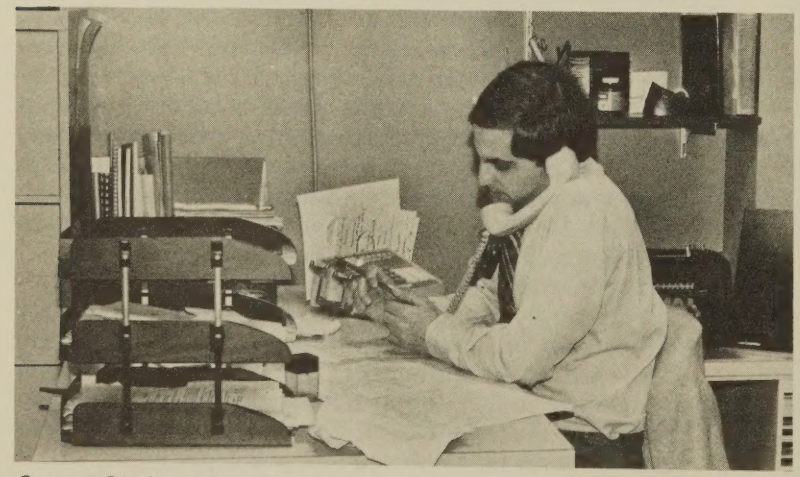
Demetra Soter, M.D. '80, chats with Rhonda E. Stein, M.D. '80, of Evanston, Illinois, who plans to come back for Reunion Weekend.



Tom Stibolt, M.D. '75, fills in Vicki Woodward, director of Alumni Relations, on the activities of William Carlson, M.D. '75. Dr. Carlson served as trek physician on a three-week backpacking excursion to the base of Mount Everest and then spent six weeks traveling in southwest Asia. He invites classmates to visit him in Martinez, California.



Harold A. Kessler, M.D. '74, reaches Doris McCulley, M.D. '74, medical director of Provident Hospital in Chicago, who hopes to attend.



Steven Gitelis, M.D. '75, shares Alumni Weekend plans with Martin Faber, M.D. '75, of Princeton, Illinois, now the father of six (ages 6 months to 12 years).

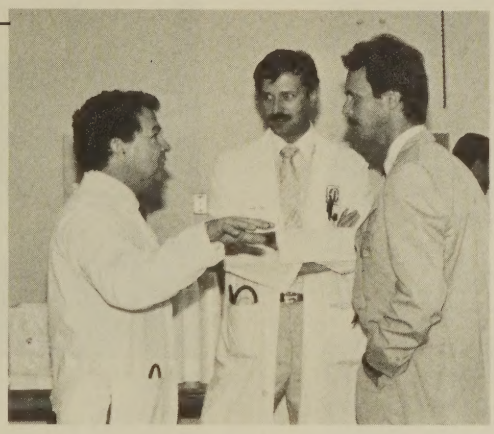
Gordon H. Derman, M.D. '76, and Henry Danko, M.D. '76, share honors as the top operators during the phonathon, earning Rush t-shirts for recording the most "yes, I'll try to make it to the Reunion" responses.

Alumni who contributed to the phonathon by calling from their homes included David B. Rubin, M.D. '75, Ellen Smith, M.D. '75, Jay L. Levin, M.D. '80, Daniel J. Sullivan, M.D. '80, and Herman D. Sloane, M.D. '80.

Leo's Back! Are You Coming Back?

Leo M. Henikoff, M.D., has returned to Rush-Presbyterian-St. Luke's as its new president, but many alumni are sure to remember him from his earlier days at the Medical Center when he served as assistant, associate and then acting dean of the medical college.

He'll be at Reunion Weekend, looking for familiar faces. In response to the phonathon, scores of alumni (listed below) have already indicated they hope to attend. How about you?



Leo M. Henikoff, M.D., with Henry Danko, M.D. '76 and Ronald W. Quenzer, M.D. '73.

Class of 1935

Leo R. Brown (Merrillville, IN)
Ralph B. Cloward (Honolulu, HI)
Leila A. Gorenflo Creech (Cass Lake, MN)
Bernadine De Valois (Holland, MI)
Henry S. Dickerman, Jr. (Springfield, IL)
Joseph C. Ehrlich (Phoenix, AZ)
Charles J. Frankel (Charlottesville, VA)
Elmer A. Friedman (Chicago, IL)
Durward Gorham Hall (Springfield, MO)
Harris Sidney Heersma (Kalamazoo, MI)
Kate H. Kohn (Chicago, IL)
Robert B. Lewy (Chicago, IL)
James J. O'Halloran (East Moline, IL)
John H. Olwin (Evanston, IL)
E. Henry Running (Phoenix, AZ)
Jack Segal (Beverly Hills, CA)
William E. Taylor (Springfield, MO)
Marshall P. Welles (Pasadena, CA)

Class of 1974

Tina M. Blair (Soughton, MA)
Craig Dean (Libertyville, IL)
Lawrence Johnson (Geneva, IL)
Harold A. Kessler (Northbrook, IL)
Doris McCulley (Flossmoor, IL)
Stephen Mueller (Colorado Springs, CO)
Ronald D. Nelson (South Bend, IN)
Jack C. Nichols (Redding, CA)
Michael R. Peck (Flossmoor, IL)
Michael Pinzur (Highland Park, IL)

Class of 1975

Steven Bickel (Los Angeles, CA)
Thomas Broderick (Orange, CA)
William Carlson (McKinleyville, CA)
Dino S. Delicata (Downers Grove, IL)
Robert N. Dunn (Chicago, IL)
Martin Faber (Princeton, IL)
Steven Gitelis (Downers Grove, IL)
Christopher G. Goetz (Oak Park, IL)

Steven E. Sicher (Peoria, IL)
Ellen C. Smith (Chicago, IL)
George Stanis (Appleton, WI)
Thomas B. Stibolt, Jr. (La Grange, IL)
Robert M. Tartell (Houston, TX)
Lisa C. Plymate Taylor (Tacoma, WA)
Deborah and Patrick Turski (Madison, WI)
Theodore Tyberg (New York, NY)
Paul A. Van Pernis (Ashland, WI)
Ruth Westheimer (Chicago, IL)
David A. Ziegler (Katy, TX)

Class of 1976

Patrick Bednar (Oak Park, IL)
Terrold Butler (Chicago, IL)
Melody Cobleigh (Chicago, IL)
Henry Danko (Morton Grove, IL)
Gordon Derman (Evanston, IL)
Barbara Fuller (Chicago, IL)
Joseph Hedrick (Chicago, IL)
Robert A. Jordan (Homewood, IL)
Michael J. Moran (Western Springs, IL)
Donald D. Nash (Hinsdale, IL)
Howard W. Needelman (Glen Ellyn, IL)
Gordon Schiff (Chicago, IL)
Martin G. Siglin (Northbrook, IL)
Dawn Marie Warren (Chicago, IL)
Evonne M. Winston (Wauwatosa, WI)

Class of 1980

Samuel Wesley Amstutz (Detroit, MI)
Grace Tena Chu and
David M. Appleby (Pittsburgh, PA)
Thomas E. Baier (Springfield, IL)
Mary C. Barton (Hershey, PA)
Richard C. Berglund (Chicago, IL)
Michael G. Blackburn (Puyallup, WA)
Stephen M. Borowitz (Nashville, TN)
Janne N. Breadon (Dorchester, MA)
Charlotte S. Brody (Chicago, IL)
John E. Buckley (Chicago, IL)
Bruce H. Campbell (Brookfield, WI)
Robert A. Chase (Winfield, IL)
Antonio Chaviano (Chicago, IL)
Frances G. Deppe (Chicago, IL)
Valarie Perks and
William F. Donaldson III (Edgewater, NJ)
Randy J. Epstein (Stone Mountain, GA)
Jeffrey E. Fireman (Waukegan, IL)
David J. Fletcher (Tacoma, WA)
Mary Rascia Forman (Rochester, NY)
Jack Fuhrer (Chicago, IL)
Robert G. Gillio (Rochester, MN)
Robert J. Glinert (Ann Arbor, MI)
Julie A. Goepel (La Grange Park, IL)
Catherine B. Grotelueschen (Westchester, IL)
Edward A. Hirsch (Sycamore, IL)
Carol Krohm (Harvard, IL)
Andrea C. Lang (Chicago, IL)
Jay L. Levin (Northbrook, IL)
Barbara B. Loeb (Elmhurst, IL)
Susan T. Lyon (Chicago, IL)
Steven A. Maier (Hermosa Beach, CA)
Philip J. Maple (Houston, TX)
Wayne S. Margolis (Houston, TX)
Marilyn Marx (Galveston, TX)
Marilyn L. Mitchell (Chicago, IL)
James E. Moyer (Hummerstown, PA)
Richard S. Murray (St. Peters, MO)
Madeleine F. Neems (Highland Park, IL)
Lois M. Nora (Chicago, IL)
Morris Papernik (Skokie, IL)
Russell M. Petrak (Westchester, IL)
Patricia M. Picchetti (Downers Grove, IL)
Marjorie M. Rosenbaum (Chicago, IL)
Hugh D. Russell (Chicago, IL)
John T. Schousboe (Clarendon Hills, IL)
Gregory W. Schroff (Loma Linda, CA)
John Segreti (Chicago, IL)
Herman D. Sloane (Flossmoor, IL)
Glen D. Solomon (O'Fallon, IL)
Demetra K. Soter (Chicago, IL)
Bruce D. Spiess (Wilmette, IL)
Aimee C. St. Pierre (Chicago, IL)
Rhonda E. Stein (Chicago, IL)
Angela G. Stewart (Greenville, NC)
Jonathan B. Stout (Redding, CA)
Daniel J. Sullivan (Chicago, IL)
Anthony V. Thomas (Chicago, IL)
Robert W. Trauscht (Bensenville, IL)
Jamie H. Von Roenn (Chicago, IL)
Elizabeth H. Waldron (Oak Park, IL)
Martha A. Wiedman (Forest Park, IL)
Michael R. Wolfson (St. Paul, MN)
Patricia P. Wyhinny (Chicago, IL)
Leslie T. Yamamoto (Lincolnwood, IL)
Charles E. Zacharias (Evanston, IL)
Craig D. Zippe (Providence, RI)

Alumni Association Meetings—September 21, 1984

September 21, 1984, was quite a day for the Alumni Association. Class Agents, members of the Benjamin Rush Society, and the Association's Executive Council gathered for a full day of workshops and meetings.

Events of the day included: the first annual meeting of the Benjamin Rush Society, the second Class Agent Workshop, the semi-annual meeting of the Executive Council and the annual alumni-sponsored "Thank God It's Friday" (TFIG), an informal social gathering for Rush University students.

Class Agent Workshop

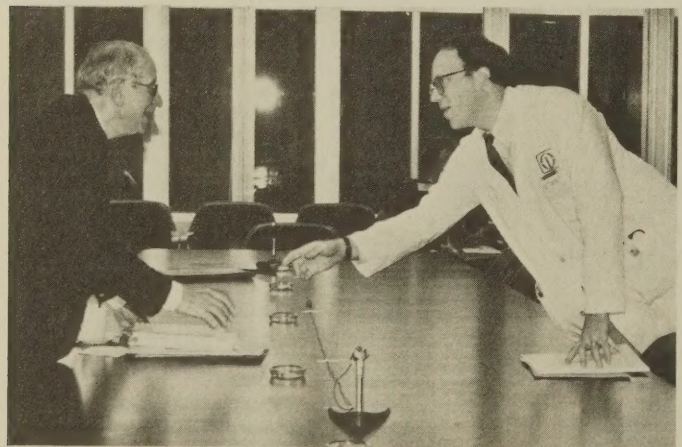
Ronald W. Quenzer, M.D. '73, chairman of the Class Agent Network, called the Class Agent Workshop to order at 10 a.m. The following alumni were in attendance:

Eloise Parsons Baker, M.D. '25, of Neponset, Illinois
Brad D. Berman, M.D. '82, of Wilmette, Illinois
Thomas A. Deutsch, M.D. '79, of Winnetka, Illinois
Frederic A. dePeyster, M.D. '40, of Winnetka, Illinois
George H. Handy, M.D. '42, of Madison, Wisconsin
Paul H. Harmon, M.D. '31, of Covina, California
Paul J. Jones, M.D. '83, of Chicago, Illinois
Isaac E. Michael, M.D. '42, of Indianapolis, Indiana
Stanley E. Monroe, M.D. '36, of Chula Vista, California
R. Joseph Olk, M.D. '75, of St. Louis, Missouri
Paul J. Patchen, M.D. '30, of Chicago, Illinois
Ronald W. Quenzer, M.D. '73, of Pratt, Kansas
Floyd F. Shewmake, M.D. '73, of Kenosha, Wisconsin
Marc A. Silver, M.D. '79, of La Grange, Illinois

Sheldon Garber, secretary for the Medical Center Board of Trustees and vice president of philanthropy and communication, warmly welcomed the Class Agents on behalf of the Trustees and management of the Medical Center. He stressed the need for Class Agent involvement and leadership, and encouraged their assistance in garnering general alumni philanthropic support.

Discussion then focused on the Class Agent job description which highlights three key priorities for Class Agents: communications, the alumni resource network and philanthropy.

Whit Shepard, senior account executive for philanthropy and communication, provided an overview of the alumni component of the Annual Appeal as it relates to the institution's overall fundraising effort. Shepard announced that the 1984 appeal effort calls for a personalized and tailored approach, including follow-up phone calls. He called upon the Class Agent Network to lend its support to this effort, adding that "people give to people."



Paul J. Patchen, M.D. '30, meets Marc A. Silver, M.D. '79.

Ronald W. Quenzer, M.D. '73, addresses the Class Agent Workshop.

Benjamin Rush Society Meeting

The workshop adjourned and participants reconvened in the Claude H. Searle, M.D., Conference Center for the first annual meeting of the Benjamin Rush Society, with chairman **Frederic A. dePeyster, M.D. '40,** presiding. Dr. dePeyster extended greetings to the attendees with a special acknowledgement to Mrs. R. Lincoln Kesler, widow of the late **R. Lincoln Kesler, M.D. '36,** one of the founders of the Society and its chairman until his death in 1982. Alumni attendees included:

Eloise Parsons Baker, M.D. '25
Brad D. Berman, M.D. '82
***R. Gordon Brown, M.D. '39**
***George B. Callahan, M.D. '26**
Ruth Campanella, M.D. '74
***Frederic A. dePeyster, M.D. '40**
****Elise Deutsch, M.D. '81**
****Thomas A. Deutsch, M.D. '79**
***R. Kennedy Gilchrist, M.D. '31**
****Steven Gitelis, M.D. '75**
Cheryl Gutmann, M.D. '78
George H. Handy, M.D. '42
***Paul H. Harmon, M.D. '31**
Paul J. Jones, M.D. '83
***Julius G. Levy, M.D. '22**
Isaac E. Michael, M.D. '42
***Stanley E. Monroe, M.D. '36**
***R. Joseph Olk, M.D. '75**
***Paul J. Patchen, M.D. '30**
***Rita O. Pucci, M.D. '74**
***Ronald W. Quenzer, M.D. '73**
Floyd F. Shewmake, M.D. '73
Thomas B. Stibolt, Jr., M.D. '75
Theodore Zekman, M.D. '34

*Members of the Benjamin Rush Society
**Joined Benjamin Rush Society after annual meeting

Dr. dePeyster expressed his delight and honor upon his appointment as chairman of the Society, succeeding

Stanton A. Friedberg, M.D. '34. Although Dr. Friedberg was unable to attend, he sent his warm regards.

Dr. dePeyster then gave an historical perspective on the Society, noting that of the alumni who attended the first organizational meeting on October 26, 1970, "three are in the room today **(R. Gordon Brown, M.D. '39, Frederic A. dePeyster, M.D. '40,** and **R. Kennedy Gilchrist, M.D. '31).**" He added that "we were all enthusiastic about the reactivation of Rush Medical College and realized that a support program had to be developed to promote its educational philosophy. . ."

Shortly after that first organizational meeting, there were 10 members, and, within four years, 73 alumni and friends were enrolled. Benjamin Rush Society membership continues to grow and now includes representation from post-1973 graduates. In 1983, the Executive Council of the Alumni Association, realizing that an alumni recognition group was needed, endorsed the Benjamin Rush Society as its premier giving body.

From the beginning, unrestricted gifts to the Society have been turned over to the Rush Medical College dean in support of his priorities. This past fiscal year, unrestricted gifts and gifts for the College's scholarship and loan funds totaled more than $97,000. Dr. dePeyster stressed the need for increased Benjamin Rush Society membership to continue to provide critical support to the College and its programs.

Dr. dePeyster then introduced Leo M. Henikoff, M.D., president of Rush-Presbyterian-St. Luke's Medical Center, who expressed his pleasure with the number of young alumni gathered. He commented, "I was just looking around the room and counted nine familiar faces that I first met years ago when I was interviewing applicants for our newly reactivated medical school. Rush has a growth and a development that is unparalleled."

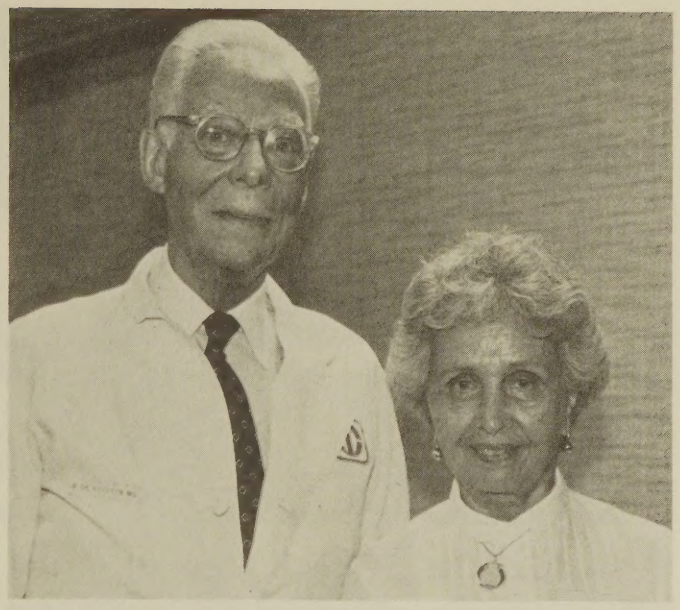
Dr. Henikoff noted that several of the participants in the critical 1969 decision to reopen Rush Medical College were also in attendance at this first Benjamin Rush Society luncheon some 15 years later.

Dr. Henikoff paid special tribute to the late Medical Center president, James A. Campbell, M.D., "because it was his leadership. . .and his wisdom that brought this institution to where it is today." (Rush University, created in 1972, now has four academic components: Rush Medical College, the College of Nursing, the College of Health Sciences and The Graduate College.)

Dr. Henikoff continued, "while the institution maintains its commitment to health education, we also, first and foremost, maintain our commitment to the best medical care. . .anywhere." He stressed the valued support of the Society in assisting the dean and faculty of Rush Medical College in meeting their responsibilities to the students. "The Benjamin Rush Society provides funds that are flexible" and sorely needed by the dean. Dr. Henikoff concluded by expressing his delight at being back at Rush, adding, "I'm looking forward to a long continuing relationship."

Henry P. Russe, M.D., dean, Rush Medical College, provided a brief overview of the College and outlined his priorities for alumni financial support through the Benjamin Rush Society.

"There are 500 students, largely from Illinois, enrolled in Rush Medical College; 32 percent are women. As for residency training, "we have placed students in virtually every program that they have sought acceptance," Dr. Russe said.



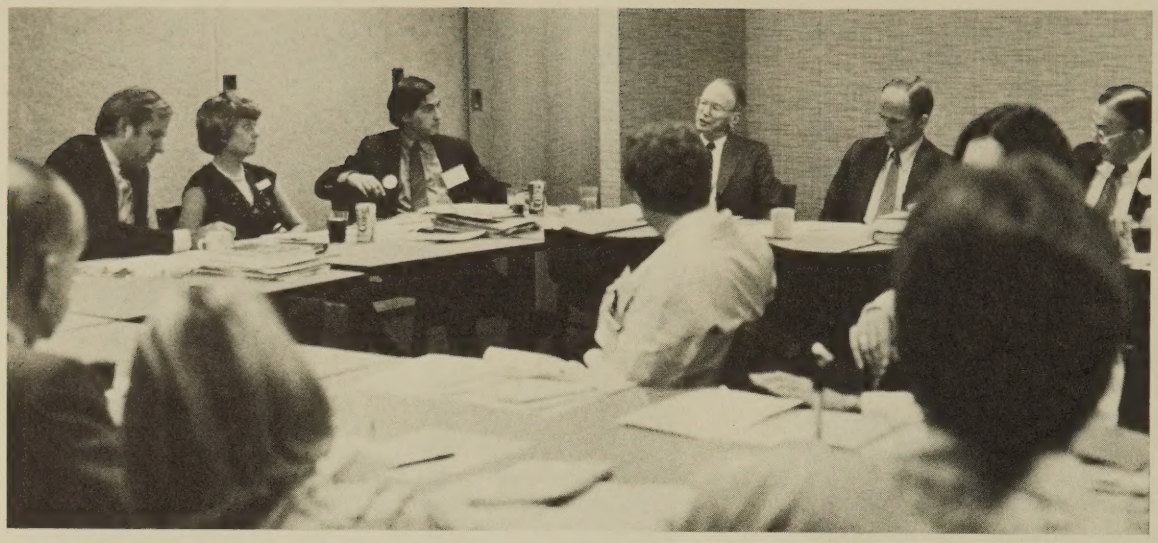
Frederic A. dePeyster, M.D. '40, with Mrs. R. Lincoln Kesler.

He expressed his sincere appreciation to the Society for its generous financial support over the past years. Benjamin Rush Society contributions have frequently been channeled to supplement student financial aid. . ."and we have used it well." Although the need for scholarship funds remains constant, Rush Medical College students now have access to a low-interest (currently 8.5 percent) borrowing program through which the institution can provide a large volume of loans. Therefore. . . "your generous philanthropy and our borrowing program have made student financial assistance less of an urgent need."

Dr. Russe emphasized the value of Benjamin Rush Society financial support to him as dean because the funds are unrestricted, which allows him to channel the gifts to the areas he perceives as top priority. Dr. Russe reported that his priority for the current year is faculty development. With the endorsement of members present and the Society's chairman, Benjamin Rush Society gifts are being earmarked this year to attract and retain capable new investigators and faculty members by providing attractive funding opportunities for setting up research projects, laboratories, computer systems, etc. Thanking Dr. Russe for his comments, Dr. dePeyster added, "we'll do all we can to support you as we have in the past." The meeting was adjourned.

Members of the Executive Council and special guests then reconvened in Room 578 of the Claude H. Searle, M.D., Conference Center for the semi-annual meeting of the Executive Council. (See page 10 for a complete report of the Council proceedings.)

The day was capped off by the Alumni Association-sponsored TGIF, which has become an annual tradition. Alumni volunteers recruited by **Thomas B. Stibolt, Jr., M.D. '75,** chairman of the Student Involvement Committee, served as bartenders and greeters to Rush University students who enjoyed a welcome break following their first full week of classes of the new academic year.



Members of the Executive Council at their fall meeting.

Minutes of the 1984 Fall Meeting of the Alumni Association Executive Council

The Executive Council of the Alumni Association of Rush Medical College held its fall meeting September 21 at the Medical Center.

R. Joseph Olk, M.D. '75, president, convened the session immediately following the first annual Benjamin Rush Society luncheon. On behalf of the Council, he welcomed several Class Agents and members of the Benjamin Rush Society as special guests. Attending were:

Council Members

R. Gordon Brown, M.D. '39
Ruth Campanella, M.D. '74
Frederic A. dePeyster, M.D. '40
Thomas A. Deutsch, M.D. '79
Steven Gitelis, M.D. '75
Cheryl M. Gutmann, M.D. '78
George H. Handy, M.D. '42
Isaac E. Michael, M.D. '42
R. Joseph Olk, M.D. '75
Ronald W. Quenzer, M.D. '73
Floyd F. Shewmake, M.D. '73
Thomas B. Stibolt, M.D. '75

Class Agents and Benjamin Rush Society Members

Eloise Parsons Baker, M.D. '25
George B. Callahan, M.D. '26
R. Kennedy Gilchrist, M.D. '31
Paul H. Harmon, M.D. '31
Paul J. Jones, M.D. '83
Julian Levy, M.D. '22
Stanley E. Monroe, M.D. '36
Paul J. Patchen, M.D. '30
Theodore Zekman, M.D. '34

Dr. Olk conveyed regrets from Council members unable to participate—**C. Arnold Curry, M.D. '73, Stanton A. Friedberg, M.D. '34, Helen Holt, M.D. '34,** and **Ronald D. Nelson, M.D. '74.**

Institutional Report

Sheldon Garber, secretary for the Medical Center's Board of Trustees and vice president of philanthropy and communication, extended an institutional welcome on behalf of the Trustees and the Management Committee. He reviewed some of the highlights of the September plenary meeting of the Board, which focused on the beginning of the academic year and touched on the experimental alternative curriculum that will involve eight medical students during its first phase.

Election of two new Trustees will be formalized at the annual meeting on November 14: David Grainger, chairman of the board and chief executive officer of W. W. Grainger, Inc., in Chicago, and John P. Keller, president of Keller Steel Company, in Northfield, Illinois. Garber also announced the appointment of Kevin J. Necas, vice president for finance at the Medical Center.

Committee Reports

Dr. Olk then introduced a discussion of various committee assignments, preceded by a request that all keep an eye toward the future need to identify and recruit promising new leadership for each committee.

Nominations Committee **R. Gordon Brown, M.D. '39,** co-chairman)

A motion was made, seconded and unanimously approved to recommend that the Trustee Committee on Nominations and Trustee Planning reappoint the four current alumni Annual Trustees: **R. Gordon Brown, M.D. '39, Robert J. Hasterlik, M.D. '38, Ronald D. Nelson, M.D. '74,** and **R. Joseph Olk, M.D. '75. Waltman Walters, M.D. '20,** continues to serve as a Life Trustee.

The Nominations Committee, consisting of Drs. Brown and Nelson, co-chairmen, and **Thomas A. Deutsch, M.D. '79,** and **Cheryl M. Gutmann, M.D. '78,** will be scheduling a meeting this fall to prepare a slate for the upcoming elections. The slate will be sent to all members of the Council for endorsement prior to distribution to alumni-at-large with a ballot in the March issue of the *Record.*

A recommendation was made that the committee continue to hold one or two vacant positions open on the Council to allow for special appointments to be made under extraordinary circumstances.

Dr. Brown closed by pointing out that the Alumni Association will have reached the "tilt point" at commencement in June, with parity representation from the pre-1942 and post-1973 graduates. From that point on, the younger alumni constituency will continue to grow, so it is more important than ever that Council vacancies be filled with candidates from the post-'73 era.

Awards Committee (**Frederic A. dePeyster, M.D. '40,** chairman)

Dr. dePeyster reviewed the list of former recipients of the Distinguished Alumnus Award, as well as the first

recipients of the newly created James A. Campbell, M.D., Alumni Service Awards.

His committee will be activated soon to select the 1985 recipients. As always, candidates for consideration are welcome and should be forwarded to Dr. dePeyster, in care of the Alumni Association.

A recommendation was made to activate the Class Agent Network to help identify additional candidates for review by the Awards Committee. Final selections will be made by the end of December.

Reunion Planning Committee (**Steven Gitelis, M.D. '75,** chairman)

Since the format of last year's Alumni Weekend worked so well, the committee has decided to make only minor modifications to the '85 program. Suggestions for possible mini-course topics are encouraged.

The Alumni Association will again collaborate with the office of Ronald Weinstein, M.D., chairman of pathology, in setting up the Alumni Clinicopathological Conference which highlights members of the graduating class, and with Roger Bone, M.D., chairman of internal medicine, on Medical Grand Rounds to feature alumni of the 10-year reunion class of 1975.

Attendance at the 1984 Banquet hit a record of 500. As participation from the anniversary classes continues to grow, we are apt to expand even further. By consensus of the Executive Council and members of the Reunion Planning Committee, the Alumni Association Commencement Banquet will again be held at the Drake Hotel in 1985. Inflation will necessitate an increase in ticket price to $40, after remaining at $37.50 per person for the past three years. Members of the graduating class and the 50-year reunion class will continue to be invited as special guests of the Alumni Association.

Philanthropy/Annual Appeal Committee (**R. Joseph Olk, M.D.,** co-chairman)

Dr. Olk reviewed some of the data covered earlier at the Class Agent Workshop and the meeting of the Benjamin Rush Society. Most encouraging has been the positive response from younger alumni, in terms of participation (which almost doubled from the year before) and gift size. Twelve of the 20 new members joining the Benjamin Rush Society for the first time graduated after 1973, and several of them were members of the Executive Council.

With increased involvement of the Class Agent Network and greater participation in personal solicitations by members of the Executive Council, it is anticipated that we will do even better this year. Although giving figures are improving gradually, Rush's alumni participation rate of 16 percent falls short of the 35-50 percent average range quoted recently in a survey of private medical schools by the Association of American Medical Colleges.

The importance of deferred and special gifts was apparent when reviewing the comparison giving reports from the past two years. In fiscal '83-'84, more than $242,000 of the $430,000 given by alumni came from estates of Rush graduates and large gifts to endowed chairs, which are not repeated annually. We must strive to increase and strengthen the base of consistent alumni support which can be counted on from year to year, in addition to encouraging our graduates to continue to consider provisions for Rush Medical College in their estate plans.

Special reunion class giving efforts will be launched following the annual appeal for the classes of 1935 and 1975. Leadership is being identified and committees recruited for those purposes.

Student Involvement Committee (**Thomas B. Stibolt, Jr., M.D. '75,** chairman)

Increasing the visibility of the Alumni Association with

Candidates for Membership on the Executive Council

In compliance with the bylaws of the Alumni Association of Rush Medical College, an election is being held for officers and members of the Executive Council for the term June 1985-87. (Ballot appears on page 17.)

Council members play an advisory role in planning Alumni Association activities and are expected to attend two meetings at the Medical Center in Chicago per year.

They also take an active role in the organization and implementation of sponsored projects (i.e., fundraising for the College, regional meetings, reunion activities, CME programs, communication with fellow alumni, etc.); serve on one or more committees of the Alumni Association as needed; help identify and recruit promising new leadership for alumni activities; set a standard through personal involvement and philanthropic support to be emulated by their colleagues; and serve to represent views and reactions from alumni of all ages, specialties and geographic locations.

Following are the candidates.

President

R. Joseph Olk, M.D. '75

"In the past two years we have seen a magnificent response by alumni in joining the ranks of the Benjamin Rush Society. I hope we can expand participation further in the next two years. It is my hope to eventually expand the existing membership ranks of the Alumni Association to include graduates from all four colleges of the University and from the departments of the Medical Center."

Dr. Olk's specialty is ophthalmology, with subspecialties in diseases and surgery of the retina, vitreous and macula. Affiliated with Barnes Hospital and St. Louis Children's Hospital, he is also an assistant professor in ophthalmology at Washington University School of Medicine. Dr. Olk was first elected an Alumni Trustee of Rush-Presbyterian-St. Luke's Medical Center in 1975 and became a member of the Alumni Executive Council that year. This will be his second term as president. He is a fellow of the American Academy of Ophthalmology and his other professional memberships include Alpha Omega Alpha, American Medical Association, American College of Surgeons—Candidate Group, Missouri State Ophthalmological Society, St. Louis Ophthalmological Society, Missouri State Medical Society, St. Louis Metropolitan Medical Society and Pan American Ophthalmological Association. As president, Dr. Olk sits *ex officio* on all committees of the Alumni Association.

President-Elect

Steven Gitelis, M.D. '75

"I hope to foster pride in Rush Medical College, to increase participation in alumni functions and to increase alumni participation in improving the financial plight of current Rush students."

Dr. Gitelis specializes in orthopedic surgery with a sub-specialty in orthopedic oncology. He is an assistant professor of orthopedic surgery at Rush and a member of the American Medical Association, Illinois State Medical Society, Chicago Medical Society and Musculoskeletal Tumor Society. An active member of the Executive Council, he served as secretary of the Alumni Association and has been chairman of the Reunion Planning Committee for the past three years. In 1983 he was one of five surgeons chosen by the American Orthopaedic Association for its North American Traveling Fellowship Program. Last year he was honored with the James A. Campbell, M.D., Alumni Service Award.

Secretary

Thomas B. Stibolt, Jr., M.D. '75

"I am firmly committed to two major areas of endeavor for the Alumni Association. The first is to strengthen the ties and involvement of the pre-1942 Rush graduates. The second is to increase the visibility of the Alumni Association to the current students and recent graduates."

Dr. Stibolt is an assistant professor of internal medicine at Rush Medical College and an assistant attending physician at Presbyterian-St. Luke's Hospital, specializing in pulmonology. He has served on the Reunion Planning Committee for the past three years and is chairman of the Student Involvement Committee. He was elected secretary in 1983. His professional memberships include the American College of Chest Physicians, American College of Physicians, American Thoracic Society and Institute of Electrical and Electronics Engineers, as well as Alpha Omega Alpha.

Treasurer

Mary Kay Tobin, M.D. '77

"The financial burden of medical school presents increasing difficulties for our medical students in the 1980s. The Executive Council must continue to be creative in finding and providing support for our students to allow them to pursue a quality education."

After graduation from Rush, Dr. Tobin took her residency training in internal medicine at Presbyterian-St. Luke's Hospital and served as chief resident in 1980-81. She completed a fellowship in allergy/immunology and is currently assistant professor in the Department of Medicine at Loyola University Medical Center. Dr. Tobin is an associate member of the American College of Physicians. She was elected treasurer of the Alumni Association in 1981 and has been an active member of the Executive Council, serving on numerous committees.

Past-President

Ronald D. Nelson, M.D. '74

"I plan to maintain an active role in the ever-expanding activities of the Alumni Association. Many new programs have come into place but more needs to be done. I hope reunion planning can be enhanced so that more alumni, especially from the anniversary classes, participate. Support from alumni for student financial aid has increased but even greater improvement is needed in these hard economic times. Educational programs through the Alumni Association have been

expanded and now need to be tailored to meet more specific alumni needs."

On the staff of Memorial Hospital of South Bend in Indiana, Dr. Nelson specializes in internal medicine, with a sub-specialty in cardiology. He is also director of the transitional year residency program at Memorial Hospital. Dr. Nelson has been a member of the Executive Council since 1977, serving as president from 1980 through June of 1983. Dr. Nelson is a member of the Board of Trustees of Rush-Presbyterian-St. Luke's Medical Center. A fellow in the American College of Cardiology, Dr. Nelson is also a member of the American Medical Association and Alpha Omega Alpha and serves as Class Agent for 1974.

Members

R. Gordon Brown, M.D. '39

"I intend to continue fostering the current regrowth of the Association toward its proper function as a conduit of the potential benefits which exist mutually between Rush Medical College and its alumni."

A resident of Winnetka, Illinois, Dr. Brown's specialty is in internal medicine. He is currently involved in disability assessment and policy interpretation for the Department of Health and Human Services. He is senior attending physician at Rush-Presbyterian-St. Luke's Medical Center and associate professor of Rush Medical College. He is a diplomate of the American Board of Internal Medicine and a member of Alpha Omega Alpha, the Institute of Medicine of Chicago and American Medical Association. Dr. Brown is a Trustee of Rush-Presbyterian-St. Luke's Medical Center and past-president of the Alumni Association. He has served on numerous committees over the years and continues to make significant contributions as an active member of the Executive Council.

Ruth S. Campanella, M.D. '74

"Rush is an exciting place. The Alumni Association has graduated and become a viable entity in this nega-Medical Center. Come back and tour; the difference in five years is amazing. Despite the tremendous expansion, we must not forget the newer generation of students who, as we did, need help. We all benefited from the 'friendly atmosphere' at Rush but we must strive to keep this intact in the growing Medical Center. The Alumni Association is a fact, but needs support from us all, philosophically and financially Graduates of the 'new Rush' are outnumbering those pre-1942 so must now depend on us."

Dr. Campanella, who has a private practice in otolaryngology, is an assistant-professor at Rush Medical College, assistant attending at Rush-Presbyterian-St. Luke's, and attending at Grant Hospital of Chicago. She has been a member of the Executive Council since 1979. Her professional memberships include Alpha Omega Alpha, American College of Surgeons, American Academy of Otolaryngology and Head and Neck Surgery, Chicago Laryngologic Society, Society of University Otolaryngologists, American Medical Association, Illinois Medical Society and Chicago Medical Society. She is also on the board of directors at the North Avenue Day Nursery. In 1981 she received the Medical Center's surgical attending award.

C. Arnold Curry, M.D. '73

"I hope to convey a spirit of enthusiasm and belonging to those who have had the privilege of being associated with Rush, and to promote the will to active sponsorship and support of our alma mater."

Dr. Curry has been a member of the Rush Executive Council since 1975 and continues to serve as Class Agent for 1973. While a student at Rush, he received the David Peck Society Award for contributions to the Student National Medical Association. Dr. Curry practices internal medicine, specializing in hematology/oncology, in Detroit, Michigan, where he took his residency training at Henry Ford Hospital. He is a member of the staff at Harper-Grace Hospital, Hutzel Hospital, Southwest Detroit Hospital and St. Joseph Mercy Hospital. Dr. Curry also is an instructor in the Department of Oncology at Harper-Grace Hospital. His professional organization memberships include the American College of Physicians, National Medical Association, Wayne County Medical Society and American Society of Internal Medicine. He also serves on the membership committee of the Policy Council of the Michigan Cancer Foundation.

Frederic A. dePeyster, M.D. '40

"When called upon to serve the Alumni Association of Rush Medical College I will continue to respond with enthusiasm."

Dr. dePeyster is professor of surgery and senior attending surgeon at Rush-Presbyterian-St. Luke's Medical Center and consulting surgeon at Cook County Hospital. He is a governor of the American College of Surgeons, director of the Western Surgical Association and member of the American Medical Association, Illinois Surgical Association, Society for Alimentary Tract Surgery, American Association of Cancer Research and International Society of Surgeons. Dr. dePeyster is also past director of the Community House of Winnetka. He has been a member of the Executive Council since its inception and has served as treasurer, secretary and president of the Alumni Association. A former Trustee of the Medical Center, Dr. dePeyster is currently chairman of the Benjamin Rush Society and the Alumni Awards Committee, a councillor for Alpha Omega Alpha and a member of Sigma Xi.

Gordon H. Derman, M.D. '76

"It is my belief that the Alumni Association serves many important goals. Through the Association and its contributions, we can assure the continued excellence in education and the special tradition at Rush of quality medical care and concern for patients. The Alumni Association should also serve as a focal point for those of us who would like to meet our colleagues and who enjoy academic and social interaction. The Alumni Association is an excellent forum for providing guidance and assistance to younger physicians who are experiencing those difficult times during postgraduate training and the beginning of their independent medical careers."

Dr. Derman is a plastic and reconstructive surgeon, specializing in hand and microscopic surgery. He is an assistant professor and attending physician at Rush-Presbyterian-St. Luke's Medical Center and is also a

member of the surgical associate staff at St. Francis Hospital, Evanston, Illinois. He completed a surgical internship and residency at Loyola University Medical Center and a residency in plastic surgery at the University of Michigan Medical Center. He also completed a fellowship in microsurgical research at Rush in 1976. Dr. Derman earned the 1983 American College of Physicians Associates Award for outstanding clinical research and the Kaiser and Puestow teaching awards through Loyola. He is a candidate member of the American College of Surgeons and the American Society of Plastic and Reconstructive Surgeons, and a member of the American Medical Association, the Reed O. Dingman Plastic Surgery Society, and the Chicago Medical Society. He has been board certified in general surgery since 1983.

Thomas A. Deutsch, M.D. '79

"The Executive Council is charged with coordinating the activities which will foster the bonds between alumni and Rush Medical College. These bonds take the form of interest, participation in activities and philanthropy. We must continue to search for ways to spark interest in Rush among the members of the Alumni Association."

Dr. Deutsch, an assistant professor at Rush, is program director of the ophthalmology residency program at the Medical Center. After interning in pediatric medicine at Presbyterian-St. Luke's Hospital, he completed a residency in ophthalmology at the University of Illinois Eye and Ear Infirmary, serving as chief resident his final year. He earned the Lyman Prize at Rush in 1978, and was named the outstanding senior resident for clinical excellence in ophthalmology in 1983. Originally appointed to the Executive Council in 1984 to fill the vacancy left by the resignation of Waltman Walters, M.D. '20, Dr. Deutsch serves as a Class Agent for 1979 and was active on the 1984 Reunion Planning Committee. He is a member of the American Medical Society, the American Academy of Ophthalmology, and the Association of Research in Vision and Ophthalmology.

Stanton A. Friedberg, M.D. '34

"I will continue to encourage involvement of Rush students in Alumni Association activities; pursue efforts to obtain a better location for the Archives on campus; and seek to foster increased alumni interest and support for the Library of Rush University, particularly its special collections."

Dr. Friedberg is past chairman of the Department of Otolaryngology and Bronchoesophagology at Rush-Presbyterian-St. Luke's Medical Center, and is an active member of the Presbyterian-St. Luke's Hospital staff. After graduating from Rush, he completed his training at Presbyterian Hospital and Cook County Hospital. Dr. Friedberg is a member of Phi Beta Kappa and Alpha Omega Alpha. He received the Distinguished Service Award of The University of Chicago Medical Alumni Association in 1965 and was named Distinguished Alumnus of Rush Medical College in 1982. He is a fellow of the American College of Surgeons, past president of the American Laryngological Association and the American Bronchoesophagological Association, member of the American Academy of Otolaryngology and on the board of directors of National Medical Fellowships. Dr. Friedberg is past chairman of the Benjamin Rush Society and has been a devoted member of the Executive Council of the Alumni Association since the reactivation of Rush Medical College, serving on numerous committees.

Cheryl M. Gutmann, M.D. '78

"I am enthusiastic about helping to establish and maintain a network of communication among Rush graduates to encourage participation and sharing of experiences and to create a spirit of camaraderie among those of us still at Rush, alumni and medical students, as well as those who have left."

Dr. Gutmann, an assistant dean in the Office of Medical Student Programs at Rush Medical College, is also an assistant professor of psychiatry at Rush and assistant attending at Presbyterian-St. Luke's Hospital. She completed her residency training in psychiatry at Rush, where she was an active member of the Presbyterian-St. Luke's House Staff Association. Her subspecialty is hospital management studies; she was also a resident and fellow with both the U.S. Department of Health and Human Services-Region Five Division of Service Delivery Assessment and the American Hospital Association Office of Public Policy Analysis. In 1982 she was awarded a Pillsbury Foundation Fellowship. Active in the Alumni Association, Dr. Gutmann has served four years on the Nominating Committee and has also been involved in a number of programs including the annual "TGIF" get-togethers, reunion planning and the development of the Alumni Resource Network. She is a member of the American Psychiatric Association and the Illinois Psychiatric Society and has served on the Executive Council for one term.

George H. Handy, M.D. '42

"I hope to provide a liaison between our class and the Alumni Association, assist in the professional growth of my colleagues through Association programs and help alumni become reacquainted with Rush."

Dr. Handy, whose specialty is general preventive medicine with a sub-specialty in occupational health, holds an administrative position with the State of Wisconsin. He is a member of numerous national professional organizations, including the American Medical Association, the American College of Preventive Medicine, and the American Association of Public Health Physicians. He also is involved in Madison West Rotary, Zor Shrine, the Madison Club, and the Health Policy Council. Dr. Handy currently serves as Class Agent for 1942.

Richard E. Melcher, M.D. '75

"The Alumni Association of Rush Medical College is the cornerstone of my present involvement with Rush University. The graduates of Rush enter the mainstream of medicine as physicians, teachers and benefactors. In the 1980s and beyond, each of us will be called upon to lead our patients and students by a strong moral and financial example. I can think of no better way to encourage future alumni to support Rush than to create a philanthropic atmosphere among our peers today."

Dr. Melcher is medical director of the Department of

Respiratory Therapy at Humana Hospital, Augusta, Georgia, and served as the chairman of the Department of Family Practice there in 1984. In addition to his private practice, he is a clinical assistant professor at the Medical College of Georgia and medical director of West Lake Manor, a nursing home. He was elected to the Aesculapius Club at the Medical College of Georgia in 1983. Dr. Melcher is a member of the American Academy of Family Practice and the American Geriatrics Society. He will take over the chairmanship of the Benjamin Rush Society in June of 1985.

Isaac E. Michael, M.D. '42

"The philosophy of excellence has been a tradition at Rush since 1837. This philosophy is surely being perpetuated by the students attending Rush today. They are being appointed to coveted residencies in outstanding medical centers. We should all make every effort to continue this long-standing tradition."

Dr. Michael, whose specialty is internal medicine, is affiliated with St. Vincent's Hospital and Methodist Hospital, both in Indianapolis, Indiana. A fellow of the American College of Physicians, he is a member of the American Medical Association, Marion County Medical Society, American Society of Internal Medicine, Sigma Xi and American Geriatrics Society. He is also serving as a delegate to the Indiana State Medical Association.

Ronald W. Quenzer, M.D. '73

"Active participation by all alumni in our Rush Alumni Association is absolutely necessary to provide direction for Rush Medical College. The Alumni Association serves to encourage financial aid for the Medical Center, develop postgraduate educational programs for alumni, enhance communication among colleagues, and assure a commitment that the college continues to educate only physicians of the highest standards. I do appreciate the opportunity to again serve on the Executive Council."

Dr. Quenzer is on sabbatical as an assistant professor of medicine in the Department of Medicine, Division of Infectious Disease, University of New Mexico Medical Center in Albuquerque. After a year of study, teaching and research, he plans to return to his internal medicine practice at Pratt Regional Medical Center in Pratt, Kansas, where he also serves as assistant clinical professor at the University of Kansas School of Medicine. He is a member of the American Society of Internal Medicine, American Medical Association, American Society of Microbiology and Alpha Omega Alpha. Dr. Quenzer earned the Intern of the Year Award while at Presbyterian-St. Luke's Hospital and the Resident of the Year Award at the University of Colorado Medical Center. He has just completed his second year as chairman of the Class Agent Network.

James E. Rejowski, M.D. '78

"One of the greatest attributes of Rush Medical College has always been the wide spectrum of individuals comprising the student body. The school as a whole has been enriched by the unique talents and experiences of each graduate. I would hope to work with the Association to maintain contact with all alumni so that their contributions and input will continue to enhance and enrich the traditions of Rush Medical College. I feel that such involvement by the alumni will allow those in the present and future classes to share the special relationship with Rush that we have."

Dr. Rejowski is an otolaryngology specialist with a sub-specialty in head and neck surgery. In addition to serving as an instructor at Rush Medical College, he is an associate attending physician at Hinsdale Hospital in Hinsdale, Community Memorial General Hospital in LaGrange, and St. Joseph's Medical Center in Joliet. He also is a consultant to the Shriner's Hospital for Crippled Children in Chicago. Dr. Rejowski is a diplomate of the American Board of Otolaryngology and a member of the Chicago Laryngological and Otological Society, American Academy of Otolaryngology—Head and Neck Surgery, and Alpha Omega Alpha. In 1983 he earned the Specialty Surgical Sciences Award for outstanding achievement as a senior specialty resident at Rush-Presbyterian-St. Luke's Medical Center.

Floyd F. Shewmake, M.D. '73

"I hope to serve the Alumni Association of Rush Medical College by helping to increase involvement of the new Rush alumni, graduates since 1973, now that we are entering our productive years in practice. I also will seek to increase general participation in alumni activities and strengthen relationships with the current student body so they will welcome active participation in the Alumni Association following graduation."

Dr. Shewmake is in private practice, specializing in internal medicine with a sub-specialty in gastroenterology. He is on the attending staff at both St. Katherine's in Kenosha, Wisconsin, and at Kenosha Memorial Hospital, as well as on the visiting staff at Rush-Presbyterian-St. Luke's Medical Center. Dr. Shewmake is assistant clinical professor of medicine at Milwaukee Medical College and chairman of the Department of Medicine at St. Katherine's Hospital. He is a member of the American College of Physicians, American Society of Gastrointestinal Endoscopy and American Society of Parenteral and Enteral Nutrition, Inc. Dr. Shewmake was an active member of the Reunion Planning Committee in 1983.

Marc A. Silver, M.D. '79

"I will forever be grateful to Rush Medical College for giving me so many opportunities. It is the least I can do to help Rush through our Alumni Association and thereby help future generations of students. I will encourage events that will draw together young and old alumni so that each group can continue to learn from and be proud of each other."

Dr. Silver, an internist, is a fellow in cardiology/cardiac pathology at Rush-Presbyterian-St. Luke's Medical Center. He is a member of the American College of Physicians, American Heart Association, Chicago Heart Association and American College of Chest Physicians. He served his internship and residency at Rush and was named Intern of the Year in 1980 and Resident of the Year in 1981 and 1982. From 1982 to 1984 he was a fellow with the National Institutes of Health in the National Heart, Lung and Blood Institute. Dr. Silver currently serves as a Class Agent for 1979.

Ballot

For the Election of Officers and Members of the Executive Council of the Alumni Association of Rush Medical College for the 1985-87 Term

Only graduates of Rush Medical College are eligible to vote

( ) I endorse the above slate for the Executive Council

( ) Write-in Candidate _____
Name *Class*

Please return this ballot by April 30, 1985. If you prefer strict confidentiality, cut here and mail this ballot in a separate envelope to the Office of Alumni Relations, Rush-Presbyterian-St. Luke's Medical Center, 1753 West Congress Parkway, Chicago, IL 60612.

Alumni Resource Network *(See story on page 19.)*

I am willing to participate in the "Network" in the following ways (check as many as apply):

( ) Providing free lodging for a night while student is interviewing.
( ) Providing lodging for a longer period (i.e., hosting a student who is taking an elective clerkship).
( ) Introducing the student to my city.
( ) Introducing the student to individuals I know at the program site being visited and/or showing the student around the hospital where I work.
( ) Inviting the student to spend time with me in my practice setting.
( ) Inviting the student to dinner.
( ) Expediting in-town travel arrangements.
( ) Providing an opportunity for a "fireside chat" or some other form of advice.
( ) Other: _____

Getting the Alumni Resource Network Going

We all remember the excitement, tension and complexity of trying to find and land just the right residency position. There are so many questions to ask and so many unforseen situations to resolve during a site visit that often seems all too short. Now graduates living outside Chicago can help Rush medical students get the most out of visits to their area by participating in the Rush Alumni Resource Network.

You can provide assistance in the way that suits you best. It might be lodging for a night, dinner, or a tour of your city. You could introduce the student to key people at the program site. A visit to the hospital where you work and other practice settings can be enlightening. Friendly advice or even a "fireside chat" can help the student ask the right questions and find the right answers.

In return, you'll learn a little about current activities at your alma mater, forge new ties with an alumnus and share in the excitement of a budding new career.

If you're interested in being part of the Rush Alumni Resource Network, please fill out the response card included in this issue of the *Record*. Your interest is not an obligation; the Office of Medical Student Programs will contact you about when and how you can help. On behalf of Rush students, thank you.

Cheryl Gutmann, M.D. '78
Assistant Dean
Office of Medical Student Programs

Alumni Receptions at Professional Meetings

Since our last report to you, the Alumni Association has sponsored three receptions in conjunction with national professional society conferences.

On November 23, William E. Deutsch, M.D., chairman of the Department of Ophthalmology at Rush, hosted a reception in Atlanta during the annual meeting of the American Academy of Ophthalmology. Alumni of Rush Medical College, current faculty members and house staff alumni attended.

Leo M. Henikoff, M.D., president of Rush-Presbyterian-St. Luke's Medical Center; Henry P. Russe, M.D., dean of Rush Medical College and vice president for medical affairs; and L. Penfield Faber, M.D., associate vice president and associate dean, surgical sciences and services, welcomed approximately 90 alumni, faculty and friends at a reception held in conjunction with the 70th Annual Clinical Congress of the American College of Surgeons in San Francisco October 23. Following the reception, local alumni and Rush Medical College faculty gathered for a special dinner honoring Dr. Henikoff.

Last April Rush joined with other medical schools belonging to the Northern and Downstate Regions of the American College of Physicians to co-sponsor an alumni reception during the annual ACP meetings in Atlanta, Georgia. Dean Russe was in attendance.

It is the Alumni Association's intent to continue offering similar opportunities for alumni to meet with one another and Rush Medical College faculty to keep current with developments at Rush-Presbyterian-St. Luke's Medical Center. We heartily encourage your attendance at all alumni receptions held in conjunction with professional conferences. Please refer to the calendar of events on the back cover of this issue of the *Record* for receptions scheduled during the coming months.

SAVE THE DATE •• SAVE THE DATE
Leo M. Henikoff, M.D., newly elected president
of Rush-Presbyterian-St. Luke's Medical Center,
will be officially inaugurated on
THURSDAY, MAY 2, 1985
All alumni are invited to attend the inaugural convocation
to be held at Medinah Temple at 3:00 p.m.
with a reception immediately following.

President *(continued from page 3)*

attendance: Class Agents **Stanley E. Monroe, M.D. '36,** and **Paul H. Harmon, M.D. '31,** came from California; **Paul Patchen, M.D. '30,** sat in for the ailing **Leonidas Berry, M.D. '30,** who is recovering well; and **Eloise Parsons Baker, M.D. '25,** managed to tear herself away from her farm in Neponset to be with us. We were also happy to welcome some of our newest members of the Network: **Marc A. Silver, M.D. '79,** just back from a two-year fellowship at NIH, **Paul J. Jones, M.D. '83** and **Brad D. Berman, M.D. '82.** We appreciate their commitment and that of all the Class Agents who took precious time from their busy schedules to participate in these important Alumni Association sessions.

Special thanks, too, to **Fred A. dePeyster, M.D. '40,** who has led the Benjamin Rush Society to record membership this year. Fred will pass the gavel of leadership on to the new Rush generation at the next meeting in June, when **Richard Melcher, M.D. '75,** takes over as chairman of the Society. Fred has also served us faithfully as chairman of the Alumni Awards Committee the past few years. I am pleased to report on Fred's behalf that the 1985 Distinguished Alumnus Award will be presented to one of our finest, **Samuel G. Taylor III, M.D. '32,** and that the James A. Campbell, M.D. Alumni Service Awards will go this year to **R. Gordon Brown, M.D. '39, James W. Merricks, M.D. '34,** and **Stanley E. Monroe, M.D. '36.** Once again, the committee has chosen well. . .

A special phonathon was held in February to encourage members of the anniversary classes to attend Reunion Weekend 85 (see page 6). Early indications point to a record turnout. Don't miss out on all the fun—mark your calendars now for June 6, 7 and 8 for a trip back to campus to visit old friends and make new ones.

See you in June . . .

Orientation for Parents

By Gerald S. Gotterer, M.D., Ph.D.
Associate Dean for Medical Student Programs

"We can now understand our son calling home in despair and then, just a few days later, calling again full of excitement and anticipation and the despair gone." This is typical of the comments we receive following orientation programs for parents of Rush medical students.

More than 85 percent of Rush medical students come from Illinois, a majority from the Chicago area. There is, therefore, frequent contact between most of the students and their families. These contacts can provide students with a source of psychological support through the stressful years of medical school, but, in the absence of understanding, can lead to friction and anxiety. The intensity of the academic effort and its demands on students are frequently not understood by families.

In an effort to build this understanding, the Office of Medical Student Programs has, for the past three years, sponsored a special orientation program for the parents of first-year medical students, held during the first quarter of the academic year.

Parents of more than 60 students attended the most recent program, filling Room 540 of the Academic Facility, the main lecture hall used for first-year instruction. Dean Henry P. Russe, M.D., began with an outline of the history of Rush Medical College and the explanation for Rush being both the oldest and newest medical school in Illinois. (It was originally chartered in 1837 and reactivated in 1969, after a temporary suspension of its educational program.) He noted that the school had recently undergone its regularly scheduled accreditation visit from the Liaison Committee on Medical Education and had come through with flying colors.

My talk described the preclinical curriculum. In particular, it emphasized: the differences between undergraduate study and medical school; the huge amount of material which must be learned in medical school, illustrated by the height of the pile of textbooks, syllabi, and co-op notes used during the first two years of medical school; and the level of anxiety most first-year students have as a result of the impossible task of knowing everything in the stack.

Thomas Hoeppner, Ph.D., associate professor of neurological sciences and former chairperson of the Committee on Student Evaluation and Promotion, presented a faculty perspective. He spoke of the difficulty each faculty member has in selecting the most important material from the broad range of possibilities in each discipline. He noted that this leads to a situation where the amount of specialized knowledge across the spectrum of disciplines that medical students are expected to learn exceeds that held by most practicing physicians.

Ed Eckenfels, assistant dean for academic counseling, described the support programs that are available for students. He discussed the academic advisor program that he directs and the various sources of psycholgical and other counseling services that students use. The Rush advisor program is unique in providing aggressive support by carefully selected and specially trained faculty volunteers who work with the same small group of students throughout all four years of medical school.

Kristen Stabell, M.D. '83, second-year resident in medicine at Rush-Presbyterian-St. Luke's, managed to get a few minutes off from her rotation in the emergency room to provide a recent graduate's perspective of the first two years of medical school. She told how her visits home were an important respite from her studies. These were successful for her because she was treated no more specially than she had always been treated. The dish-washing and other customary chores helped anchor her in the realities of her family life.

William C. Wagner, Ph.D., associate dean for student services, explained the financial aid program at Rush, which is needs based; the limited scholarship money that is available is reserved for students with the greatest need. He explained the very favorable payback provisions of the new Rush loan program established under the auspices of the Illinois Higher Education Loan Authority.

A second part of the parents' program has been the "Advances in Medicine" lectures by Rush faculty. These lectures have paired a talk from a technologically based field with one concerned with direct patient care. At the fall orientation, Robert G. Zadylak, M.D., assistant professor of psychiatry, presented a talk on advances in his field, and Eric J. Russell, M.D., assistant professor of diagnostic radiology and nuclear medicine, discussed recent advances in medical imaging.

The morning program concluded with an informal reception at which parents could talk with the four academic advisors for the first-year class; this was followed by Medical Center tours, led by advanced level students.

The success of the orientation for parents of entering students has led us to establish a second program, held in the spring of the second year, to make parents aware of changes in the educational format for the two clinical years and to discuss specialty choice and residency applications.

At the last program, Larry J. Goodman, M.D., assistant dean for clinical curriculum, detailed how the format changes from the classroom to the bedside and focused on how the demands of the experience draw on a wider range of individual talents. **Cheryl M. Gutmann, M.D. '78,** assistant dean for medical student programs, with responsibilities for career and residency counseling, reviewed the application process and talked of the increasingly competitive nature of entry into some of the specialties.

The very positive reception that these programs have received emphasizes the efforts that parents and students are making, both to maintain and to remold family relationships, in response to the different ways they experience the professional development of the physician.

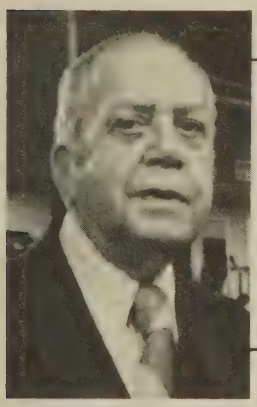
Retirement? Not for Julian Lewis, M.D. '17

He's nearly 94; but five days a week **Julian Lewis, M.D. '17,** still commutes between his Hyde Park home and Our Lady of Mercy Hospital in Dyer, Indiana, where he serves as a pathology consultant and the employee health physician.

Until two years ago, Dr. Lewis was director of clinical pathology for the 264-bed institution. Over the years he might have slowed down a bit, but there's no stopping Dr. Lewis, who says his education at Rush Medical College was the springboard for his long and active professional career.

He's seen a lot of changes in the last 70 years.

Back in 1915, students were taught that no doctor needs more than 12 drugs in his medicine cabinet and in those days, Dr. Lewis recalls, "that was just about true. You only had a few opiates, mercury, iodine," he explains. "Now the list of drugs fills a book 2½ inches thick, the *PDR.*"



The Rush Advantage: 'Graduates. . .live a long time.'

—Dr. Lewis

Treatment protocols and techniques today are obviously very different from the way they were in 1915. The skills and lessons are different, too, according to Dr. Lewis.

In his days at Rush, medical students and interns did all their own lab tests on blood, urine and other samples. "There were no technicians to do it for us," Dr. Lewis says. "You learned a lot about how it all fit together." Core concepts, on the other hand, remain the same.

Dr. Lewis remembers listing ingredients for a prescription he'd prepared for a pharmacology course, and being told it was incomplete.

"Professor Walter Haines asked me, 'Did you put any *thoughts* into it, Mr. Lewis?' You see, medicine has always been more than just mechanical things," Dr. Lewis explains. Physicians must think about individual patients and the unique aspects of every case, and then tailor the treatment to fit each one.

Dr. Lewis' medical career began with a master's degree in physiology from the University of Illinois, followed by a Ph.D. in pathology from The University of Chicago. His next goal was to be accepted to Rush.

"Rush was the most popular medical school of its time in Chicago. Students came from everywhere, because Rush had an excellent reputation, just like it does now," he recalls.

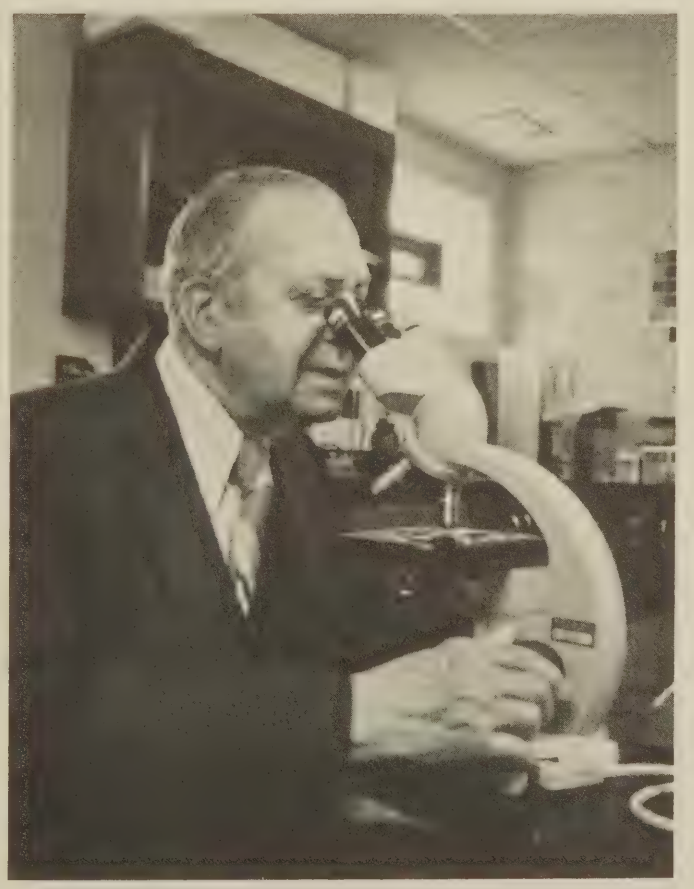
That reputation was based on the renowned faculty and facilities.

The 144 students in Dr. Lewis' class studied under acclaimed physicians whose names remain well known today. Frank Billings, M.D., who built Billings Hospital, was dean; Arthur Dean Bevan, M.D., who spearheaded AMA efforts to establish medical education standards on a scientific basis, headed the surgery department.

As a student, Dr. Lewis assisted Rollin T. Woodyatt, M.D., whose research contributed to the discovery of insulin. From then on his focus was in the laboratory where he eventually turned his attention to immunology, earning the Howard Taylor Ricketts Award for research and a two-year Guggenheim Fellowship in Basel, Switzerland. Dr. Lewis spent more than 30 years in the pathology department at The University of Chicago, Pritzker School of Medicine, investigating the immunologic role of antibodies in blood serum and writing more than 50 papers which were published in scientific journals.

In 1950 he became clinical director of pathology for St. Margaret Hospital in Hammond, Indiana, and joined Our Lady of Mercy in 1969.

His many years of research and practice have convinced Dr. Lewis that there is one more important advantage to holding a Rush degree. He says with a smile, "Rush graduates, you see, live a long time."



Dr. Lewis in the lab at Our Lady of Mercy Hospital in Dyer, Indiana.

Answering a Call in the Brazilian Jungle

This article first appeared in the February 1985 issue of NewsRounds, *the Medical Center employee publication. Dr. Styka has since completed his residency and joined Anesthesia Services, Ltd., in Albuquerque, New Mexico, where he is also on staff at Presbyterian Hospital.*

They come by the hundreds—men, women and children—spending their life savings for passage on a hammock-lined boat on the Amazon River, betting their lives on a small Brazilian jungle clinic and a visiting team of American doctors and health care personnel.

About 55 of them won their bet recently when they were operated on by an orthopedic surgical team that included **Phillip Styka, M.D. '82,** a third-year anesthesiology resident at the Medical Center.

Dr. Styka, along with orthopedic surgeon Dennis Gates, M.D., adjunct attending at Rush-Presbyterian-St. Luke's, surgical nurses Anita Cassara and Charlene Harness of Chicago's Mercy Hospital and Medical Center, and physical therapist George Stortz of Chicago's Mt. Sinai Hospital Medical Center, spent three weeks at the Clinica dos Pobres (Clinic of the Poor) at Santarem, Brazil.

"Santarem is a strategic spot right along the Amazon. It's a city that's constantly in flux, comprised loosely of about 250,000 people, most of them suffering from poverty, malnutrition and disease," says Dr. Styka. It's also the only touch of civilization for the thousands of natives who live deep in the jungle.

"When Dr. Luke Tupper (a surgeon and Franciscan brother who founded the clinic) went down there in 1969, there were less than a dozen physicians and dentists serving an area the size of Illinois, Wisconsin and Indiana put together," Dr. Styka explains. "It's not much better than that now."

Dr. Tupper founded Esperanca ("hope" in Portuguese), a non-profit organization that collects donations and equipment for the clinic. Under the direction of general surgeon and Franciscan brother Bill Dolan, M.D., medical problems are treated at the clinic year-round. Surgeries, however, are only performed several times a year when, through Esperanca, American surgeons visit the clinic for three-week periods.

Phillip Styka, M.D. '82 (right), and Dennis Gates, M.D., adjunct attending at Rush-Presbyterian-St. Luke's, with one of the clinic patients.

Two months before each visit a call goes out over the bishop's radio, often the only form of village communication, urging people with health problems to see their "barefoot doctors." Esperanca trains these village paraprofessionals to inoculate natives against disease, treat minor medical problems and diagnose problems that could be treated at the clinic.

The "barefoot doctors" serve two purposes, Dr. Styka points out. They provide minor medical care to the people in the jungle heartland, and they keep clinic doctors from being overwhelmed by patients with minor or non-medical problems.

The system reinforces itself because "if you have a letter saying you've seen the barefoot doctor, you'll be seen (at the clinic) right away," says Dr. Styka. "If you don't have the letter, you take a place in line."

The letter is critical if the patient needs to see the surgeons. "The people we scheduled for surgery were the people who had the letter from the barefoot doctors. They had preference," he says. About 40 underwent orthopedic surgery and another 15, general surgery.

Most of those patients were children, 90 percent under the age of six. "With children you have a greater impact on the health system," Dr. Styka explained.

He was amazed by the patients' trust. "These patients have no fright at all. They have all the faith in the doctors who are taking care of them. Any 13-year-old here (in the U.S.) would be frightened to death," Dr. Styka says.

That attitude continued after surgery, he adds. "These people, after surgery, require maybe one dose of pain medication. Yet these are major surgeries, for club foot or a vaginal hysterectomy. They perceive the pain differently—'now I'm better,' rather than 'look how bad I feel'."

That resiliency is important, since the small hospital has few beds. Most patients slept in hammocks, and few stayed longer than overnight.

Although the operating facilities were more modern than expected, the American surgical team faced many difficulties with the 15-year-old equipment, limited supplies and lack of diagnostic tests.

"My clinical acumen became very sharp," Dr. Styka says. "There was no electrocardiogram test, none of our ordinary labs (tests). You have to develop a clinical sense (of the patient's condition) very quickly, and that's all you have to rely on."

The Department of Anesthesiology contributed about $5,000 in equipment and medications as well as paying for Dr. Styka's trip, and other institutions and organizations similarly donate materials through Esperanca. However, critical shortages of intravenous antibiotics and other drugs mean that some patients just cannot be helped.

"To make that kind of decision (not to treat)—it's terrible, You just don't have to face that predicament in

(see 'Brazilian Jungle' on next page)

Brazilian Jungle *(continued from page 22)*

practice here, and certainly not in a residency program," Dr. Styka says. "You just have to send them back into the jungle and hope they do well."

Yet the people are unfailingly grateful for anything the doctors do for them. "I came back with incredibly warm feelings for these people. Everyone was always thanking you," he recalls.

Those fond memories and "the haunting realities" of medical care in the Brazilian jungle made Drs. Styka and Gates resolve to return to Santarem in early 1986. Says Dr. Styka: "The whole experience gives you feelings you will never forget."

Left—Smiling faces get together for a group photo. Dr. Styka is seated second from the left and Dr. Gates, third.

Benjamin Rush Society Update

As chairman of the Benjamin Rush Society, it was my pleasure to host the first annual meeting of the Benjamin Rush Society on September 21 at the Medical Center (see story on page 8). Since then, five alumni have joined the ranks of the Benjamin Rush Society.

We welcome **Thomas A. Deutsch, M.D. '79, and his wife, Elise, M.D. '81, Steven Gitelis, M.D. '75, Jack Hoekzema, M.D. '34, Joseph H. Schiff, M.D. '37, and Ellen C. Smith, M.D. '75.** Two members, I'm sorry to report, have recently passed away: **Lois Dixon Greene, M.D. '26,** and **Frank E. Trobaugh, Jr., M.D.** As of January 31, our membership stands at 115.

The society has responded admirably to Dean Henry P. Russe's request for funds to support faculty development. As of January 31, unrestricted giving totaled $128,000. In addition, nine Benjamin Rush Society members contributed $35,000 to support student loan and scholarship funds. This represents a solid increase over the same period last year. My personal thanks for your generosity and loyalty.

As we plan for the second meeting of the Benjamin Rush Society on June 6 (scheduled in conjunction with Alumni Weekend 1985), our goals are constant: additional membership and increased support.

It has been most gratifying for me to watch the steady growth of the society since its inception in 1969 with the reactivation of Rush Medical College. Since that time, unrestricted discretionary support through the Benjamin Rush Society has provided Rush Medical College a strong philanthropic base. This has allowed the college to pursue its primary goal of providing exceptional medical education, thereby ensuring Rush's proper place at the top of the academic ranks.

It is my sincere belief that all our graduates share in this goal. I encourage all alumni who have not yet joined the Benjamin Rush Society, which represents the philanthropic leadership of the Alumni Association of Rush Medical College, to take a moment and consider investing in the future of our faculty and students. Alumni qualify for general membership through an annual unrestricted gift or pledge of $1,500. As chairman, I urge your consideration and generous support of our alma mater through membership in the Benjamin Rush Society. A business reply envelope is enclosed in this issue of the *Record* for your convenience.

I look forward to our June meeting with great anticipation. What a pleasure it would be to announce additional names for the society's roster at that time!

Frederic A. dePeyster, M.D. '40
Chairman, The Benjamin Rush Society

Dean *(continued from page 3)*

um in mid-November featuring some of the major figures in bone marrow transplantation. Rush also hosted a popular conference here on campus, celebrating the thirtieth anniversary of our Section of Medical Oncology and the eightieth birthday of **Samuel G. Taylor III, M.D.** Sam, who is founder of the section, member of the **Class of 1932** and Class Agent, has recently been selected to receive the 1985 Distinguished Alumnus Award, to be presented by the Alumni Association of Rush Medical College in June (see story on page 4). Bravo, Sam. The First International Conference on Multiple Personality/ Dissociative States, attended by more than 400 participants from around the world, was another Rush-sponsored standing-room-only success. We continue to make our mark on the medical universe. . .

At the annual meeting of the Trustees on November 14, two new chairs in the Department of Anesthesiology were announced honoring William Gottschalk, M.D., associate chairman of the department, who died suddenly on October 22, 1984, and Max S. Sadove, M.D., former chairman of anesthesiology (1971-1979), now retired but still maintaining a vigorous research and patient practice. Many of you know that **Dr. Sadove's** living legacy extends to his **two sons: Alan,** former resident in the surgery department, and **Richard,** who graduated from Rush Medical College in **1978** and is specializing in plastic surgery.

I look forward to seeing a strong contingent of Rush alumni back on campus for Alumni Weekend 1985 and extend my personal appreciation for your ongoing support of the College and its educational mission.

Establish Gottschalk, Sadove Professorships in Anesthesiology

Two endowed chairs honoring past leadership in the Department of Anesthesiology were announced at the annual meeting of the Medical Center Board of Trustees by Leo M. Henikoff, M.D., president of Rush-Presbyterian-St. Luke's.

The newly named chairs honor William Gottschalk, M.D., associate chairman of the department of anesthesiology, who died October 22, 1984, and Max S. Sadove, M.D., who served as chairman of the department from 1971 to 1979. There are now 32 endowed professorships in Rush University.

The endowment for each was contributed by family, friends, patients and colleagues. Named professorships require an assurance of $1 million in endowment.

Dr. Sadove, now emeritus, brought the department to international stature during his administration and remains active in research in the field. He was described by Dr. Henikoff as "a Renaissance man because of his mind, the depth of his compassion and the enthusiasm of his imagination." Dr. Sadove served as chairman of the department of anesthesiology at the University of Illinois for 21 years before coming to Rush in 1971 as chairman.

"He was a national figure in his field and brought that distinction to us," Dr. Henikoff said. "He gave of himself unstintingly. He set up a program of scientific inquiry into the relief of pain. In publications and presentations, he taught and inspired."

Dr. Sadove has two **sons** who are also physicians. **Richard,** a Rush graduate from the **Class of '78** is now specializing in plastic surgery. **Alan,** a surgeon, served on the **House Staff** at the Medical Center from **1974-'79.**

Dr. Gottschalk, an internationally recognized authority in both anesthesiology and gynecology, was born in Belgium. He joined the Medical Center in 1975, holding professorships in two departments in Rush Medical College and another in the College of Nursing.

Dr. Henikoff said that "It is the wish of the department's staff and faculty and it is the wish of his family" that a chair be named in memory of Dr. Gottschalk. The family of Dr. Gottschalk has committed the funds that complete the requirements for the William Gottschalk, M.D., Professorship in Anesthesiology.

At the February meeting of the Board of Trustees, Dr. Henikoff announced the appointment of Anthony D. Ivankovich, M.D., as the Gottschalk Professor.

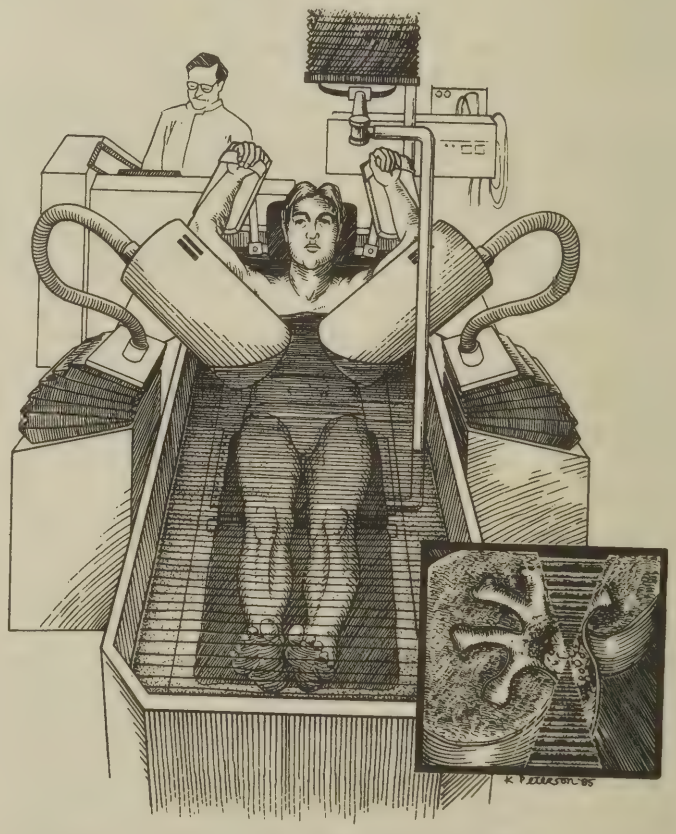
Dr. Ivankovich is professor and chairman of anesthesiology at the Medical Center and directs patient care efforts as well as research and training programs in the department. He was appointed chairman in 1980, and as chairman, is also director of the Rush Pain Center.

Prior to joining the Medical Center staff, Dr. Ivankovich was chairman of the anesthesiology department at Illinois Masonic Medical Center. He was born in Yugoslavia and received his M.D. degree from the University of Zagreb Medical School. Following a residency in internal medicine in West Germany, Dr. Ivankovich came to the United States and completed his anesthesiology residency at The University of Chicago Hospitals and Clinics in 1968.

Dr. Ivankovich has been affiliated with Michael Reese Medical Center and the Shriner's Hospital for Crippled Children, and has held faculty appointments at The University of Chicago, Pritzker School of Medicine; Loyola University, Stritch School of Medicine; the University of Illinois, Abraham Lincoln School of Medicine; and the Cook County Postgraduate School of Medicine. A past president of the Illinois Society of Anesthesiologists, he is the author of two books on anesthesiology and more than 70 scientific papers. Neurosurgical and cardiovascular anesthesia are among his research interests, as well as pain treatment and the development of artificial red blood cells.

In Brief . . .

• Rush-Presbyterian-St. Luke's is the first Chicago-area institution to receive approval from the Illinois Health Facilities Planning Board to purchase an Extracorporeal Shock-Wave Lithotriptor (ESWL). During the procedure, the patient is sedated and immersed in water while sound waves are directed at kidney stones, crumb-



An artist's rendition of the lithotripsy procedure.

(see 'In Brief' on next page)

It's a Girl!

The first baby in Rush-Presbyterian-St. Luke's in vitro fertilization program was born March 14 to Brenda and John Autrey, of Bolingbrook, Illinois. Little Tiffany Lynn, delivered by Cesarean section, weighed 8 pounds, 13½ ounces.

In vitro fertilization is the topic of this year's Alumni Reunion Weekend minicourse, which will be presented, for CME credit, by W. Paul Dmowski, M.D., Ph.D., program director.

In Brief. . . *(continued from page 24)*

ling them into pieces small enough to be excreted in urine. As many as 80 to 90 percent of all patients needing kidney stone removal may be candidates for the lithotriptor, which reduces hospital stays by a week or more. The ESWL will be installed at the Medical Center by the end of 1985.

• In fulfilling its commitment to serve 1.5 million people in northern Illinois, the Rush System for Health is expanding to offer a number of medical care services to employers for their employees through Diversified Health Services, a new, not-for-profit resource of Rush-Presbyterian-St. Luke's. DHS includes the Corporate Health Center, located in One Financial Place, one of Chicago's newest office towers, and several occupational health centers located throughout the city and its suburbs.

• The Pigmented Lesion Center, one of the first of its kind in the Midwest, opened February 1 at the Medical Center. A team of oncologists, dermatologists, plastic surgeons, general surgeons and pathologists evaluate and monitor skin discolorations which precede or indicate melanoma, the most fatal type of skin cancer. Photographic records, regular follow-up appointments and patient education help the team of specialists diagnose melanomas in the early, curable stage. The center will also serve as a research base and will teach health care professionals to recognize melanomas and suspicious lesions.

• Physicians, perhaps more than any other group, recognize the devastating worldwide effects of nuclear war and, therefore, have a special responsibility to urge their governments to stop the nuclear arms race, said a team of Soviet and American physicians who visited the Medical Center, February 11 and 12, as part of a 10-day national tour. Spokesmen for the International Physicians for Prevention of Nuclear War, Inc., included Evgueni Chazov, M.D., director-general of the USSR Academy of Medical Sciences, and Bernard Lown, M.D., professor of cardiology at the Harvard University School of Public Health.

• More than 400 psychiatrists, psychologists, social workers and other health professionals met September 21 and 22 in Chicago for the First International Conference on Multiple Personality/Dissociative States. The Medical Center's Department of Psychiatry and the American Society of Clinical Hypnosis co-sponsored the event, which focused on multiple personality disorders, psychogenic amnesia, psychogenic fugue, and post-traumatic stress syndrome. The international faculty of 75 speakers included Cornelia Wilbur, M.D., renowned therapist for "Sybil" and a pioneer in the treatment of patients with multiple personality disorders.

The Medical Center has also established a Dissociative Disorders Program with an emphasis on expanding current knowledge of the causes, manifestations and treatment of dissociative disorders. Up to 12 patients at a time can be cared for in the program, which is the only one of its kind in the country, according to Bennett G. Braun, M.D., director.

• The Department of Therapeutic Radiology has dedicated a new hyperthermia unit. Under this method of cancer treatment, tumorous tissue is heated to 43 degrees Celcius or higher while surrounding normal tissue is heated at lower temperatures. Candidates for hyperthermia are patients who have already undergone surgery, radiation therapy and chemotherapy. To date, the unit shows an overall 40 percent complete response rate (no gross tumors appearing in the treated area for at least three months).

• The Medical Center's Section of Medical Oncology provided leadership to the Illinois Cancer Council in the NCI Biological Response Modified Program Master Agreement competition, enabling the council to win two of five awards. The awards will bring more than $125,000 to Rush Medical College and the oncology section over the next 12-15 months for cancer research studies with Interleukin-2.

• More than 250 representatives of high technology and biotechnology firms and university and medical researchers took part in a January 15 presentation on the Chicago Technology Park. Rush-Presbyterian-St. Luke's and the University of Illinois have formed a joint venture not-for-profit corporation to operate the park, which was established last year to encourage the development and expansion of high technology and biotechnology in the Chicago area. A focal point of the park will be the three-story "incubator" facility where new ideas will be "hatched" and funneled into commercial markets.

Class Notes

1924

Arthur J. Atkinson is still seeing patients in his office at the Prudential Plaza in Chicago. He's published a number of scientific articles and is especially proud of his son who is professor of clinical pharmacology at Northwestern University Medical School.

1925

Mayo M. Anderson is retired from the practice of internal medicine. After several years of world traveling, he and his wife are comfortable and content at home in Evanston. Healthy and active, he enjoys nature walks and wood carving.

Paul M. Ellwood retired from full-time general practice in 1973, but then began part time at West Oakland Health Center in Oakland, California, where he worked until three years ago. Prior to that, he was director of the Arthritis and Rheumatism Foundation and president of the Academy of General Practice. He's received many honors in recognition of his medical and civic activities. His son, Paul Jr., is an expert in medical economics who is nationally recognized for coining the term HMO - health maintenance organization.

Americo C. Serra returned to Puerto Rico after medical school. He served an internship and residency at the Presbyterian Hospital in San Juan, Puerto Rico, and, for the next 40 years, worked for the Puerto Rican government. The last 10 of those years were spent in the organization and opening of the Ponce District Hospital (a 500-bed general hospital, the largest and most modern on the island at that time). He was the hospital's first medical director and director of medical education. Upon retirement in 1977, he was honored by the institution with a "magisterial" lecture in medical education in his name, to be delivered yearly. He and his wife, Angelica, have two sons; one a lawyer and the other a physician. Americo's hobby is listening to classical and operatic music. Of his years at Rush he writes, "I am and will always be very proud of being an alumnus."

1926

Angus C. McDonald retired as a general surgeon in September of 1968. He lives in Downey, California, and is "still healthy!"

1927

Jessie M. Bierman received a 1984 Professional Achievement Citation from The University of Chicago Alumni Association. She has focused on maternal and child health care throughout her career, serving as chief of maternal and child health in the World Health Organization, director of Crippled Children's Services in California and director of maternal and child health with the Montana State Board of Health. Her many publications include the influences of family stability, education stimulation and emotional support on child health development. Jessie was professor of maternal and child health at the University of California at Berkeley and has received honorary degrees from both the University of California and the University of Montana. She is also a recipient of the American Public Health Association's Martha Eliot Award.

1929

Mildred E. Nordlund retired in 1976 and has moved to Santa Barbara, California. In December, 1983, she had five-way bypass surgery. "Thank God," she writes, "for health and strength to enjoy life."

1934

Most of the following notes have been condensed from information submitted for the Class of '34 Memory Book, compiled last spring for the 50-year reunion.

John L. Anderson lives in Palo Alto, California where, since retirement, he golfs, goes fishing and gardens.

David H. Appelman was an attending in medicine at Brookdale Hospital and director of medicine at Kingsbrook Jewish Medical Center, Brooklyn, New York, until 1973. He's been practicing internal medicine, with a special interest in cardiology and diabetes, in Sunrise, Florida, since then. David is a member of the AMA, the Broward City Medical Society, an associate member of the Kansas City Medical Society, the ADA, and the New York Diabetes Association. He and his wife, Shirley, have two children, Robert, a radiologist in Hollywood, Florida; and Eleanore, married with two children. Golf and poker provide his spare time amusement.

Samuel S. Blankstein, who has been practicing ophthalmology in Milwaukee since 1938, is the former head of ophthalmology at Mount Sinai Medical Center and Milwaukee Children's Hospital. Board certified in 1942, he's a clinical professor in ophthalmology at the Medical College of Wisconsin, a fellow of the American Academy of Ophthalmology, a former president of the Milwaukee Ophthalmology Society and Section of Ophthalmology, and a member of the State Medical Society of Wisconsin. Samuel won first place for his written examination for internship at Cook County Hospital, 1933-34. Collecting early American art and Chinese export (trade) porcelain are among his interests.

Bernard M. Blum received his master's of public health, magna cum laude, from the Harvard School of Public Health. He's held several administrative positions with

the New York State Department of Health, and also served with the New York City Department of Public Health as chief administrative officer for all localized health services for a population of 750,000. He was the U.S. Army's chief health officer in Oak Ridge, Tennessee, and chairman of the health division of the Health and Welfare Council of Philadelphia and vicinity. Bernard is board certified in preventive medicine/public health and in psychiatry/neurology. He's a fellow of the American Public Health Association and member of the Royal Society of Health, London. He served four years as chairman of the Utilization Review Committee at the Philadelphia Psychiatric Center and as president of the Pennsylvania Academy of Preventive Medicine. Author of numerous articles in the *American Journal of Public Health, Philadelphia Medicine,* and other journals, he still finds time for music, theater and travel.

Edward (Red) G. Bourns claims a cash income of $1,850 for his first year in practice. "Started as a general practitioner working part time in an orthopedic clinic three days a week, two to five, for 50 bucks a month, then started doing anesthesia. Did at least 50 spine fusion anesthesias in prone position with open drop ether—no endo tubes yet. Toured England, France, Belgium and Germany courtesy of Uncle Sam." Red practiced in Westfield, New Jersey, until 1975, and then moved to Rossmoor Retirement Community in Jamesburg where he lives now. He was active in the Y.M.C.A. for 30 years. Red married Fran in 1932 and together they had four children; one surgeon, one occupational therapist, one teacher and one great housewife. They like their present community very much and Red was very active in it until a "total hip times three (same side—no goofs!)" and two new knee joints slowed him down. He's also been active in county and state medical societies. "Golf, photography (over and under water), scuba and snorkeling, woodworking, reading, spectator sports, CME credits (!), and some local good works" keep him busy.

Thomas P. Butcher was a fellow in surgery at Lahey Clinic, Boston (1941-42), a surgeon in training and later chief of surgery of the U.S. Air Force Regional Hospital, Chanute Field, Illinois (1942-46). In 1946 he went into private general surgery practice in Emporia, Kansas, and became board certified the following year. During the '50s, he was a surgical consultant to the U.S. Army Hospital, Fort Riley, Kansas, and a lecturer in surgery for the University of Kansas Medical School circuit course. He was president of the Kansas Medical Society (1958-59); president, Kansas Chapter of the American College of Surgeons; president and chairman of the Endowment Board of Emporia State University; and governor for Kansas, American College of Surgeons (1961-70). He has been a fellow of the American College of Surgeons since 1941. He lists his hobbies as scientific literature, philosophy, the Flint Hills and the Rocky Mountains.

George D. Cannon, of New York City, has retired from diagnostic radiology. In 1982, he received an alumni citation from The University of Chicago.

Renald P. Ching, semi-retired in ophthalmology, has been living in Hong Kong for the past 40 years. He continues his interest in using acupuncture to treat "incurable" retinal diseases and mentions the violin as his hobby.

Hyman Copleman has been medical director, Eastern Service Dressing Plant, Johnson and Johnson, since 1935 and is still physician and sports medicine doctor for all athletic teams at Rutgers University. He enjoys travel, golf and photography. When he graduated from Rush, Hyman entered private practice in New Brunswick, New Jersey (1934-1942). As battalion surgeon in World War II, he received the Silver and Bronze Stars and the Purple Heart, all with clusters, as well as the Legion of Merit. His practice has been limited to general surgery and sports medicine since 1947. He was elected a fellow of the American College of Surgeons (1950) and the International College of Surgeons (1971). He was appointed clinical associate professor of surgery at Rutgers Medical School in 1970. He's the recipient of the 1983 Torch of Liberty Award by the Anti-Defamation League of B'nai B'rith and is active in United Jewish Appeal and Israel Bonds. He is now serving on the governor's council for physical fitness and sports medicine in the state of New Jersey.

Elizabeth S. Ellis, retired from psychiatry, lives in Alexandria, Virginia, where she now likes to read, play scrabble and watch PBS programs on TV. Elizabeth shared some memories with us: "Before I studied medicine, first at the University of Wisconsin, Madison, and then at Rush, I had a job I enjoyed, working in New York City for an agency that placed children for adoption." Elizabeth visited the homes of prospective foster parents and made notes on the home, father's occupation, and later interviewed the pastor of the family's church and references from their communities. She would then return to her office and dictate her findings to a stenographer (later on discs). Briefly summarizing her career, she writes, "I was in private general practice with the late Dr. Mary B. Carr, of Jersey City, New Jersey (1936-37). Joined an agency, got a job at the Allentown State Hospital, Pennsylvania, from 1937-1946, and then transferred to the VA hospital in Perry Point, Maryland."

Robert D. Fairchild entered a rotating internship at Detroit Receiving Hospital upon graduation from Rush. After a year's internship, he became a resident in orthopedic surgery there. In October, 1935, Robert became a fellow in general surgery at the Mayo Foundation and remained in Rochester, Minnesota, until October, 1939. While there, he earned a Master of Science Degree in surgery from the University of Minnesota. In 1939, he opened a general surgery practice in Syracuse, New York. He holds the title of emeritus clinical professor of surgery at the State University of New York Upstate Medical Center. In addition, he has been on staff at the university hospital and the three community hospitals in Syracuse, served as chairman of the board of the local Blue Shield and as a board member of the local Blue Cross, and participated in health planning for the county. At age 65, he decided he would no longer practice operative surgery

A Look at the Past and . . .

Stanton A. Friedberg, M.D. '34, chairman of the Alumni Association Library Committee, explained the history of Rush Medical College to orthopedic surgeons in the North American Traveling Fellowship program and showed them the collection in the Rare Books Room of the Rush University Library. **Steven Gitelis, M.D. '75** (standing, right), newly appointed director of the Section of Orthopedic Oncology at Rush-Presbyterian-St. Luke's who was himself a fellow last year, coordinated the visit to the Medical Center.

and became a medical administrator in utilization review for a community hospital and two nursing home facilities. He writes that he is interested in Rush Medical College's progress: "I am so pleased that Rush has now become a full-fledged medical school with an outstanding educational, research and service program."

Albert A. Frank, semi-retired from pediatrics, lives in Malden, Massachusetts. He is emeritus chief of pediatrics at Malden Hospital and emeritus senior associate physician of medicine at Children's Hospital Medical Center, Boston. With wife Bernice, he has one son, Robert, one daughter, Hannah, and one granddaughter, Miriam. He likes to read, walk and golf.

Stanton A. Friedberg reminisces about the Medical Center's past. "The impact of the Rush demise in 1942 was blunted by the onset of World War II. After returning from a South Pacific exposure (non-Michener type), we found the trustees of Presbyterian Hospital interested in restructuring that institution in order to perpetuate the Rush tradition, this time in affiliation with the University of Illinois. The union of Presbyterian and St. Luke's hospitals in 1956 marked the emergence of James A. Campbell, M.D., . . soon thereafter was born the idea for a revival of Rush Medical College and subsequently came the establishment of Rush-Presbyterian-St. Luke's Medical Center." He notes that as the 150th anniversary of Rush's charter approaches in 1987, we cannot ignore the formidable economic problems now confronting medical education and the nation's health. "Those of us on the sidelines after a lifetime of fulfilling medical effort will observe with objectivity and interest, but with full confidence, that Rush will continue in its traditional leadership role." Now semi-retired from otolaryngology, Stan is also interested in old medical books, forestry in southern Wisconsin and music.

Mary C. Gatewood has been married since 1939 to Marion G. Fisher, M.D., of Western Reserve College of Medicine. They have two daughters and live in Oberlin, Ohio, where Mary, now retired, pursues her many hobbies, "mostly nonmedical."

Maurice J. Golden established a multispecialty group practice in suburban Chicago 28 years ago. That group is still growing. Maurice has an active gyne practice—office and surgical; he stopped obstetrics three years ago. He's "emeritus in all medical societies" and got his 50-year plaque and pin from the Illinois Medical Society this past April. His interests include stamps and porcelains.

Max D. Goldman was in general practice from 1934-1956 and then went into proctology until May, 1971, when he retired. He lives in Hollywood, Florida, where he likes to take long (6½ miles) walks daily.

Milton Goldman, semi-retired in dermatology, writes: "In my clinical work I have always attempted to look beyond the skin and into the patients: their heredity, their environment, their lifestyle, and their chemical metabolism, in addition to the physical findings. My dermatological patients are routinely given a gown and instructed to disrobe for a complete dermatological exam even though the entering complaint was hand eruption. On subsequent visits, it is desirable to learn as much as possible about the patient and his or her lifestyle. Thus one can pursue therapy most intelligently." His research interests have included edema as an etiological factor in dermatoses and uric acid in the etiology of psoriasis. Poetry, photography, real estate and nature study occupy his free time.

Vida Hildreth Gordon received an M.P.H. from Johns Hopkins University in 1941. In 1933-35, she interned at Chicago Municipal Contagious Disease Hospital and at Los Angeles County Hospital in California. She served a pediatric residency at the University Hospital, Ann Arbor, Michigan, and was a research fellow in immunology at Children's Hospital of Pittsburgh. She is certified by the American Board of Pediatric Allergy (1946), the Subspecialty Board of Pediatric Allergy (1960) and the American Board of Allergy and Immunology (1982). In

1981 she was named "Arkansas Pediatrician." She is the author of 28 publications and a member of a number of professional societies; she was instrumental in organizing both the Arkansas Chapter of the American Academy of Pediatrics and the Arkansas Allergy Society. Vida is now professor emeritus of pediatrics and associate professor, microbiology, at the University of Arkansas School of Medicine, where she had served as director of the Allergy-Immunology Training Program from 1964-1975. Prior to that, she worked in public health in Michigan and as director of the Arkansas Crippled Children's Division, 1943-45. She is now an allergy consultant in the general pediatric clinic at the Children's Care Center of Arkansas Children's Hospital. Her list of hobbies includes travel, learning Spanish, sewing, part-time medical teaching, and Arkansas Medical Review Board for the next three years.

George F. Gsell is now retired from ophthalmology and free to pursue reading and golf. His work in general ophthalmology extended from 1935-80. He was in the U.S. Air Corps from 1942-46; a founding partner of the Wichita Clinic in 1948; president of the Sedgwick County Medical Society, 1962; and president of the Kansas Medical Society, 1967-68. He also represented Kansas to the AMA as a delegate from 1952-68.

Richard E. Heller, prior to World War II, taught surgery and surgical anatomy at Northwestern University Medical School and worked in surgical clinics at Northwestern and at Michael Reese Hospital. At the same time he was also involved in research at both places. During the war he was assistant chief and then chief of an evacuation hospital and saw duty in North Africa, Sicily and Italy. Afterwards he became a senior attending surgeon at Northwestern Memorial Hospital where he was active in the care of trauma cases; he was also an associate attending surgeon at County and a consulting surgeon at Hines V.A. Hospital. In 1972, he had a coronary while in London and, in 1979, had bypass surgery at Rush-Presbyterian-St. Luke's. Dick retired from active practice in 1976 but still teaches anatomy at Northwestern and has also been involved in several basic science research problems. "Medical education continues to be my major interest," he says. "It keeps me alert, involved and useful." He and his wife, Ruth Moss Heller, (whom he courted during the years at Rush), have one child, Richard Moss Heller, who is chief of pediatric radiology at Vanderbilt University Medical School. "There are two grandchildren who are a great joy."

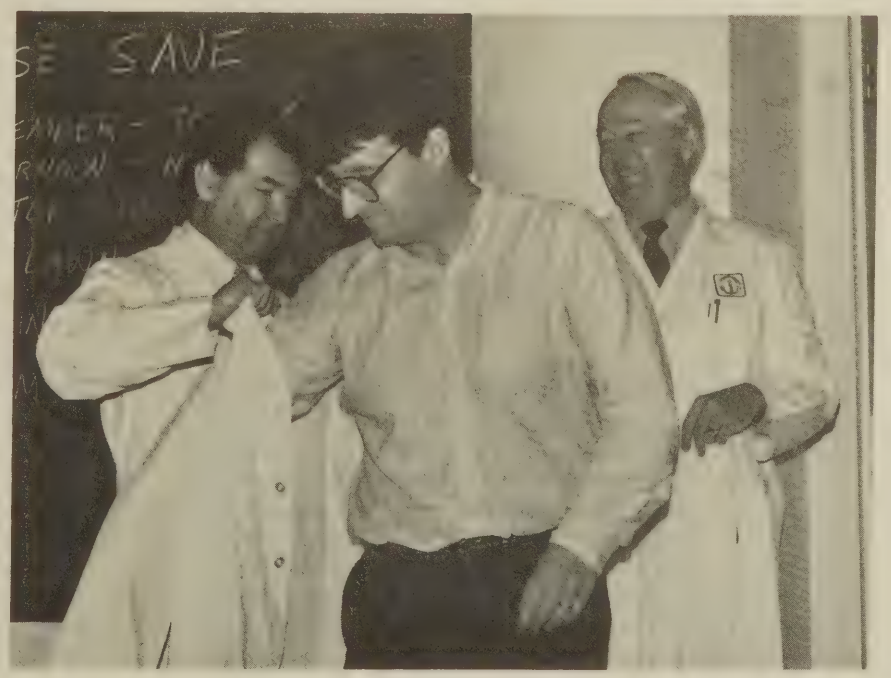
Jack Hoekzema, of Bellflower, California, is still active in family practice, as he has been for the past 48 years. "Delivered over 3,000 babies and also involved in office medicine, hospital medicine and hospital and office surgery." With wife, Anne, he has three sons: Allan, in orthopedics in Grand Rapids, Michigan; Curtis, artist and art teacher, Venice, California; and Loren (Ph.D), Princeton University Press. Jack likes to spend his spare time gardening California flowers.

William J. Holmes is retired from ophthalmology, having been involved in "prevention of blindness around the world." He now swims and travels.

Helen Holt is retired from ophthalmology and now enjoys "my home with the many pleasures it brings, flower gardens, sewing and piano." After graduation from Rush, she spent 18 months at Cook County Hospital as the only woman intern during that period. After postgraduate work in ophthalmology under Dr. Stanford Gifford at Northwestern Medical School, she began private practice in Chicago and Highland Park in 1936, retiring in 1977. "Throughout these many years I was on the staff of the department at Northwestern, attending in the clinic, teaching and aiding in the training of residents." (Editor's note: Helen will also be retiring from

. . .With Anticipation of the Future

One hundred twenty first-year students were welcomed into the medical profession during the traditional white coat ceremony in September. Leo M. Henikoff, M.D., president of the Medical Center, and Henry P. Russe, M.D., dean of Rush Medical College, who together did the honors, are pictured here with William Janazin.



the Alumni Association's Executive Council in June after many years of exemplary service and leadership. She will be missed.)

Francis W. Huston interned at the Iowa Methodist Hospital, Des Moines, and, in the past 49½ years, has been active in family practice in Winchester, Kansas, where he is affiliated with the Jefferson County Memorial Hospital. He and his wife, Zetta, have seven children, all college graduates including, in the field of medicine, an orthopedist, a registered nurse and an occupational therapist. Besides his still-active practice, his interests are farming and family.

Milton M. Kardon is still active in occupational medicine. He was in general practice (1936-42) and then worked in the U.S. Public Health Service Quarantine Division until 1947. That year he went into private practice (compensation medicine) until 1971, when he returned to the USPHS (occupational medicine). He likes to fish, swim and spend time with his wife, children and grandchildren.

Abraham R. Koransky is semi-retired from dermatology and lives in Morton Grove, Illinois. His residency in dermatology was from 1941-42, and for the next three years he served as a captain in the U.S. Army Medical Corps. Abraham has been practicing in Chicago since 1946.

John L. Lindquist, retired from general surgery, lives in Sunnyvale, California, where he reads and studiesforeign languages, classical music and opera.

Loyd J. McCormick is semi-retired from general practice and emergency room medicine. He was in the Medical Corps during World War II, Europe Third U.S. Army (1942-45). "Tried retirement in 1974, but didn't like it," he writes. "I had an opportunity to do emergency medicine at a local hospital, and it has been very enjoyable." He lives in Moline, Illinois, where he likes to read and fish in his off hours.

Alton J. Merrick interned at Kansas City General Hospital from 1933-34 and was in the U.S. Army Medical Corps, Field Artillery Battalion, from 1941-45. He practiced internal medicine in Fremont, Nebraska, until he retired in 1979. He writes, "Most notable accomplishment: production partner in creation of two physician sons—a great improvement on the original—Dr. David K. Merrick, Boise, Idaho, and Dr. Thomas A. Merrick, Denver, Colorado." Reading and spectator sports are among his hobbies.

James W. Merricks, Jr., was in private practice in urology, mostly in group and also taught at both Rush and the University of Illinois. He served as the head of urology at Highland Park Hospital from 1970-82, and as secretary-treasurer and president of the Alumni Association of Rush Medical College (1960-70). Jimmy founded Medical Cinema, and is the CEO of MERRI-MED CINE Productions, which has produced more than a dozen urologic and surgical movies. Several have won significant awards, including a gold medal at the Brussels (Belgium) 1958 World's Fair for the research and clinical film on the ileo-cecal continent substitute urinary bladder. Most of these films were distributed through the American College of Surgeons Film Library. James has been involved in research on endoscopic visualization and drainage of the diseased seminal vesicle and studies in urinary diversion with the development of the continent ileo-cecal substitute bladder. Now retired, he enjoys photography, agronomy and stamp collecting.

Ernest B. Miller completed his internship and residency in internal medicine at Henry Ford Hospital in Detroit and then moved to Manistee, Michigan, where he continued to practice until retirement in 1970. He now spends nine months in Florida and three in Michigan. He has three children. One son is a board-certified internist and cardiologist; the other, a dental surgeon. His daughter taught children with learning disabilities and is now married to an electronic engineer. Ernest likes to golf, travel and play bridge.

Edwin P. Neckermann writes, "I just did my job. I wouldn't trade those experiences. There were 'giants on the earth in those days'—Carlson, Luckhardt, Post, Woodyat, Kretschmer, Paul Canon, and so on, ad infinitum." Now retired, Edwin reads the classics, restores furniture and rebinds books in Elmhurst, Illinois.

Kenneth R. Nelson, semi-retired from pathology/clinical pathology, lives in Washington, D.C., with his wife, Mary, R.N. (1932 graduate of Presbyterian Hospital School of Nursing). "I have had a splendid and greatly valued 50 years of practice and life with travels and endless memories. . .," he writes. Parents of three and grandparents of four, Kenneth and Mary celebrated their golden wedding anniversary November 12, 1983. He continues CME and pursues music, travel and photography in his spare time.

Bryce K. Ozanne interned at Washington Boulevard Hospital under Professor Ralph Waters. During World War II, he served as an anesthesiologist in the U.S. Army (attached to Tilton General Hospital at Fort Dix, 64th Field Hospital in France and Germany, and 50th General Hospital in France). He also taught and practiced for one year at the University of Utah, Salt Lake City. Semi-retired from his anesthesiology practice in Moline, Illinois, he sails, goes cross-country skiing and has fun using his personal computer.

McKinnie L. Phelps was a resident in anesthesiology at Bellevue Hospital, New York City. He then practiced anesthesiology in New York for four years (1942-46) before moving to Denver, where he continued to practice until retirement in 1971. He now lives in Sun City, Arizona, spending his free time studying history, archeology and lapidary.

Robert W. W. Phillips interned at Chicago's Swedish Covenant Hospital and served a residency in obstetrics/gynecology at Presbyterian Hospital before establishing his practice in Wheeling, West Virginia. He was also affiliated with Ohio Valley Hospital, where he served on the

surgical staff for 30 years. Retired in 1963, he moved to Florida seven years later, and his wife of 36 years, Marion Echles, died shortly thereafter. Robert married Elizabeth Snedeker Foraker in 1973. Over the years he's enjoyed many sports, particularly golf—"I've had a hole-in-one six times," he writes. Active in the Masons, he has been a Jester and Shriner. He lives in an oceanfront condominium in Fort Lauderdale and enjoys golf, deer hunting and bridge.

Margaret Posey is still active in family practice in Cincinnati, Ohio. Travel and stamps occupy some of her free time.

Roger S. Thompson journeyed to Seattle for an internship at Swedish Hospital in 1933 and then trained for six months in x-ray therapy. "With school debts and a depression in full swing, refuge was found in the Army Medical Corps for three years." After that, six months at the Coulee Dam Construction Hospital and a four-month "taste" of Alaska. Except for five years in the Air Force during World War II and two years during the Korean War, he's remained in general practice in Seattle since 1938. He remained in the Air Force Reserve until retirement as a colonel in 1969. Ten years ago the local chamber of commerce honored him with the "100 Percent Award for Professional Achievement and Dedicated Humanitarian Service." His practice is now limited to "medical aviation activities" and he has some time for traveling and reading.

James W. Tobin went into practice in 1935 with his father, **J. R. Tobin, Class of 1901.** His brother, **Paul Tobin, Class of '35,** joined him two years later. "The years before World War II were difficult as we did all kinds of things in general practice. The depression was still on, medical fees were low and collections were difficult." He was able to get more training in general surgery and urology during 4½ years in the U.S. Army and three years overseas in India and China. He quit major surgery two years ago, "mostly because of excessive malpractice insurance fees," but is still practicing geriatrics in the same office he started in 40 years ago. Jim has also been a senior Federal Aviation Association medical examiner for the past 20 years. He celebrated his 43rd wedding anniversary with his wife, Margaret, last year. Golf and boating on Fox Lake in Illinois are his leisure activities.

Craig C. Wales interned and was a resident in medicine at St. Luke's Hospital, Cleveland, Ohio. He's been practicing internal medicine since then in Youngstown, Ohio, except for four years in the U.S. Army during World War II. One of his two sons is an attorney, the other, president of an industrial rubber distributing company. He has six grandchildren. Boating, squash racquets, collecting knives and foreign travel occupy his time when he's not practicing medicine.

Oram C. Woolpert interned at Presbyterian Hospital and was a resident at Chicago Memorial Contagious Disease Hospital. He received a Ph.D. in microbiology from The University of Chicago and is professor emeritus in medicine and microbiology at Ohio State University. Active military duty (1942-46) included one year commanding at First Service Command Laboratory, Boston, and three years directing research and development in biological warfare, Camp Detrick, Frederick, Maryland. He spent six years doing the same in Civil Service. Returning to Ohio State University in 1952, he assumed the position of executive director, OSU Foundation, until retirement in 1963. Thereafter, he engaged in consulting work for a few years. The author of a number of publications, he has been awarded the Benjamin Rush Society Prize and Medal, Ricketts Prize, Sigma XI and Alpha Omega Alpha membership, and the Legion of Merit. He was a colonel in the U.S. Medical Corps Reserve before transferring to the Navy and is now captain in the Navy Reserve Corps (retired). He likes gardening, golf, chess, reading and bridge.

Charles R. Wylie was involved in public health activities until World War II, and then worked in venereal disease control in California and the Philippines. Thereafter, family practice in the West Los Angeles-Santa Monica area occupied his energies. He lives in Leisure Village, Camarillo, California, with his wife and enjoys gardening, fishing and motor home travel.

Theodore N. Zekman interned at Michael Reese Hospital after six months with Dr. Joffe at Cook County Hospital. Encouraged by Dr. Harry Gradle, he went into ophthalmology with residencies at Michael Reese and the Illinois Eye and Ear Infirmary. On completion, he joined Dr. Gradle in practice in Chicago until 1942 when he went into the U.S. Army for four years. On his return in 1946, he entered private practice in Chicago. He served as chairman of ophthalmology at Reese for two years and then as chairman of ophthalmology at County for 10. He became a widower in 1956 and brought up his two daughters. He never remarried and still has an active practice. Hobbies include travel, art collecting and "enjoying the careers of my two daughters—investigative reporter and graphic designer."

1936

Louis Belinson has lived in Largo, Florida, since 1973 and is "busy, well and happy." He is looking forward to the fiftieth class reunion in 1986 and hopes that many of his classmates will be there. His "busiest" activity is membership on the Human Rights Activity Committee of Florida, having been appointed by the governor. He's also involved in a de-institutionalization project.

1937

Lewis Capland was recently named Practitioner of the Year by the Dermatology Foundation. Lewis is clinical professor of dermatology at the University of Miami School of Medicine and a consultant in dermatology at the Miami Veterans Administration Hospital. The Foundation cited him as "the compleat practitioner: a skilled, compassionate, practical physician; and a scholarly, honest, uncompromising volunteer teacher." He was recognized as the "Outstanding Dermatologist of the Florida Society of Dermatology" in 1978 and has received

a certificate of appreciation from the Veterans Administration for 30 years of service.

Joseph H. Schiff had served as medical director of Chicago's Elston Industrial Medical Centers, until this past summer when they became affiliated with Rush-Presbyterian-St. Luke's as occupational health centers under the Medical Center's new Diversified Health Services program.

1942

Vera Morkovin is director of the Michigan State University Clinical Center's Minor Emergency Clinic.

1973

Ronald W. Quenzer is an assistant professor in the Division of Infectious Disease, Department of Medicine, University of New Mexico School of Medicine, as he prepares to become board certified in infectious disease; he is already board certified in internal medicine. After the one-year sabbatical he plans to return to his internal medicine practice in Pratt, Kansas.

1974

Most of the following notes have been condensed from information submitted for the Class of '74 Memory Book, compiled last spring for the 10-year reunion.

Anne Salmon Barone, Ph.D., completed a two-year residency in emergency medicine at The University of Chicago Hospitals and Clinics in 1979. She was board certified in emergency medicine in 1982 and, the following year, became a fellow of the American College of Emergency Medicine. Anne is now chairman of the Department of Emergency Medicine at St. Agnes Hospital in Baltimore, Maryland. Prior to this appointment, she served as director of the emergency department and chairman of the division of emergency medicine at Chicago's Resurrection Hospital. She married Gary L. Barone in 1983.

Tina M. H. Blair is president of the Massachusetts Chapter of the American College of Emergency Physicians, as well as being the Emergency Medicine Board Examiner. She lives in Stoughton, Massachusetts.

Willie C. Blair interned at Georgetown University and was a fellow at the Maryland Institute of Emergency Medical Systems in Baltimore, Maryland. He's now director of the trauma center at Prince George's General Hospital in Cheverly, Maryland. In November, a *Washington Post* feature story spotlighted Willie as chief of the Shock Trauma Advanced Treatment Team at Prince George's. Willie's daughter, Amelia, is 4.

John A. Campbell has been affiliated with the Marshfield Clinic in central Wisconsin since completing a pulmonary fellowship at Northwestern in 1979.

Frank Capizzo has a solo practice in internal medicine and cardiology in Barrington, Rhode Island, and is chief internist at a private psychiatric hospital in Providence. He was recently elected vice president of the Bristol County Medical Association. Married, he lives in Barrington with his wife and two children.

Myron S. Cohen completed residency at the University of Michigan and an infectious disease fellowship at Yale. In 1979, he and his wife, Gail Henderson (a sociologist), and their infant daughter went to the Peoples' Republic of China for six months to help Yale establish exchange programs and grounds for joint research. These experiences culminated in a book, *The Chinese Hospital,* published by Yale University Press. Myron holds joint appointments in medicine and microbiology/immunology at the University of North Carolina. His research has focused on phagocytic cells, and has been both "exciting and productive." Gail is also on the medical school faculty in the department of social and administrative medicine. They now have a second child, a son, "who is anxious to become a world traveler."

Donald J. Corey is an associate professor of medicine at the University of Pennsylvania. He divides his time between private practice and teaching house staff as director of the department of medicine's ambulatory services at Presbyterian Hospital in Philadelphia. His outside interests include the theater, films and sailing.

Craig Dean has been a physician/director of emergency medicine at The Medical Center of Lake County-Condell Memorial Hospital in Libertyville, Illinois, for the past eight years. "I've been privileged to serve as architect in planning and constructing a 10,000-square-foot emergency department on a beautifully landscaped hospital campus," he writes. Avocations include endurance exercise, reading sports medicine journals and developing wellness resources in his community. Craig is a marathon runner, logging more than 24,000 miles since 1979. He has competed in more than 20 marathons internationally and is proud of his thirty-sixth place performance in America's Marathon in 1979. He's the author of numerous articles on sports medicine. "These interests in physical fitness, nutrition and sports medicine have had a very positive effect on my life and lifestyle. This, in turn, has helped provide a continuously revitalized enthusiasm for the spirit in which I practice medicine today. I feel fortunate to have graduated from Rush and even more fortunate to have had the opportunity to practice medicine and face its challenges in the 1980s."

Rudolph F. Dolezal was a general surgery resident at the University of Illinois at Chicago and then spent a year as an emegency room physician in South Haven, Michigan, before entering another residency, this time in otolaryngology, in Ann Arbor. From 1981 to 1982, he served as chief of the division of otolaryngology at the Great Lakes Naval Regional Medical Center before begin-

ning yet another residency in plastic surgery—completed in 1984.

Daniel A. Duran had two more children since graduation, Ben, 7½and Meredith, 9 (daughter, Lisa, is 25 and son, Daniel Steven, 23). After completing an orthopedic surgery residency, he practiced privately in Florida for 1½ years and then moved to Louisville, Kentucky, where he is now chief of surgery at Humana Hospital Southwest.

David R. Everetts is living in Indianapolis where he has a private practice in obstetrics and gynecology.

Scott Geller, after internship in San Francisco, practiced general medicine in Aspen, Colorado, for two years (when he wasn't traveling in Europe or Nepal). "Got somewhat bored with general practice and was lucky enough to land an ophthalmology residency in Detroit," he writes. "Got married to a brilliant, beautiful and rich woman whom I made a house call on in Aspen. Since her family is from Detroit, we breezed through residency and fellowship in grand style. My personality has not changed at all (to the displeasure of many), but my taste is more extravagant and my vices more expensive (much more!)." He boasts one of the first office-based cataract surgery facilities in the country.

Charles W. Graeber is assistant clinical professor at the University of Connecticut in Farmington. He's in private practice in nephrology and hypertension, with an active clinical teaching service of residents, fellows and medical students. "Would be glad to have a Rush student for a month," he adds. Charles and Diann, his wife, have two boys, Charlie, 14, and Matthew, 11.

Richard W. Hart spent two years as a pediatric resident at Michigan State University Hospital in Lansing, and completed a chief residency in pediatrics at St. Francis Hospital in Peoria, Illinois. He then practiced general pediatrics for three years, while covering the neonatal intensive care unit, the pediatric intensive care unit and working in the Midwest St. Jude's affiliate. Moving to St. Cloud, Minnesota, with his wife and family, he joined a group and now practices primary pediatric care. They have three children, Jennifer, 9; Cathy, 6; and Beth, 2. Richard is on the Executive Committee of the Minnesota American Academy of Pediatrics and also chairs the newborn committee.

Marcel Heiferling lives in Los Angeles and is still unmarried. He's been in private general practice all this time, working in various locations and types of practice. "Visited Rush briefly since graduation," he writes. "Things basically seemed the same."

Mark L. Hoefer is in private practice in Mesa, Arizona, specializing in gastrointestinal diseases, and very active in his church, where his brother is pastor. Still married to his "original wife," they've "somehow managed" to have four boys, Samuel, Benjamin, David and Jonathan. "I am enjoying life a great deal," he writes, "and hoping for a chance at missionary work when the kids grow up a bit."

Lawrence Johnson has been married 10 years and has two boys, ages 7 and 9. He's been in private dermatology practice for 4½ years in St. Charles, Illinois.

Harold A. Kessler completed his internal medicine training at Presbyterian-St. Luke's Hospital. In 1977, he served as chief medical resident at Rush-Presbyterian-St. Luke's and completed a two-year fellowship in infectious diseases. Thereafter, he spent 18 months at the London School of Hygiene and Tropical Medicine as a research fellow in the laboratory of Professor Arie Zucherman, studying viral hepatitis. He's now an assistant professor in the departments of medicine and immunology/microbiology at Rush-Presbyterian-St. Luke's. Living in Northbrook with his wife, Andrea, he has two daughters, ages 8 and 6, and twin boys, age 21 months.

Lawrence F. Layfer is assistant chairman of medicine at Rush Medical College and director of medicine at Sheridan Road Hospital. He's also the rheumatology editor of the *Illinois Medical Journal.*

Doris McCulley, the new medical director of Provident Hospital in Chicago, was featured in an August 22 article in the *Chicago Daily Defender.*

Walter E. Meyer III has been busy with "residency, fellowship and having children." He is in private practice and also teaches gastroenterology in Huntsville, Alabama.

Bruce R. Monaco completed a sports medicine fellowship in 1978. Board certified in orthopedic surgery, he is also a fellow in the American College of Surgeons. Bruce lives in Downers Grove, Illinois, and has a private practice in Chicago.

Stephen Mueller interned at Chicago's Northwestern Hospital, and completed a psychiatric residency at Loyola Hospital, Maywood. Having "always loved Colorado," he joined the Mental Health Center in Colorado Springs and last year, after passing the boards in psychiatry and neurology, entered private practice. His orientation is toward hospital psychiatry and psychopharmacology, as well as psychotherapy. He writes: "Rush is lucky to still have two leaders in the field of psychiatry after 10 years, Jan Fawcett, M.D., and James Cavanaugh, M.D." Stephen and his wife, Mary Ellen, have three boys, Matthew, 9; Michael, 8; and Mark, 3. Mary Ellen has coached three years of first place Little League baseball teams while Stephen enjoys running, including the Pikes Peak Marathon, and climbing Colorado's 14,000-foot peaks. "I've done half of them now—(53 total). Helps me keep my sanity!"

Ronald D. Nelson, past president of the Alumni Association, has moved to South Bend, Indiana, where he practices cardiology. "Delighted to return to a part-time teaching/administrative role," he is director of the transitional residency program for Memorial Hospital of South Bend. Prior to that, he completed internal medicine training at Rush-Presbyterian-St. Luke's and practiced general internal medicine in Seattle for 2½ years before

Special Thanks

Allan O. Muehrcke, M.D. '79, recently presented his family's gift of nearly $120,000 in support of the Muehrcke-Kark Chair of Nephrology to Leo M. Henikoff, M.D., president of the Medical Center. Roger E. Bone, M.D., chairman of the Department of Internal Medicine, was also on hand.

Dr. Muehrcke's father, Robert C. Muehrcke, M.D., established the named professorship in 1981 as a tribute to his teacher and mentor, Robert M. Kark, M.D., senior attending at the Medical Center. Allan's father is consulting physician in internal medicine at Rush-Presbyterian-St. Luke's and senior attending and director of medical education at West Suburban Hospital Medical Center, Oak Park, Illinois. Two of Allan's brothers, **Robert** and **Derek,** are also alumni of Rush Medical College (**Class of '79** and **'83,** respectively), and his wife, Gail, is a graduate of the Rush University College of Nursing.

The Muehrcke Family's initiative in establishing this professorship was recognized as one of the cornerstones of the "Campaign for the Future of Success."

returning to Rush for cardiology training. He was recently elected a fellow in the American College of Cardiology. He and his wife, Florrie, have two daughters, Jennifer, 6, and Christina, 5.

Jack C. Nichols II spent the first five years of the last 10 completing an orthopedic surgery residency at Rush-Presbyterian-St. Luke's. After that, he started private practice in Redding, California, with his dad as his partner. Board-certified in orthopedics in 1980, he was inducted into the American Academy of Orthopedic Surgeons last year. "Personally, my wife, Pat, and I have been raising four kids and enjoying outdoor activities near our house."

Michael R. Peck interned and was a resident in internal medicine at D.C. General Hospital in Washington, D.C. After a nephrology fellowship at Boston V.A. Hospital, he went into private practice. "Married to the same person for 10 years and have three boys, ages 6, 2 and 1."

Michael Pinzur is a member of the Department of Orthopaedics and Rehabilitation at Loyola University Medical Center in Maywood, Illinois. In full-time academic practice, he has a special interest in surgical rehabilitation of adult-acquired hemiplegia, especially in stroke patients. In the laboratory, development of a simple, inexpensive system to do gait analysis and walking electromyography is underway. In addition, he is studying prosthetic ligament or tendon replacement.

Rita O. Pucci trained in general surgery at Rush-Presbyterian-St. Luke's and also received an M.S. (surgical science) from the University of Illinois Graduate College. She spent a year, from 1979-80, as surgeon at St. Mary's Hospital, Vunapope, East New Britain - Papua, New Guinea. Since then she has been in private practice with privileges at Grant, Augustana and Henrotin Hospitals. She is also coordinator of students and residents at Grant Hospital; assistant professor at Rush; and this past year was made medical director of the Reach to Recovery program of the American Cancer Society Chicago Unit.

John R. Schmitt has assumed the 34-year practice of Edson Rupp, M.D., the first internist in Royal Oak, Michigan. He had brought his own practice from Birmingham, Michigan, to join Dr. Rupp several months before Dr. Rupp's retirement. John married Mary Cloutier in 1976 and they have two children, Matthew, 7, and Emily, 5.

Paul Schoenfeld interned at Cook County Hospital for a year and then joined The National Health Service Corp which sent him to northern Wisconsin where he stayed for 3½ years beyond his assignment. "By then it seemed wise to finish training," so he trained in medicine at Christ Hospital and ultimately went on to a fellowship in cardiology at the University of Wisconsin, where he is now.

David A. Sperling completed a residency in psychiatry at the Institute of Living, Hartford, Connecticut, and received a research award for a paper on anorexia nervosa. After board certification, he opened a private practice and completed a Freudian psychoanalysis. He served part time as assistant professor of psychiatry at the University of Connecticut Medical School, as well as supervisor of psychiatry at Mt. Sinai Hospital and the Institute of Living. He was a member of the field trials for the new diagnostic psychiatric classification DSM-III, a book reviewer for *Psychiatric Annals,* and a member of the Private Practice Committee of Connecticut Psychiatric Society. His wife of 18 years, Sharon, earned a master's degree in social work from Smith College and now works on an adolescent psychiatric unit. They live in Avon, Connecticut, a Hartford suburb, on the side of a mountain where deer and raccoon visit frequently.

Alain J. Taylon finished his internal medicine residency at Creighton University Hospitals and went to Richmond to study endocrinology at the Medical College of Virginia. He's board certified in both. He moved to Tulsa, Oklahoma, in 1980 and, after a couple years in group practice, "went solo" in his two specialties. He has a clinical appointment to the volunteer faculty of the University

of Oklahoma Tulsa Medical College and teaches residents and medical students. He and his wife were married in November, 1982. "We like Tulsa and enjoy life here."

Leonard Weather, Jr., completed his internship and residency at Johns Hopkins University Hospital and then moved to New Orleans where he established a private practice in obstetrics/gynecology and infertility. He is also an instructor in obstetrics/gynecology at Tulane University College of Medicine, associate professor at Xavier University College of Pharmacy, director of the CHEF Women's Clinic and vice president of the Bayou Federal Savings and Loan Association, as well as a member of its board of directors. His previous appointments include chairman of the medical committee at the PUSH National Convention in New Orleans, chief of obstetrics/gynecology at New Orleans General Hospital, chairman of the medical committee of the NAACP National Convention in New Orleans, and president of the Chi Delta Mu medical fraternity.

Curtis Whisler finished an orthopedic residency and has been in private practice in Chicago for the past five years.

Daniel J. Wilson was an internal medicine resident and hypertension-nephrology fellow at the Cleveland Clinic Foundation in Ohio, and stayed on for a year of clinical research during which time he also held a staff appointment. He then moved to Winston-Salem, North Carolina, and is now an assistant professor of medicine, nephrology-hypertension section, Bowman Grey School of Medicine. Now conducting research on hypertension and renal diseases, he also maintains a private practice and teaches at the medical school. He and his wife, Donna Marie, have two daughters, Tammy and Jennifer. He writes, "we travel frequently in an attempt to discover the South and the heritage that surrounds us." Computers and Atlantic Coast Conference basketball are his new hobbies.

1975

Glen O. Gabbard is section chief at the C. F. Menninger Memorial Hospital in Topeka, Kansas, where he also serves on the faculties of the Topeka Institute for Psychoanalysis and the Karl Menninger School of Psychiatry. He recently graduated from the Topeka Institute for Psychoanalysis and has written a book focusing on syndromes of altered mind/body perception called *With the Eyes of the Mind.*

Can You Help Us Find These Alumni?

The Alumni Office has been unsuccessful in tracing the current whereabouts of the following Rush graduates. If you know where they are, please pass the information along so we can keep them on our active mailing lists.

Class of 1974
Leon L. Bernhardt, M.D.
Arthur M. Hoffman, M.D.

Class of 1975
Maurice Scott III, M.D.

Class of 1976
Lawrence Proano, M.D.
Marvin L. Santos, M.D.
Thomas Trobe, M.D.

1977

Thomas Bleck is an assistant attending physician and an assistant professor of neurological sciences and internal medicine at Rush-Presbyterian-St. Luke's. His research focuses on epilepsy and critical care neurology.

1978

Robert Rotering has received board certification in general surgery. After completing his surgical internship at the Mayo Clinic, Robert took his residency in surgery at the University Hospitals in Salt Lake City, Utah, and completed an additional fellowship during which he became the first surgical resident in the United States to be fully trained in laser surgery. Upon completion of his chief residency, he was honored by the 1984 University of Utah graduating medical school class with their Outstanding Resident Teacher Award. Robert has published extensively in his research field of laser surgery and diversely in the fields of science, humanities and the arts, including several books. He currently makes his home in New York where he is specializing in cardio-thoracic surgery.

Richard C. Sadove, a resident in plastic surgery at the Eastern Virginia Graduate School of Medicine, won first prize in The Educational Foundation of the American Society of Plastic and Reconstructive Surgeons 1984 Scholarship Contest. The award is in recognition of his research which involved facial deformity in children with cleft lip and palate. His investigation used objective evidence to confirm old theories of the etiology regarding facial deformity in children with cleft lip and palate. In addition, it provided new methods for analyzing the deformity of the external nose and new surgical guidelines.

1980

Bruce H. Campbell will finish his ENT residency in June and then plans to start a head and neck surgery fellowship at M.D. Anderson Hospital in Houston, Texas. Son Daniel (born 10/27/83) "is expecting a sibling this summer," he adds. "I'm looking forward to the five-year reunion."

Margie Mintz Rosenbaum writes, "Life has begun! Residency over! Practicing dermatology and having some fun with the crew: Bob, Michael (4) and Sara (2½)."

Medical Center Alumni

Cecil A. Raymond (House Staff, 1924-25) is retired in Sun City, Arizona. He interned on the Haney Ob/Gyn service and even though "I didn't graduate from Rush" he

writes, "I think it's a wonderful school. With the buildings added since 1924, "it's really something to be proud of."

David F. Eubank (House Staff, 1950-51) is in his thirtieth year of practice in pediatrics at the Raytown Clinic in Raytown, Missouri.

Salwa Asaad (House Staff, 1977-80) is a board-certified radiation oncologist at St. Mary's Hospital in Kankakee, Illinois. The hospital recently installed a linear accelerator for cancer treatment and Salwa heads a group specially trained to make use of the state-of-the-art technology within the radiation therapy program. Diagnostic information for treatment is checked on a computer shared with Rush-Presbyterian-St. Luke's.

A December 9, 1984, article in the *Chicago Sun-Times* featured **Gerald Horn** (House Staff, 1977-81) who developed an erbium laser to remove secondary cataracts, while minimizing risk to the retina.

In Memoriam

Since the last issue of the *Record*, the Alumni Office has been informed of the deaths of the following alumni. We extend sympathy to the surviving families and friends of these Rush graduates.

Herman O. Weishaar, M.D. '18, of Evanston, Illinois, on March 7, 1984.

William R. Hunt, M.D. '20, of Costa Mesa, California, on October 27, 1983.

Edmond F. Foley, M.D. '21, of Crystal Lake, Illinois.

Clarence W. Rainey, M.D. '23, of Sarasota, Florida, on January 29, 1984.

George A. Barnett, M.D. '23, of Grand Rapids, Michigan, on July 11, 1984.

Zacharias "Jack" T. Bercovitz, M.D. '24, of La Jolla, California, on December 3, 1984.

Dr. Bercovitz, a specialist in gastroenterology and tropical diseases, spent 10 years as a medical missionary in Korea after graduating from Rush Medical College. He served as a consultant on tropical diseases for Ellis Island and the Department of Laboratories of the New York City Health Department. He was chief of medicine at the U.S. Army Hospital in San Juan, Puerto Rico, during World War II, and later earned the rank of lieutenant colonel while serving in the jungles of northeast India. He moved to La Jolla, California, in 1960 and served on the staff of Scripps Memorial Hospital, Sharp Memorial Community Hospital and Mercy Hospital until he retired at age 80. Dr. Bercovitz is survived by his son, Tim; and daughter, Dr. Mary Bercovitz Fohlin.

Harold E. Smith, M.D. '24, of Elmhurst, Illinois, on September 23, 1984.

A specialist in obstetrics and gynecology, Dr. Smith was honored in 1974 for delivering more than 8,000 babies in 50 years of service at Westlake Hospital in Melrose Park, Illinois. He interned at West Suburban Hospital in Oak Park and completed his residency at Cook County Hospital. He was a clinical instructor for several years at Illinois Medical School and an attending gynecologist for 10 years at Kankakee State Hospital. He was named an emeritus staff member at Westlake in 1976. Dr. Smith is survived by his wife, Helen; son, Dr. Hugh Smith; daughter, Marilyn Steele; and sister, Irene Glosser.

Lois Dixon Greene, M.D. '26, of Hendersonville, North Carolina, on November 8, 1984.

Dr. Greene, an otolaryngologist, was one of the first recipients of the Friedberg Fellowship (which later became the Stanton A. Friedberg, M.D., Chair of Otolaryngology and Bronchoesophagology). After completing her residency, she worked for five years in China Hospital in Changsha, China. She then established her practice in Highland Park, Illinois, and was on staff at the Highland Community Medical Center for the rest of her career. She retired in 1974 after 36 years of practice and moved to Hendersonville. Survivors include a sister, Frances E. Riley, and six nieces and nephews.

Norman Leshin, M.D. '26, of Laguna Hills, California, on November 10, 1984.

Dr. Leshin, who served as chairman of the Department of Otorhinolaryngology at Michael Reese Hospital and Medical Center from 1955 to 1971, was an active educator in Chicago. He interned at Michael Reese, completed his postgraduate training at Lempert Institute of Otology in New York and became board certified in Otolaryngology in 1930. His teaching appointments included The University of Chicago, Pritzker School of Medicine, Loyola University Stritch School of Medicine, Cook County Hospital Graduate School, and the University of Illinois School of Medicine. He was president of the Chicago Laryngological and Otological Society and a member of the American Academy of Otology and Ophthalmology. Dr. Leshin is survived by his wife, Priscilla; daughter, Joan Loeb; daughter-in-law, Penny; and five grandchildren.

Kenneth Phillips, M.D. '26, of Kingsport, Tennessee, on July 7, 1984.

F. Bruce Fralick, M.D. '27, of Pinckney, Minnesota, on July 6, 1983.

Leonard A. Honl, M.D. '27, of Reno, Nevada, on August 15, 1984.

William O. McLane, M.D. '28, of Brainerd, Minnesota, on April 13, 1984.

Treacy H. Duerfeldt, M.D. '29, of Lakebay, Washington, in December, 1983.

Lawrence A. Williams, M.D. '30, of Laguna Hills, California, on December 1, 1983.

Wilbur Hart, M.D. '31, of Aurora, Colorado, on December 27, 1983.

M. Elizabeth Downing, M.D. '32, of Des Moines, Washington, on April 9, 1983.

Saul H. Kaplan, M.D. '32, of Miami Beach, Florida, on July 2, 1984.

Andrew R. Anderson, M.D. '34, of Baltimore, Maryland, on June 24, 1983.

Salvatore Dina, M.D. '34, of Chicago, Illinois, on January 14, 1985.

A family practitioner for more than 50 years, Dr. Dina was on the staff of St. Joseph Hospital in Chicago. He was a 50-year member of the Illinois State Medical Society. Survivors include his wife, Amerisuda; daughter, Gail Kelly; son, Dr. Thomas Dina; and sister, Grace Cannistra.

John M. Brand, M.D. '35, of Chester, West Virginia, on February 22, 1984.

John F. Cant, M.D. '35, of Park Ridge, Illinois, on February 22, 1984.

Ferdinand C. Jacobson, M.D. '36, of Gordon, Wisconsin, on September 5, 1984.

Joseph D. Romino, M.D. '36, of Fairmont, West Virginia, on August 13, 1983.

For nearly 30 years, Dr. Romino was chief of the surgical division of Fairmont General Hospital, in his home town of Fairmont, West Virginia. After interning at St. Mary's Hospital in Detroit, Michigan, he accepted a preceptorship at Fairmont Emergency Hospital and remained on the staff in addition to a position at Fairmont General and Grafton City hospitals. Dr. Romino was active on medical staff committees and also served on the board of directors of St. Barbara's Nursing Home in Monongah, West Virginia. He served in the U.S. Navy in World War II, was a fellow of the International College of Surgeons, and certified by the American Board of Abdominal Surgeons. Dr. Romino is survived by his wife, Mary; children, Beverly Ann Jeziori, Donna Jo Metz and Joseph Jr.; four brothers and sisters; and nine grandchildren.

Elmer M. Broen, M.D. '37, of Palos Verdes Estates, California, on July 12, 1984.

Dr. Broen served 35 years as senior attending obstetrician and gynecologist at the Los Angeles County Harbor General Hospital in Torrance, California, where he was named Man of the Year in 1968. Board-certified, he was also a clinical professor of obstetrics and gynecology at the University of California School of Medicine. His career included practices in Richland, Washington, and New Cumberland, West Virginia, as well as positions at the New York University School of Medicine, New York, and the University of Pennsylvania School of Medicine in Philadelphia. He also chaired the Department of Obstetrics and Gynecology at three different California hospitals—San Pedro and Peninsula Hospital, San Pedro (1952-54 and 1964); Little Company of Mary Hospital, Torrance (1959-61); and South Bay Hospital, Redondo Beach (1963-64). During the 1950s and '60s, Dr. Broen consulted for the surgeon general at the U.S. Army Hospital in Fort MacArthur and for the Department of Justice Federal Correctional Institution on Terminal Island, both in California. In 1972 he received the Essay Award from the Los Angeles Obstetrical and Gynecological Society. Dr. Broen is survived by his wife, Blanche, and children, Julie Ann White, Ames and Rod.

Harry S. Kupersmith, M.D. '37, of La Jolla, California, on September 6, 1984.

Henry W. Ryder, M.D. '37, of Cincinnati, Ohio, on March 13, 1984.

Abraham I. Braude, M.D. '40, of La Jolla, California, on December 5, 1984.

An international authority on infectious diseases, Dr. Braude joined the University of California-San Diego School of Medicine in 1969 as professor of medicine and pathology and head of the Division of Infectious Diseases. He was among the first to identify bacterial endotoxins as the cause of septic shock and pioneered the development of antiserum to prevent it. He also identified anaerobic bacteria as the principle cause of brain abcess, and laid the groundwork for current studies of antigonorrhea vaccine and of amoebiasis. Dr. Braude received the Macy Faculty Scholar Award, the Maxwell Finland Award, and was the first to receive the Kaiser-Permanente Award for Excellence in Teaching. The editor of "Microbiology and Infectious Disease," a volume in the *International Textbook of Medicine* series, Dr. Braude was also a visiting professor at many universities. He is survived by his wife Gita; daughters, Claire and Katherine Braude-Rothbard; and two grandchildren.

Orin L. Davidson, Jr., M.D. '40, of Collierville, Tennessee, on August 25, 1983.

John P. Young, M.D. '42, of Wheeling, West Virginia.

At the Medical Center

George C. Flanagan, M.D., former associate dean for Rush Medical College and a senior attending physician at the Medical Center, died January 29, 1985. He was 56.

Dr. Flanagan joined the dean's office of Rush Medical College in 1970 and served as associate dean for clinical curriculum in the Office of Medical Student Programs. He was also active in the ANCHOR Organization for Health Maintenance and served as acting director for the Center of Educational Resources at the Medical Center. In addition to his administrative duties, Dr. Flanagan conducted research in medical administration and in sexual dysfunction. The internal medicine specialist completed a one-year fellowship in endocrinology at the Cleveland Clinic and was on the faculty of the University of Illinois School of Medicine from 1958 until he came to Rush.

William Gottschalk, M.D., associate chairman, Department of Anesthesiology, and director, Section of Obstetrical Anesthesia, died October 22, 1984. He was 58.

Renowned for his work in obstetric anesthesia, Dr. Gottschalk held conjoint appointments in the departments of Anesthesia and Obstetrics and Gynecology, and was also a professor in the College of Nursing. He earned his medical degree from the University Libre de Bruxelles in his native Belgium, then served residencies in obstetrics and gynecology at Duke University, Boston Lying-In-Hospital and Kings County Hospital, and in anesthesia at the University of Miami. Before joining the Medical Center in 1975, Dr. Gottschalk was director of the Section of Obstetric Anesthesia and professor in both the department of Anesthesia and Obstetrics and Gynecology at the University of Alabama in Birmingham.

The William Gottschalk, M.D., Chair of Anesthesiology was recently established in his memory.

Frank E. Trobaugh, Jr., M.D., the Elodia Kehm Professor of Hematology and senior attending physician at the Medical Center, died November 10, 1984. He was 64.

A noted specialist in blood disorders, Dr. Trobaugh was also director of the Office of Consolidated Laboratory Services, an associate vice president at the Medical Center, and professor of pathology. He conducted some of the early studies in bone marrow freezing techniques and was a pioneer in the regulation of blood production. Prior to joining the staff of Presbyterian Hospital in 1954, Dr. Trobaugh held faculty and clinical appointments at Tufts University Medical School, Harvard, Barnes Hospital (St. Louis) and George Washington University Medical School.

Council Meeting *(continued from page 11)*

the current student body by supporting programs to improve both the curricular and non-academic phases of their training is the purpose of this committee.

Three major activities have been initiated to that end: sponsorship by the Alumni Association of the first TGIF celebration of the academic year for Rush University students; creation of the Alumni Resource Network to provide advice and a helping hand to students visiting potential residency sites; and representation on the Committee on Student Affairs.

Passing out complimentary engraved keyrings for new graduates at the Commencement Banquet and representation from the senior class on the Reunion Planning Committee are additional ways in which the Alumni Association strives to project a positive image to the student body in the hopes that they, in turn, will become active members of the Alumni Association.

Bylaws Committee (**R. Joseph Olk, M.D.,** chairman)

Members of the Council were asked to review a copy of the existing bylaws, keeping in mind that a total analysis is called for in 1986. As chairman, Dr. Olk requested that areas where possible amendments might be in order should be forwarded to his attention. The possibility of extending the length of a term from two to three or four years, and staggering terms to avoid the possibility of total turnover in any given year, were raised for future consideration.

New Business

New business included a discussion of the upcoming regional events in San Francisco. A reception and dinner for Rush alumni and friends with Leo M. Henikoff, M.D., president of Rush-Presbyterian-St. Luke's Medical Center, and Henry P. Russe, M.D., dean of Rush Medical College, will be co-hosted by L. Penfield Faber, M.D., associate dean, surgical sciences and services, in conjunction with the annual meeting of the American College of Surgeons.

Research will be conducted by the Alumni Office this year on the most efficient and cost-effective way to produce an updated alumni directory, hopefully by the end of 1985.

Before adjourning the meeting, computer printouts were distributed to Council members for a working session to help identify potential new leadership for involvement in Alumni Association activities and candidates for future awards. Councillors were then asked to reconvene in the Schweppe-Sprague Auditorium to man their posts as volunteers for the third annual alumni-sponsored TGIF, which was attended by Dr. Henikoff and featured a standing-room-only crowd.

Respectfully submitted,

Thomas B. Stibolt, Jr., M.D. '75
Secretary

A Message to Alumni

From the Rush Medical College Dean

Henry P. Russe, M.D.

If you were unable to attend Reunion Weekend 1985, not only were you missed, you missed a great party! The banquet, educational programs, meetings and social get-togethers brought scores of Rush graduates back to their alma mater. I was pleased to welcome more than 100 alumni, spouses, guests and staff, many of whom joined me for breakfast and my yearly report at the Alumni Association's annual meeting.

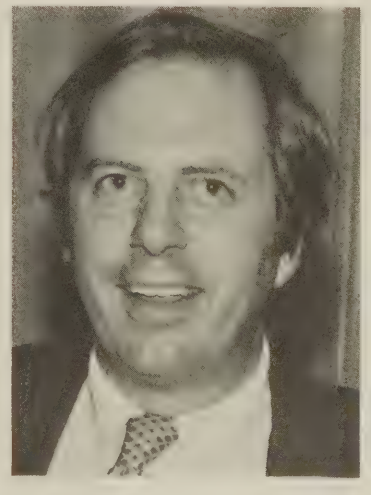
There has been a lot of activity over the past year.

Faculty development continues at an exciting pace. Since joining our staff in 1984, Roger C. Bone, M.D., the Ralph C. Brown, M.D., Professor and Chairman of Internal Medicine, has recruited three nationally prominent physicians to head up our sections of endocrinology, gastroenterology and rheumatology, with an emphasis on geriatrics. Steven G. Economou, M.D., the Helen Shedd Keith Professor and Chairman of General Surgery, skillfully recruited an outstanding team of liver transplant surgeons from Memphis. James W. Williams, M.D., the Jack Fraser Smith Professor of Surgery, and Santiago R. Vera, M.D., performed the first liver transplant surgery at the Medical Center in August. Beth Jacobs, M.D., another outstanding appointee of Dr. Bone, is currently working within the Department of Physiology in applying the patch clamp technique to the study of alveolar macrophages. Faculty recruitment for physiology continues to expand these important activities.

Our alternative curriculum program, a problem-based, self-study experimentation in medical education, has completed its first year with students performing as expected — remarkably well. And, keeping with Rush "tradition," our graduates continue to perform above the national average in securing excellent postgraduate training positions around the country.

Finally, let me take this opportunity to express my personal appreciation for the warm reception both Dr. Henikoff and I received at alumni gatherings in San Francisco and Hawaii this past year. The enthusiasm and spirit of good will that we encountered reflect your growing interest in, and support of, alumni-sponsored programs.

You have reason to be proud of your alma mater as it continues efforts in advancing patient care, health education and research. Thanks for your support, which helps us continue to do what we do best.



From the Association President

R. Joseph Olk, M.D.

Alumni Weekend '85 is the third over which I have presided as Alumni Association president and again I find myself reporting "it was the best one yet," meriting special kudos to **Steven Gitelis, M.D. '75,** and all members of the '85 Reunion Planning Committee.

Steve, who is president-elect of the Alumni Association, ends five years of service as chairman of that planning committee. His creativity, diligence and enthusiasm have sparked a new interest in alumni programs by young and not-so-young graduates who came in record numbers to this year's reunion.

What made Alumni Weekend '85 special for me is that it marked 10 years since my own graduation from Rush. I saw a lot of faces I hadn't seen in years; 21 of my colleagues from the Class of'75 were able to make it to reunion activities.

We had a wonderful time reminiscing and were especially pleased that Leo Henikoff, our new president at Rush-Presbyterian-St. Luke's, was able to join us. We remember Leo from those early years, following the reactivation of Rush Medical College, when he served as dean of admissions and, later, acting dean of the College. In fact, he was almost singlehandedly responsible for interviewing and accepting us into the Class of '75. His sincere interest in us as individuals, and the confidence he placed in our capabilities, nurtured our best instincts and resulted in a new generation of Rush physicians consistent with the standards of our great heritage. May I take this opportunity to say, on behalf of my colleagues, "Thanks, Leo — and welcome home!"

I should mention that **Gordon Derman, M.D. '75,** has agreed to assume Steve's responsibilities as chairman of the Reunion Planning Committee and I know he will welcome your suggestions. Just write to Gordie in care of the Alumni Office. We're always pleased to hear from our alumni. In fact, you'll notice that this issue of the *Record* includes a directory of alumni representatives elected to serve on the Executive Council for the 1985-87 term. Please don't hesitate to contact us; we're here to serve you!

Medicine's a Family Tradition

Yenchi Nguyenphuc, M.D. '85, with her family.
Her father is a Ph.D; mother, pharmacist; sister, dentist; brother, physician; and another sister, medical student.

Susan Sheinkop M.D. '85, with uncle, Mitchell Sheinkop, M.D. (right), and Armando Susmano, M.D., both members of the attending staff at the Medical Center.

Candace Warner Dorsher, M.D. '85, and husband, Peter, M.D. '85.

David Hejna, M.D.'85 (right), receiving his degree from his father, William F. Hejna, M.D., professor and senior attending at the Medical Center.

Another Successful Alumni Weekend Has Come and Gone

We learn something every year, and the evaluations returned by graduates who participated will help the Reunion Planning Committee to improve future programs to provide "something for everyone."

Serious planning is well under way for this coming June. Dates have already been confirmed (Thursday, Friday, and Saturday, June 12-14) and the site for the 1986 Commencement Banquet has been reserved (the Ritz-Carlton). Please mark your calendars now and plan to join us, especially if you belong to one of the three anniversary classes to be honored next June: 1936, 1976 or 1981. You will be hearing more about our special plans in the coming months.

This issue of the *Record* features articles and photographs capturing some of the key moments from Reunion Weekend '85, but I'd like to highlight just a few of my own lingering memories. . .

. . .The beautiful, fragrant, home-grown and handmade lei transported from Hawaii by **Ralph B. Cloward, M.D. '35,** class agent—his moving words on behalf of his classmates at the annual meeting were repeated, by popular demand, at the Commencement Banquet for the benefit of our newest alumni. . .

. . .Collectors' items for our Archives and Rare Books Room lovingly contributed by **Drs. Fitts** and **Welles** of the 50th reunion class. . .

. . .A blending of the generations at the second annual meeting for members of the Benjamin Rush Society, symbolized by the passing of the torch of leadership to new chairman, **Richard Melcher, M.D. '75,** by outgoing chairman, **Frederic A. dePeyster, M.D. '40. . .**

. . .Record turnout of alums celebrating their 5th Reunion—the Class of 1980 made quite a showing, especially at the Banquet. . .

. . .The diverse talents of our student body as demonstrated at both the student/faculty music recital Thursday evening and at the clinicopathological conference (CPC) on Alumni Day. . .

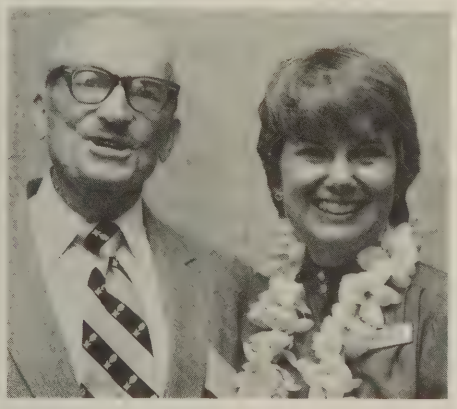
. . .Finally identifying faces to put with the names of alumni and volunteers we've dealt with by phone on so many occasions. . .

. . .And the pride in their alma mater shown by Rush grads of all ages as they enthusiastically celebrated Alumni Weekend 1985, making all our planning efforts so worthwhile.

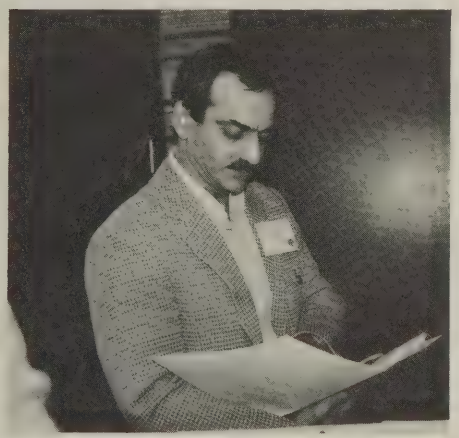
Please don't wait for an official "reunion year" to plan a visit to your alma mater. We're always delighted to hear from you and Alumni Weekend is a perfect time to come see for yourself just what has changed (for the better, we trust!) and what has remained the same.

Hope to see you next June!

Cordially,
Vicki J. Woodward
Director, Alumni Relations



Ralph B. Cloward, M.D. '35, class agent, and Vicki J. Woodward.



Joseph Bernardini, M.D. '75

Isaac E. Michael, M.D. '42, signs in for reunion activities.

More Than 100 Alumni Came Back for Reunion '85

Top row — Drs. Olwin, Heersma, Schneider, Siebers-DeValois, Fitts, Hall; middle — Drs. Lewy, Friedman, Frank, Segal, Plain, Dickerman; bottom — Drs. Kohn, Welles, Slott, Rogers and Cloward.

Top row — Drs. King, Peck, Olk, Kowalski, Shapiro, Dwyer; middle — Drs. Sicher, Bernardini, Melcher, Carlson, Tyberg, Graettinger; bottom — Drs. Broderick, Westheimer, Pratt, Smith and Derman.

More than 100 alumni came back to Rush for Reunion Weekend '85. Seventeen from the Class of '35 celebrated their 50th year since graduation; 20 from the Class of '75 came for a 10-year reunion; 34 from the Class of '80 marked their 5th anniversary; and 30 alumni from other classes also joined in various reunion activities.

They came from all over the country, with **Ralph Cloward, M.D. '35,** who's still in practice doing surgery, traveling the farthest—from Honolulu, Hawaii.

Following is a list of Rush grads who participated in Reunion Weekend '85.

Class of 1935
Ralph B. Cloward, M.D., Honolulu, Hawaii
Bernadine DeValois, M.D., Holland, Michigan
H. Street Dickerman, Jr., M.D., Springfield, Illinois
Ralph L. Fitts, M.D., Albuquerque, New Mexico
William P. Frank, M.D., Lompoc, California
Elmer A. Friedman, M.D., Chicago, Illinois
Durward G. Hall, M.D., Springfield, Missouri
H. Sidney Heersma, M.D., Kalamazoo, Michigan
Kate Kohn, M.D., Chicago, Illinois
Robert B. Lewy, M.D., Chicago, Illinois
John H. Olwin, M.D., Evanston, Illinois
George Plain, M.D., South Bend, Indiana
Albert F. Rogers, M.D., Westchester, Illinois
Maurice Schneider, M.D., Los Angeles, California
Jack Segal, M.D., Beverly Hills, California
Irving Slott, M.D., Chicago, Illinois
Marshall P. Welles, M.D., Pasadena, California

Class of 1975
Joseph P. Bernardini, M.D., Vineland, New Jersey
Thomas W. Broderick, M.D., Huntington Beach, California
William Carlson, M.D., McKinleyville, California
Gordon Derman, M.D., Evanston, Illinois
William D. Dwyer, M.D., St. Charles, Illinois
Steven Gitelis, M.D., Downers Grove, Illinois
William F. Graettinger, M.D., Albuquerque, New Mexico
J. Brian Hancock, M.D., Saginaw, Michigan
Daniel Hennessy, M.D., Atlanta, Georgia
Stephen R. Humowiecki, M.D., Oak Park, Illinois
Jeffrey King, M.D., McLean, Virginia
John Kowalski, M.D., Riverside Lawn, Illinois
Richard E. Melcher, M.D., Augusta, Georgia
R. Joseph Olk, M.D., St. Louis, Missouri
Donna Pratt, M.D., Chicago, Illinois
David Rubin, M.D., Chicago, Illinois
Kenneth S. Shapiro, M.D., West Nyack, New York
Steven E. Sicher, M.D., Peoria, Illinois
Ellen C. Smith, M.D., Chicago, Illinois
Thomas B. Stibolt, M.D., Chicago, Illinois
Theodore Tyberg, M.D., New York, New York
Ruth Westheimer, M.D., Chicago, Illinois

Top row — Drs. Maier, Sullivan, Margolis, Stasic, Zippe; middle — Drs. Wiedman, Polin Wyhinny, Lange, Levin, Perks-Donaldson, Donaldson, Petrak, Hayes; bottom — Drs. Soter, Grotelueschen, Mintz-Rosenbaum, Marx, Loeb and Barton.

Women from the Class of '85 also got together for a group photo.

Class of 1980

Mary C. Barton, M.D., Hershey, Pennsylvania
John E. Buckley, M.D., Chicago, Illinois
Bruce H. Campbell, M.D., Brookfield, Wisconsin
Robert Chase, M.D., Winfield, Illinois
Antonio H. Chaviano, M.D., Chicago, Illinois
William F. Donaldson III, M.D., Edgewater, New York
Randy J. Epstein, M.D., Stone Mountain, Georgia
Catherine B. Grotelueschen, M.D., Westchester, Illinois
Richard G. Hayes, M.D., Troy, Michigan
Jean L. Holley, M.D., Chicago, Illinois
Carol Krohm, M.D., Harvard, Illinois
Andrea C. Lang, M.D., Wheaton, Illinois
Jay L. Levin, M.D., Northbrook, Illinois
Barbara B. Loeb, M.D., Elmhurst, Illinois
Susan T. Lyon, M.D., Chicago, Illinois
Steven A. Maier, M.D., Hermosa Beach, California
Wayne S. Margolis, M.D., Houston, Texas
Marilyn Marx, M.D., Galveston, Texas
Majorie Mintz-Rosenbaum, M.D., Chicago, Illinois
Madeleine F. Neems, M.D., Highland Park, Illinois
Valerie Perks-Donaldson, M.D., Edgewater, New York
Russell M. Petrak, M.D., Westchester, Illinois
Mary Rascia-Forman, M.D., Birmingham, Alabama
Aimee St. Pierre, M.D., Chicago, Illinois
Demetra Soter, M.D., Chicago, Illinois
Andrew F. Stasic, M.D., San Antonio, Texas
Rhonda Stein, M.D., Evanston, Illinois
Angela Stewart, M.D., Greenville, North Carolina
Daniel J. Sullivan, M.D., Chicago, Illinois
Elizabeth H. Waldron, M.D., Oak Park, Illinois
Martha A. Weidman, M.D., Forest Park, Illinois
Patricia Polin Wyhinny, M.D., Chicago, Illinois
Michael Wolfson, M.D., St. Paul, Minnesota
Craig D. Zippe, M.D., New York, New York

Other Alumni

Paul Ashley, M.D. '37, Chicago Heights, Illinois

Mary Kay Tobin, M.D. '77, Oak Park, Illinois
Alexander Wolf, M.D. '29, Chicago, Illinois

Meeting of the Executive Council

Thursday, June 6, 1985

R. Joseph Olk, M.D. '75, president, called the spring meeting of the Executive Council of the Alumni Association of Rush Medical College to order and introduced Dorothy H. Gardner, associate vice president of philan thropy and communication at the Medical Center. Gardner welcomed the following attendees on behalf of the administration and Trustees:

R. Gordon Brown, M.D. '39	George H. Handy, M.D. '42
Ruth S. Campanella, M.D. '74	Helen Holt, M.D. '34
Frederic A. dePeyster, M.D. '40	Isaac E. Michael, M.D. '42
Thomas A. Deutsch, M.D. '79	R. Joseph Olk, M.D. '75
Stanton A. Friedberg, M.D. '34	Floyd F. Shewmake, M.D. '73
Steven Gitelis, M.D. '75	Thomas B. Stibolt, Jr., M.D. '75
Cheryl M. Gutmann, M.D. '78	

Dr. Olk extended regrets on behalf of Council members **Ronald D. Nelson, M.D. '74, C. Arnold Curry, M.D. '73,** and **Ronald W. Quenzer, M.D. '73,** who were unable to attend. He expressed thanks to **Steven Gitelis, M.D. '75,** for his splendid accomplishments as chairman of the Reunion Planning Committee. Dr. Gitelis made a special effort to attend the Council meeting prior to his departure for San Francisco to present a paper before the Muscular Skeletal Tumor Society.

Helen Holt, M.D. '34, and R. Joseph Olk, M.D. '75.

Reflecting on some of the accomplishments of his first term as president, Dr. Olk highlighted the following:

- Increased involvement of the class agents, especially through more personalized participation in the alumni annual appeal.
- Representation of younger alumni in the Benjamin Rush Society which now includes 17 post-1973 members, 8 from the Class of 1975.
- Creation of the Philanthropic Leadership Committee to help identify and solicit new young prospects for the Benjamin Rush Society, which requires an annual unrestricted commitment of $1,500 or more.
- Initiation of special reunion class gift efforts for 10- and 50-year anniversary classes to benefit Rush Medical College and its students.
- Launching of the Alumni Resource Network for the mutual support of students and alumni in key metropolitan areas.
- Annual sponsorship by the RMC Alumni Association of the first TGIF of the academic year for Rush University students.

Recognition was given to those who volunteered their time and energies to chair Alumni Association committees during the past year:

Awards	Frederic A. dePeyster, M.D. '40
Benjamin Rush Society	Frederic A. dePeyster, M.D. '40
Class Agent Network	Ronald W. Quenzer, M.D. '73
Library/Alumni Publications	Stanton A. Friedberg, M.D. '34
Nominations	R. Gordon Brown, M.D. '39
	Ronald D. Nelson, M.D. '74
Philanthropy/Annual Appeal	Helen Holt, M.D. '74
	R. Joseph Olk, M.D. '75
Reunion Planning	Steven Gitelis, M.D. '75
Student Involvement	Thomas B. Stibolt, M.D. '75

Gardner reported on some of the institutional developments since the last Executive Council meeting. These included the special Trustee Ad Hoc Committee on Strategic Issues which has been meeting regularly for in-depth institutional planning of both an organizational and fiscal nature. In scrutinizing philanthropic giving patterns to Rush over the past few decades, several fundraising truisms emerged:

*Preferred mailing addresses and phone numbers are listed.

• Most of our giving comes from individuals (65 percent this year), compared to 23 percent from corporations and 12 percent from foundations.
• People give to people. The bonding process which occurs between patient and physician accounts for a significant portion of our private philanthropy.
• The importance of planned giving. While this income is unpredictable from year to year, the periodic infusion of substantial bequest monies from grateful patients and loyal alumni is critical in sustaining the excellence of the institution. The long-term cultivation of modest annual givers *does* often pay eventually, and testamentary planning continues to be a very important vehicle for institutional support.

One area where Rush is quite atypical is its focus on large gifts. While dollar totals have increased (this year's $10 million private philanthropy goal was met and surpassed by the end of May), our donor count remains quite static. This results in an unusually high average gift, but points to potential problems as major donors are lost through natural attrition and/or increased competition in the health care marketplace. An important institutional priority for the near future is expansion of our donor universe and identification of new prospects. Gardner welcomed questions from Council members and thanked them for the important role they play in setting an example for their peers through their own philanthropic commitment, and for their help in identifying and soliciting their fellow alumni for increased support of Rush Medical College.

Vicki J. Woodward, director of alumni relations, presented an administrative report and an update on alumni philanthropy from Rush Medical College graduates. Alumni giving through May of fiscal 1985 (11 months) compared to fiscal '84 showed significant increase in the average gift size, but a decrease in both donors and dollars. Some of that difference is attributable to several substantial bequests received last year and to the strong leadership which propelled the Class of 1934's 50-year class gift effort. Low participation figures continue to be cause for concern, however. Only 11 percent of Rush graduates supported their alma mater through an outright gift or pledge this year; annual giving at other comparable medical schools tends to run in the 35-to-45 percent range. There are some optimistic trends, however. Our donor count among post-1973 graduates has grown from 17 (1982) to 53 in 1983 and to 102 through May of 1985. We are counting on more personalized involvement by class agents and members of the Alumni Philanthropic Leadership Committee to boost figures even more dramatically in the year ahead. Final alumni giving results for fiscal '85 will be reported in the *Record* (see page 36).

New business included a motion, unanimously approved, to present to the Medical Center's Committee on Nominations and Trustee Planning the following four alumni Trustees for another annual term: **R. Gordon Brown, M.D. '39, Robert J. Hasterlik, M.D. '38, Ronald D. Nelson, M.D. '74,** and **R. Joseph Olk, M.D. '75.**

The following new chairmen were also endorsed to head committees in 1985-86:

Benjamin Rush Society	Richard E. Melcher, M.D. '75
Class Agent Network	Thomas A. Deutsch, M.D. '79
Philanthropic Leadership Committee	R. Joseph Olk, M.D. '75
Reunion Planning	Gordon H. Derman, M.D. '75
Student Involvement	Cheryl M. Gutmann, M.D. '78 and Paul J. Jones, M.D. '83

The existing alumni Nominations Committee, co-chaired by **R. Gordon Brown, M.D. '39** and **Ronald D. Nelson, M.D. '74** with members **Cheryl Gutmann, M.D. '78,** and **Tom Deutsch, M.D. '79,** was approved for another two-year term.

A discussion of the calendar resulted in the selection of Friday, September 27, for the fall meeting of the Executive Council. This will coincide with the first TGIF of the academic year which will again be sponsored by the Alumni Association of Rush Medical College. It is anticipated that the third annual Class Agent Workshop will also be scheduled for that date.

Volunteers were enlisted to pass out keyrings to the new graduates at the Commencement Banquet and an announcement was made that Rush will sponsor an alumni reception at the Medical Center on Tuesday, October 15, in conjunction with the meeting of the American College of Surgeons.

In conclusion, a plaque was presented to retiring Council member **Helen Holt, M.D. '34,** in appreciation for her many years of loyal service to the Alumni Association. The meeting was then adjourned and Council members moved to the foyer of Room 500 to attend the third annual Faculty/Student Music Recital sponsored by the Committee on Student Affairs (COSA), which kicked off a very successful program for Alumni Weekend 1985.

Enjoying a light-hearted moment at the Commencement Banquet.

Minutes of the 1985 Annual Meeting of the Alumni Association

R. Joseph Olk, M.D. '75, president, called to order the 13th Annual Meeting of the Alumni Association of Rush Medical College in the Claude H. Searle, M.D., Conference Center of Rush University. Held in conjunction with the annual Breakfast with the Dean, the June 7, 1985, meeting was attended by the following alumni:

Paul Ashley, M.D. '37
Hugo C. Baum, M.D. '36
Joseph P. Bernardini, M.D. '75
Bruce H. Campbell, M.D. '80
Ralph B. Cloward, M.D. '35
Frederic A. dePeyster, M.D. '40
Thomas A. Deutsch, M.D. '79
Bernadine DeValois, M.D. '35
H. Street Dickerman, Jr., M.D. '35
Valerie Donaldson, M.D. '80
Ralph L. Fitts, M.D. '35
William P. Frank, M.D. '35
Elmer A. Friedman, M.D. '35
William F. Graettinger, M.D. '75
Durward G. Hall, M.D. '35
George H. Handy, M.D. '42
H. Sidney Heersma, M.D. '35
Helen Holt, M.D. '34
Harold Kessler, M.D. '74
Stephen M. Korbet, M.D. '79
Barbara B. Loeb, M.D. '80
Steven A. Maier, M.D. '80
Richard E. Melcher, M.D. '75
James W. Merricks, M.D. '34
Isaac E. Michael, M.D. '42
Stanley E. Monroe, M.D. '36
R. Joseph Olk, M.D. '75
John H. Olwin, M.D. '35
Albert F. Rogers, M.D. '35
Maurice Schneider, M.D. '35
Jack Segal, M.D. '35
Floyd F. Shewmake, Jr., M.D. '73
Steven E. Sicher, M.D. '75
Marc A. Silver, M.D. '79
Demetra Soter, M.D. '80
Andrew F. Stasic, M.D. '80
Rhonda Stein, M.D. '80
Thomas B. Stibolt, M.D. '75
Mary Kay Tobin, M.D. '77
Marshall P. Welles, M.D. '35
Ruth Westheimer, M.D. '75
Alexander Wolf, M.D. '29

Dr. Olk welcomed and recognized members of the anniversary classes of 1935, 1975 and 1980 and extended special greetings to **Ralph B. Cloward, M.D. '35,** who attended from Hawaii.

Dr. Olk then called upon Leo M. Henikoff, M.D., newly installed president of Rush-Presbyterian-St. Luke's Medical Center. In his introduction, Dr. Olk commented that "the greatest tribute that we can give Leo this morning is just to remind him that all of the members of the Class of 1975 here today were interviewed by him for admission to Rush Medical College."

Dr. Henikoff, in highlighting the many advances at Rush in the past 10 years, provided an overview on the structure of Rush University, commenting that, although the University was incorporated in 1972, all four colleges were not then in place. He expressed his pleasure with the rapid growth and national prominence of the College of Nursing, established in 1972. "We have the best nursing in the country in our hospital," he said. "This institution is training a new kind of professional — a nurse who is really a colleague in the care of patients." Dr. Henikoff added that our College of Nursing is the largest provider of doctoral trained nurses in the Midwest.

He stressed, too, the institution's emphasis on graduate education at the master's and Ph.D. levels. The College of Health Sciences, he noted, instituted at the time the Class of 1975 was graduating, offers seven degree programs: baccalaureate in medical technology and master's in audiology, occupational therapy, clinical nutrition, health systems management, medical physics, and speech-hearing pathology. Finally, The Graduate College, which came to fruition in 1981, offers Ph.D.s in the basic sciences.

Dr. Henikoff remarked on a number of new offerings in the clinical area, including: the in vitro fertilization laboratory; outpatient alcohol and drug abuse program; one of Chicago's first kidney lithotriptors (pending installation); the comprehensive breast center, for cancer treatment; an osteoporosis program; and the bone marrow transplant center which had completed 21 transplants, bringing long-overdue expertise in this important field to the Midwest. (The Center was recently designated The Thomas Hazen Thorne Bone Marrow Transplant Center and its director, Herbert Kaizer, M.D., Ph.D., named the first Coleman/Fannie May Candies Foundation Professor, in recognition of a $3 million gift from the Foundation.)

Dr. Henikoff outlined Rush's far-reaching health care delivery system, commenting that "we are no longer just a hospital in health care." Rush-Presbyterian-St. Luke's currently offers 25 care sites throughout the metropolitan Chicago area. These sites include 16 ANCHOR HMO offices and four industrial/occupational medicine practices. The Medical Center staffs a corporate health center at One Financial Place and plans are currently under way to serve the medical needs in River City, a new residential/shopping center under construction.

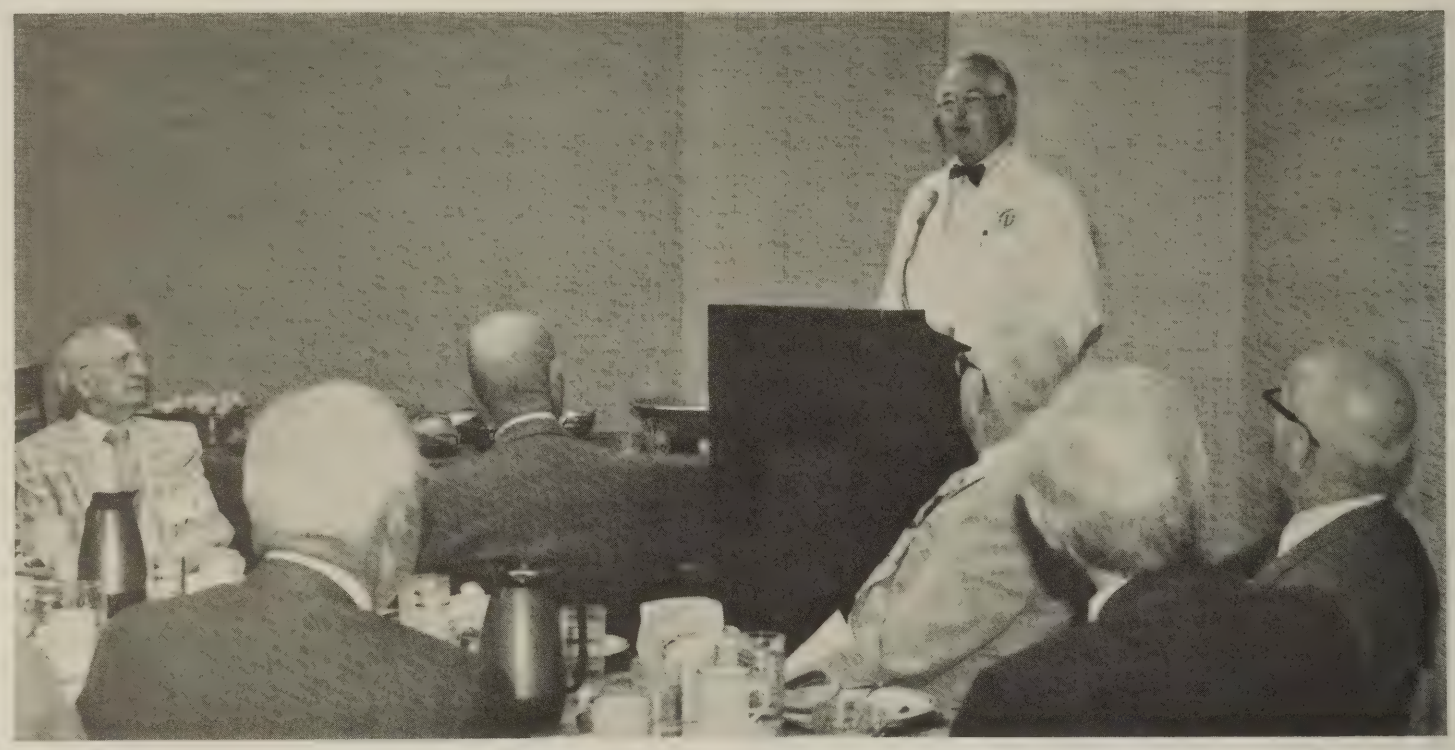
"Rush-Presbyterian-St. Luke's Medical Center is changing," Dr. Henikoff added. "We're really progressing, both academically and clinically; we're committed to bringing quality Rush care to this whole region. . . ." He concluded his remarks by expressing his pleasure at seeing familiar faces from the Class of 1975 and his pride in their many accomplishments since graduation.

Henry P. Russe, M.D., dean of Rush Medical College and vice president for medical affairs, addressed the group with an update on Rush Medical College. Excerpts of his report are printed in the "Message to Alumni" which appears in the opening pages of this issue of the *Record*.

Following Dr. Russe's remarks, **Mary K. Tobin, M.D. '77,** presented a brief treasurer's report. She prefaced her report with a reminder that our students are facing even greater federal cutbacks, resulting in ever-increasing student financial debts. She stressed the need for a much broader alumni philanthropic base and reminded the group that the books were still open for those who had not yet made a gift. Dr. Tobin reported that, through the month of May, $297,309 had been received from 287 donors for all purposes.* This figure included three bequests totaling $54,223. Dr. Tobin expressed sincere appreciation on behalf of the Alumni Association to those who made a gift and re-emphasized how vital alumni participation is to our efforts.

Dr. Olk reported on the results of the reunion classes' giving efforts. He expressed his thanks to all who participated, with a special note of gratitude to those alumni volunteers who wrote to classmates and helped make solicitation calls. Dr. Olk reported that gifts and pledges from the Class of 1935, in addition to those generated during the annual appeal, totaled $21,450 from 18 donors. Contributions from the Class of 1975 totaled $8,150 from 20 donors. He reminded the reunion classes that it was not

**Editor's note: Final figures through June 30, 1985, totaled $307,590 from 331 donors.*



Dean Henry P. Russe, M.D., addressing alumni at the traditional Breakfast with the Dean/Annual Meeting.

too late to participate in these class gift projects, since an extension had been granted to leave the books open until December 31. Total giving from the 50th anniversary class increased $21,155 from the year before, while the 10th reunion class reported a $10,000 increase through the month of May.

Dr. Olk brought alumni up-to-date on some of the many Alumni Association activities since the last annual meeting. He thanked those who participated in planning through service on various committees of the Alumni Association, and expressed his gratitude to this year's committee chairmen and to those who have agreed to continue their leadership.

Highlights of the past year included:

- Two issues of the Alumni *Record.*
- Increased personalization of the annual appeal, utilizing members of the Class Agent Network to sign letters and make follow-up phone calls to classmates.
- Creation of the Alumni Philanthropic Leadership Committee to identify and solicit new post-1973 members for the Benjamin Rush Society.
- Initiation of the *Alumni Directory* update project, with the directory scheduled for distribution next year.

Priorities for the coming year were reviewed by Dr. Olk. These included increased interaction between alumni, students and recent graduates; improved participation in Alumni Association programs; expanded membership in the Benjamin Rush Society; and doubled alumni participation in this year's annual appeal.

The next agenda item was the presentation of the James A. Campbell, M.D., Alumni Service Awards to **R. Gordon Brown, M.D. '39, James W. Merricks, M.D. '34,** and **Stanley E. Monroe, M.D. '36.** (See story on page 13.) Dr. Olk next called upon **Ralph B. Cloward, M.D.,** class agent for **1935,** to speak for his classmates on the occasion of their 50th anniversary. His moving remarks are found on page 27.

Under new business, Dr. Olk reported on the results of the recent '85-'87 Executive Council balloting. New members elected to the Council are: **Gordon Derman, M.D. '75, Richard Melcher, M.D. '75, James Rejowski, M.D. '78,** and **Marc Silver, M.D. '79.** Dr. Olk announced that **Gregory M. Graves, M.D. '74,** and **Helen Holt, M.D. '34,** have retired from the Council and expressed thanks for their years of service. Dr. Olk also encouraged the group to submit any suggestions, from alumni-at-large, of candidates for consideration as recipients of the Distinguished Alumnus Award and the James A. Campbell Alumni Service Awards. Suggested names, with a brief personal and professional rationale for the recommendation, should be submitted to **Frederic A. dePeyster, M.D. '40,** chairman of the Awards Committee, c/o the Office of Alumni Relations.

There being no further business, the meeting was adjourned.

Alumni Honored for Service to Rush

"When the James A. Campbell, M.D., Alumni Service Awards were established," said **R. Joseph Olk, M.D. '75,** president of the Alumni Association, "it was our intent to honor those who have remained steadfast in their allegiance and commitment to Rush Medical College."

Alumni honored this year have done that and more.

By unanimous vote of the Alumni Association Executive Council, the 1985 recipients of the James A. Campbell, M.D., Alumni Service Awards are **R. Gordon Brown, M.D. '39, James W. Merricks, M.D. '34,** and **Stanley E. Monroe, M.D. '36.** They were honored at the June 7 Annual Meeting of the Alumni Association held in conjunction with the traditional Breakfast with the Dean during Reunion Weekend.

Dr. Olk presented the award to Dr. Brown, identifying him as "one of the stalwart Rush graduates who kept the college charter alive during a period of dormancy. . . He, along with a few others assembled in this room today, played a key role in reopening our doors in 1970."

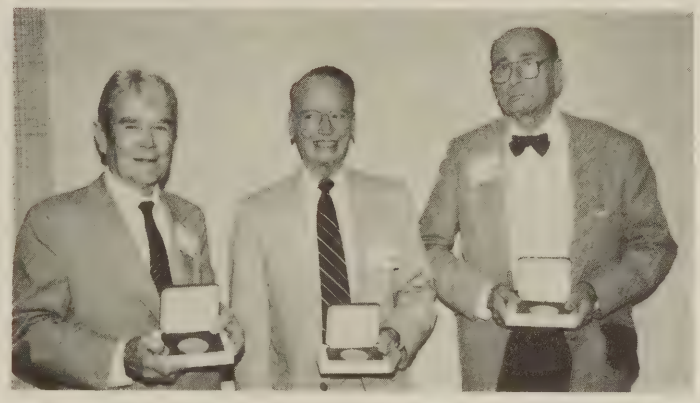
Dr. Brown was cited for his leadership of the Alumni Association, both as president and, more recently, as an active member of the Executive Council, and was commended for his institutional commitment, particularly his service as a Medical Center Trustee since 1970.

"Gordie Brown's commitment to the Medical Center is further evidenced by his efforts to endow a chair in the Department of Medicine honoring his father, **Ralph Chrisman Brown, M.D.,** a 1904 graduate of Rush Medical College," Dr. Olk said.

In 1981, Dr. Brown was honored and presented with an inscribed silver tray at the Commencement Banquet when he turned over the leadership of the Alumni Association to then-incoming president, **Ronald D. Nelson, M.D. '74.** At that same time, Dr. Brown was presented with a "hot off the press" copy of the 1981 Rush Medical College Alumni Directory. "It was largely through Gordie Brown's patient persistence that this directory became a reality."

The award to Dr. Merricks was presented by **Frederic A. dePeyster, M.D. '40.** Dr. dePeyster saluted Dr. Merricks as a "man who has excelled in his every endeavor." A "distinguished member" of the scientific community, Dr. Merricks is a member of both the chemical and scientific honorary societies. His motion picture exhibit dealing with the continent ileo-cecal bladder received the gold medal award at the Brussels World's Fair in 1958. Dr. dePeyster described Dr. Merricks' dedicated service to the Alumni Association during the years that Rush temporarily suspended educational programs and acknowledged Dr. Merricks as a founding member of the Benjamin Rush Society. "We salute James W. Merricks for his faithful service to Rush and her alumni."

Upon receiving his award, Dr. Merricks took the opportunity to publicly acknowledge and thank former classmate, **John Olwin, M.D. '35,** for saving his life in 1962 when he needed emergency surgery. Dr. Merricks also expressed his gratitude to Dr. dePeyster, who led the Alumni Association during his recuperation. Finally, he used this occasion to renew his membership in the Benjamin Rush Society by presenting his annual subscription check to Dr. dePeyster.



James W. Merricks, M.D. '34, R. Gordon Brown, M.D. '39, and Stanley E. Monroe, M.D. '36.

Stanton A. Friedberg, M.D. '34, expressed his pleasure at being asked to make the presentation to Dr. Monroe because "I've known Stan for more years than either he or I would care to admit."

Dr. Monroe, a retired general surgeon, completed his surgical training at Evanston Hospital and served as a clinical assistant, then instructor of surgery at Northwestern University. After a stint with the U.S. Air Force, he was appointed chief surgeon at the Veterans Administration Hospital in Tucson, Arizona. In 1952, he moved to Chula Vista, California, where he established and operated the bilingual Monroe Clinic until 1973. Dr. Monroe is the author of an English/Spanish medical phrase book which was published in 1970.

Dr. Friedberg added that Dr. Monroe is an active participant in the Alumni Association through his role as class agent for 1936 and his ongoing support of the Benjamin Rush Society. On several occasions, Dr. Monroe has hosted alumni receptions in San Diego. "I continue to be impressed," Dr. Friedberg remarked, "with Stan's energy, his intellectual curiosity and his zest for life.

"This occasion also affords me an opportunity to publicly acknowledge and thank Stan for his magnificent contributions to our rare books collection," Dr. Friedberg continued. "You should know that he has a keen interest in Scottish history and the geneology of the Monroe family dynasty. Just last year, I had the pleasure of unwrapping a package from Stan containing three books by Dr. Alexander Monroe. This gift is part of a collection of works by three generations of the Dr. Alexander Monroe clan who were anatomists and surgeons." Dr. Friedberg lauded Dr. Monroe "for all you've done and continue to do for Rush. Your commitment to our alma mater and today's students, as well as the fine contributions you've made to our profession, are standards we all hope to emulate."

After presenting the award to Dr. Monroe, Dr. Friedberg also acknowledged and thanked **Ralph Fitts, M.D.** a member of the **Class of 1935,** for his contribution of a book, published in 1802, given by Benjamin Rush to his daughter and inscribed by Dr. Rush. "This book is another magnificent addition to our rare book collection."

Reunion Weekend— Clinicopathological Conference

The fourth annual clinicopathological conference (CPC) co-sponsored by the Alumni Association of Rush Medical College and the Department of Pathology was held June 7 as part of Reunion Weekend '85.

Each year, members of the graduating class choose an outstanding classmate to make the presentation. This year's discussant was **James M. Goodrich,** who was introduced by Ronald S. Weinstein, M.D., the Harriet Blair Borland Professor and Chairman of the Department of Pathology. Dr. Weinstein also introduced Jim's parents, and congratulated them on the honor their son received in being selected the annual alumni CPC discussant, who, he noted, is generally that senior regarded as the top diagnostician in the class.

Dr. Weinstein brought the clinicopathological conference to Rush from the Massachusetts General Hospital, where he trained in pathology. In his opening remarks, he noted that the CPC had its origins at Harvard Medical School and the MGH, where it actually was adapted from a teaching technique pioneered at Harvard Law School at the turn of the century. **John Schaffner, M.D. '74,** was introduced as series editor for the CPC.

After presenting the protocol for the CPC (printed below), Jim outlined what could be reasonably deduced about the patient. First, he speculated on the type of thyroid malignancy. Thyroid malignancies are classified according to their histopathological type. The two major categories are "well differentiated" and "poorly differentiated." In the well differentiated group, papillary adenocarcinomas predominate and make up approximately 60 to 70 percent of all thyroid malignancies. This cancer is more common in a younger age group, with a peak incidence in the second to third decade, and females outnumbering males three to one. These carcinomas usually have an indolent clinical course, characterized by local recurrences.

Ronald S. Weinstein, M.D., Karen Kawala, M.D. '85, Tom Chauncey, M.D. '85, James Goodrich, M.D. '85, Jack Tauscher, M.D. '85, and Thomas B. Stibolt, M.D. '75.

The second type in the well differentiated group is follicular carcinoma. This group makes up approximately 20 percent of all thyroid malignancies. Follicular carcinoma increases with age and also has a female predominance. Another type is anaplastic carcinoma, which was not considered to be a likely diagnosis for this patient.

Jim considered medullary carcinoma, which makes up about 10 percent of all thyroid malignancies and falls within the poorly differentiated carcinoma category. Medullary carcinoma is found in two settings, in the sporadic form and in a familial form which is associated with many types of endocrine tumors. The usual clinical presentation is a thyroid mass with palpable lymph nodes. Like papillary carcinomas, these tumors have a propensity to recur locally. There may be a long interval between discovery of the primary tumor and the occurrence of metastases. Medullary carcinoma arises from C-cells which are of neural crest origin, in the thyroid.

Medullary carcinoma is a relatively uncommon cancer, but is of special importance due to its association with a familial syndrome, and the fact that there is a very good tumor marker for this cancer, namely calcitonin. Eighty-five percent of all medullary carcinomas produce calcitonin. This provides a reliable marker for screening family members at risk, and also for following post-surgical patients for recurrence of this disease. In addition to calcitonin, medullary carcinomas may also produce ACTH, prostaglandin D_2 and F_2, carcinoembryonic antigen and histaminase.

Jim discussed the episodes of flushing, severe headache, nausea and tightening in the chest. He showed a slide that outlined the differential diagnosis of flushing. First is the carcinoid syndrome, which is caused by a tumor that is often found in the distal small bowel. The mechanism for the flush is still not well understood. The diagnosis is usually made from the clinical picture and measurement of urinary 5-hydroxyindolacetitic acid, a metabolite of seratonin. Flushing without elevated levels of this metabolite raises the possibility of systemic mastocytosis, a fairly rare disease. A typical symptom in systemic mastocytosis is flushing. In severe cases there is hypotension, shock, pruritis, diarrhea and abdominal pain. This disease is thought to be due to an abnormal proliferation of mast cells. These can be either local in origin with release of the histamine or histamine-type compounds into the circulation, or the disease can involve many organs of the body. Another possibility is medullary carcinoma of the thyroid which, curiously, has also been implicated in flushing. Thirty percent of those with medullary carcinoma of the thyroid will present with diarrhea. One-third of those with diarrhea will also complain about bouts of flushing. Jim deferred his discussion on pheochromocytoma, another flushing-producing tumor. Next are drugs. A specific drug history was not available, but it was indicated that the patient did use diuretics. Many diuretic drugs can produce flushing. Finally, toxins can cause flushing.

Jim returned to a consideration of pheochromocytoma. He noted that a recent article in the *New England Journal of Medicine* stated that flushing with this tumor is so rare that its presence casts a doubt on the diagnosis of pheo-

chromocytoma. This contradicts the Mayo Clinic experience which shows a 10 percent incidence of cutaneous flushing in pheochromocytoma.

Jim observed that the patient also had episodes of hypertension. He gave a scholarly discussion of episodic hypertension noting that 50 percent of patients with pheochromocytoma have paroxysms of hypertension, with return to normal blood pressures between attacks. Others have sustained elevations in blood pressure. This patient had the former pattern.

Jim asked for a review of an abdominal CT scan that had been performed at an outside hospital. The CT scan was described by **Jack Tauscher,** another graduating senior who is going into radiology. CT scan showed an enlarged liver with multiple space filling defects. These defects could represent metastatic disease, multiple abcesses, multiple hemangiomas, or polycystic disease of the liver. Another scan demonstrated bilateral large abdominal masses with areas of central necrosis, in the vicinity of the adrenal glands. These could represent adenomas, carcinomas, pheochromocytomas or metastatic cancer. On the basis of size, the most likely diagnosis would be carcinoma. He noted that pheochromocytomas can get large. Jack pointed out that the absence of calcification, the areas of central necrosis and the fact that the masses are bilateral might suggest a diagnosis of pheochromocytoma.

Following the formal presentation of the radiologic findings, Jim asked Jack if he could comment on other radiological tests that may be valuable in identifying pheochromocytoma.

Jack described a test recently developed at the University of Michigan called the MIBG scan. The only lesion that's been visualized with this scan is pheochromocytoma. At the University of Michigan, it is recommended as the initial screening test for pheochromocytoma. It's especially useful for extra-adrenal pheochromocytomas. Once it is seen on an MIBG scan, a CT scan is recommended to further define the anatomy. The test is only done at three centers.

Based upon the available information, Jim stated he believed the CPC patient indeed had pheochromocytoma and then expounded on the diagnosis. Pheochromocytomas are tumors derived from chromaffin tissue which is of neural crest origin. They are usually adrenal, but occur

Protocol for the CPC—All in the Family: Mass Appeal

A 44-year-old white male was admitted for evaluation of an abdominal mass.

Fourteen years prior to admission the patient had radical neck surgery for a "thyroid malignancy." One year later the tumor recurred in a lymph node. He was treated with thyroid replacement until one year prior to admission when he had a second lymph node recurrence. Six months prior to admission he noted malaise, fever, and night sweats. He was found to have diabetes mellitus that was controlled by diet. He also experienced episodes characterized by severe headache, flushing, nausea and tightening in the chest. These episodes lasted about 10 minutes and were increasing in frequency. He had documented blood pressure elevation during these spells. He lost 20 pounds over the two months before admission. He also complained of left-sided abdominal pain for one month. He was admitted to an outside hospital where a CT scan demonstrated a large mass in the left side of the abdomen, enlarged right adrenal, and metastases to the liver. Liver biopsy showed a poorly differentiated carcinoma. He was transferred to Rush-Presbyterian-St. Luke's for further evaluation and treatment.

His past medical history is significant for hypertension for seven years, treated with diuretics. All six of his siblings had a history of hypertension. There was no other significant family history. His review of systems noted the recent onset of dry mouth. He knew of a heart murmur since being in the Navy.

On admission, his blood pressure was 105/70, pulse 120, respirations 20, and temperature 101 °F. HEENT exam was normal except for the radical neck surgery. A one cm firm lymph node was palpated in the posterior cervical region. The lungs were clear. A III/IV holosystolic murmur was present that radiated to the left axilla and both carotids. Abdominal exam revealed bilateral lower quadrant tenderness. The liver had a 12 cm span and was palpable 5 cm below the right costal margin. A large mass occupied the entire left side of the abdomen. No bruits were heard in the abdomen. The stool was guaiac negative. Neurologic exam was normal.

The hemoglobin was 12.2 gms, hematocrit 36.8 percent, and WBC 15.8 mm^3 with 75 polys and 5 bands. The MCV was 76 mm^3. Reticulocytes were 2.3 percent and the platelet count was 556,000 mm^3. The sodium was 138 meq/L, potassium 5.3 meq/L, chloride 95 meq/L, CO_2 28 meq/L, BUN 20 mg/dl, creatinine 0.9 mg/dl, glucose 147 mg/dl, calcium 9.5 mg/dl, alkaline phosphatase 688 U/L, SGOT 163 U/L, SGPT 82 U/L, and LDH 1067 U/L. The protime was 60 percent. Urinalysis had trace proteinuria EKG showed sinus tachycardia. Chest x-ray was normal.

During the hospitalization, the patient had one of his spells during which his blood pressure rose to 210/98 and returned to 120/70 within 10 minutes. Other studies showed a serum iron of 65 ug/dl, TIBC 206 ug/dl, T4 5.3 ng/ml, T3 RU 1.02, and a TSH 1.0. A PTH level was 2270 pg/ml (430-1860) with a simultaneous calcium of 4.1 meq/L (4.4-5.2). A fasting insulin level was 4 mcU/ml (4-24). Urinary metanephrines were 65 mg/24 hours (.3-.9). Urinary VMA was 75 mg/24 hours (0.7-6.8); 17 hydroxy corticosteroids were 6.0 mg/24 hours (3-12) and 17 ketosteroids were 5.3 mg/24 hours (6-13). A calcitonin level was 5015 pg/ml (400). A liver spleen scan demonstrated multiple filling defects compatible with metastatic disease.

An operative procedure was performed.

John A. Schaffner, M.D. '74
CPC Series Editor

in neural crest derivatives in the paraganglion system, which extends from the carotid body to the floor of the pelvis. Ninety-five percent of pheochromocytomas are found in adrenal glands and are more common on the right side than on the left side.

To help remember some of the characteristics of pheochromocytomas, one can remember the rule of 10. Ten percent are bilateral. Bilateral tumors are usually associated with familial syndromes. Ten percent are familial. Ten percent are found in the pediatric age group and 10 percent are malignant. In a Mayo Clinic study of 76 patients with pheochromocytoma, 80 percent complained of headaches as a major or minor complaint. Diaphoresis and palpatations were present in 71 and 61 percent as major or minor complaints, respectively, and flushing was found in 10 percent. Now, the CPC patient had no abdominal mass that was easily felt. This is uncommon. Only five percent of the tumors in the Mayo Clinic study could be palpated. The average length of hypertension was 3.7 years. Patients with pheochromocytoma can exhibit a hypermetabolic state, which Jim believed the CPC patient had. Thirty-one percent of the patients in the Mayo Clinic study had the "triad of Hs": hypertension, hyperglycemia, and hypermetabolism, without signs or evidence of hyperthyroidism. Hyperthyroidism can be confused with pheochromocytomas, but can be ruled out by laboratory studies if the clinical diagnosis is vague.

Jim asked another classmate, **Tom Chauncey,** who has a Ph.D. degree in biochemistry, to discuss the abnormal laboratory findings in the case. Tom thanked Jim for the consult and said he "hoped it would be the first of many." He noted that the diagnosis of pheochromocytoma is made by a combination of clinical history and laboratory testing. The tumor itself produces catecholemine, epinephrine and norepinephrine, which can be detected in plasma and urine. Their metabolic degradation products, the metanephrines and VMA can also be checked for in the urine. Measuring urinary catecholamines, metanephrines and VMA, 90 to 95 percent of pheochromocytomas can be diagnosed. Occasionally more testing is needed. A few caveats should be remembered. These tests are very sensitive to medications that the patient may be taking. In addition, there are other clinical syndromes that can have increased catecholamines and these should be ruled out when making a diagnosis. The state-of-the art in testing involves measuring plasma catecholamine. This test is somewhat difficult to perform and is not routinely available, but seems to have the highest diagnostic accuracy. A platelet catecholamine determination is currently an investigative tool and may have some potential in the future.

Putting the case together, Jim noted that the patient had a calcitonin level of 5015 pg/ml. This essentially established a diagnosis of medullary carcinoma of the thyroid. He speculated that metastatic medullary carcinoma would be found in the liver. Next, Jim considered the Multiple Endocrine Neoplasia Syndromes (MEN syndromes).

MEN 2A ("Sipple Syndrome") is medullary carcinoma of the thyroid, pheochromocytoma and parathyroid hyperplasia. Jim noted that the CPC patient had evidence of parathyroid hyperplasia, as indicated by the PTH level which was elevated, and the parathyroid hormone level, also elevated. All MEN syndromes are passed on as autosomal dominant diseases.

Finally, Jim outlined the possible relevance of MEN syndromes to 2-hit models of carcinogenesis, as proposed by Knudsen. Knudsen suggests that two separate mutations or events must take place before a cell changes to a malignant state. The first event may predispose a population of cells to malignant transformation, although these cells would appear normal by conventional criteria. They could differentiate normally and carry on normal function. If the first event takes place pre-zygotically, all the descendants of that cell carry the altered genotype. The second event takes place randomly. If this second event happens with sufficient frequency, the result would be multifocal tumors appearing within susceptible cell populations. The resulting state is a familial tumor syndrome.

Dr. Weinstein thanked Jim for his scholarly and insightful discussion. Nancy Benton, representing the third year class, concurred with Jim's analysis of the case.

Karen Kawala, a member of the graduating class who did a post-sophomore fellowship year in pathology and was co-recipient of this year's Sir William Osler Prize in pathology, described the findings of liver biopsy and autopsy. The liver biopsy showed metastatic carcinoma with neuroendocrine features. Also at the time of surgery, an intrahepatic arterial catheter was placed and, over the next several weeks, the patient received two courses of chemotherapy. The patient did poorly, deteriorated with multisystemic failure and died seven weeks after admission to Rush.

As Jim had concluded, the patient had medullary carcinoma of the thyroid, pheochromocytoma and parathyroid hyperplasia, characteristic of Sipple Syndrome or Multiple Endocrine Neoplasia, type 2A. A review of the patient's autopsy findings illustrated many features of the syndrome. At autopsy, the thyroid weighed 12 gms and contained tumor surrounded by normal tissue. The tumor was composed of sheets and nests of neoplastic cells. Congo red staining demonstrated the presence of amyloid, a feature of medullary carcinoma.

Both adrenal glands were involved with tumor. The right weighed 58 gms and an immense left adrenal was totally replaced with tumor and weighed 1400 gms. Chromaffin granules characteristic of pheochromocytoma were demonstrated. Widespread metastatic disease involved the liver, which weighed 7500 gms (normal is 1500 gm). The tumor appeared to be metastatic pheochromocytoma. Metastatic pheochromocytoma was also present in the bone, spleen and lungs. The parathyroid glands were hyperplastic. Karen concluded that the CPC patient did have Sipple Syndrome. Dr. Weinstein congratulated Jim and his classmates for their eloquent and informative discussions of the case.

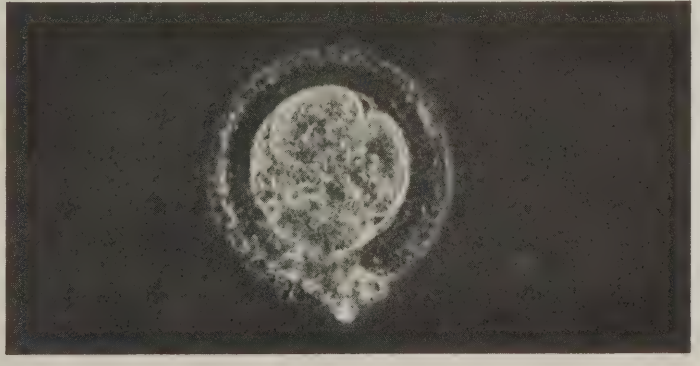
Dr. Stibolt thanked Dr. Weinstein for organizing the CPC and then presented Jim with a testimonial from the Alumni Association of Rush Medical College, together with the Class of 1985, citing James M. Goodrich for demonstrating "outstanding clinical skill" as the case discussor.

Human In Vitro Fertilization

By W. Paul Dmowski, M.D., Ph.D. and Rita Basuray, Ph.D.

Following is a presentation by Drs. Dmowski and Basuray, which was featured during Reunion Weekend as a minicourse for CME credit. Dr. Dmowski is a senior attending and director of the Section of Reproductive Endocrinology/Infertility, Department of Obstetrics and Gynecology at Rush-Presbyterian-St. Luke's. Dr. Basuray is director of the IVF laboratory.

The first successful human in vitro fertilization (IVF) procedure was performed by the British team of Edwards and Steptoe, with the first "test tube" baby born in July, 1978, in Oldham General Hospital, near Manchester, England. After this initial clinical success, numerous IVF centers opened in Europe and Australia. In the United States, the first IVF program—at the Eastern Virginia Medical School in Norfolk—was not begun until February, 1980. This delay was primarily the result of a 1974 moratorium on federal funding for IVF research by the U.S. Department of Health, Education and Welfare. In Illinois, the development of the first IVF centers was delayed even further by the abortion law of 1975, which was interpreted as prohibiting procedures such as IVF. In response to the challenge of this statute, a U.S. District Court judge, on February 4, 1983, issued a memorandum opinion that IVF is entirely permissible under Illinois law. Since that ruling, three IVF centers have been established in Chicago, one of them being the IVF program at Rush-Presbyterian-St. Luke's, which opened on November 9, 1983. In 1984, there were about 50 IVF programs in the United States. Worldwide, more than 1000 babies have been conceived and born using IVF procedures.



Tiffany Lynn Autrey, the first baby born in the Medical Center's IVF program, at age six months (above) and at the embryo stage (below).

The Medical Center's IVF program was developed under aegis of, and in close collaboration with, the IVF program at Norfolk. Our IVF laboratory is located within the OR suite, in close proximity to OR 13, where laparoscopies for IVF are performed. The laboratory is fully equipped with sophisticated state-of-the-art instrumentation and is connected by the video and audio system to OR 13. The Medical Center's IVF laboratory has been visited and admired by IVF experts from around the world.

IVF is a medical procedure which, to many couples, offers the only hope for a child of their own. The principles of this procedure include: aspiration of mature oocytes from a woman's ovary; external (in vitro) fertilization; and subsequent transfer of developing embryos into the woman's uterus. The main indication for IVF is absence or disease of the fallopian tubes, which cannot be corrected by surgical tuboplasty, or when tuboplasty procedures have failed. Other indications include persistent pelvic adhesions, endometriosis, and, sometimes, unexplained infertility, male infertility and immunologic infertility factors. Contraindications for IVF are essentially the same as contraindications for laparoscopy or pregnancy. Success rates for IVF have been lower in women over 40, thus an advanced age may also be a relative contraindication.

IVF protocol consists of four phases: ovarian stimulation, oocyte retrieval, in vitro fertilization and embryo culture, and embryo transfer. Ovarian stimulation is achieved with agents such as clomiphene citrate or human menopausal gonadotropins (Pergonal). The purpose of ovarian stimulation is to recruit multiple ovarian follicles and, therefore, stimulate maturation of a larger number of oocytes than would occur during the normal menstrual cycle. By recruiting four to six oocytes, the chances for fertilization, normal embryo development and subsequent pregnancy are increased. In our IVF program, ovarian stimulation regimen consists of clomiphene citrate, 50mg daily from day 3 to 7 of the cycle, combined with 1 amp of Pergonal administered daily from the third day of the cycle until adequate follicular development is achieved (usually day 10). Follicular development is monitored by serum estradiol levels and by ultrasonic identification and measurements of the ovarian follicles. When at least three preovulatory follicles (16-20mm in diameter) are identified, and serum estradiol level is 1000-1500 pg/ml, the patient

receives 10,000 IU of human chorionic gonadotropin (HCG) intramuscularly. HCG injection induces further follicular and oocyte maturation. Between 34 and 36 hours after HCG injection, laparoscopy is performed. At the time of laparoscopy, ovaries are visualized and ovarian follicles are identified and aspirated. The laparoscopic procedure is performed under video monitoring so that the entire IVF team, both in OR 13 and in the laboratory, can participate actively. Follicular fluid and oocytes are aspirated into test tubes containing pre-warmed Dulbecco's buffer. The tubes are evaluated by the nurse, labeled and transferred expediently to the IVF laboratory. In the laboratory, oocytes are identified in the follicular fluid and evaluated by the embryologist, using sophisticated microscopic equipment.

The oocytes in different stages of maturity are surrounded by zona pellucida and multiple layers of follicular cells, forming the corona and the cumulus. Oocyte maturity is assessed morphologically by the appearance of corona-cumulus-complex and by the presence of the first polar body. After evaluation, oocytes are transferred to nutrient culture media and placed in the incubator. Depending upon the stage of maturity, oocytes are incubated for a varying length of time before insemination (6 to 36 hours). The corona-cumulus-complex has to be penetrated by spermatozoa for fertilization to occur. While the oocytes are being incubated, the semen sample obtained from the husband is being processed. Motile spermatozoa are isolated from seminal plasma and suspended in incubation media. Sperm suspensions are also incubated in the controlled environment of incubators. When the oocytes reach maturity, they are inseminated with 100,000 to 500,000 motile spermatozoa, depending upon the initial quality of the semen sample. Sixteen hours later, oocytes are examined under the microscope for signs of fertilization. By this time, the fertilized oocyte should have released a second polar body and two pronuclei should be visible. Within 24 hours of insemination, cleavage of the fertilized oocytes begins. At 48 hours the embryos have attained a 4 to 8 cell stage and are still surrounded by the zona pellucida. At this time all healthy, dividing embryos are placed in a thin catheter and trans-cervically introduced into the patient's uterus. The procedure is performed in Trendelenberg position under mild sedation. Following embryo transfer the patient remains in the same position for 6 hours, and at bedrest for 48 hours.

Following embryo transfer, hormonal supplement in the form of progesterone or HCG is used to increase chances for implantation. Simultaneously, serum progesterone, estradiol and B-HCG levels are monitored three times a week. About 10 days after transfer, if implantation has occurred, there is a characteristic rise in B-HCG levels and increase in serum estradiol and progesterone concentrations. A week later, ultrasound examination can detect the first evidence of intrauterine pregnancy.

The Medical Center's IVF laboratory is functionally divided into two areas. The one closest to the operating facilities contains microscopes, incubators and other equipment for handling oocytes, spermatozoa and embryos; the opposite area, with a separate entrance, is used for the preparation of culture media and for water purification. Laboratory preparations for IVF procedures begin at the time when the patient begins ovarian stimulation protocol. City water is purified in sophisticated filtering and distillation systems. Virtually all particulate matter (organic and inorganic) to the size of two microns is removed by seven separate filters and then the water is further purified by distillation. Disposable sterile glassware and plasticware are used to minimize chances of contamination. Culture media are prepared by dissolving in the purified water, the exact amounts of inorganic (sodium, potassium, bicarbonate, chloride, etc.) and organic (glucose, pyruvic acid, lactic acid, amino acids, etc.) components in the presence of antibiotics. The media are adjusted for pH and osmolarity, and are stored at 4 ℃ before use. Prior to use, the media are supplemented with pre-ovulatory maternal serum and tested for their ability to support embryo growth in the mouse quality control system. In this assay, two-cell mouse embryos are cultured to the blastocyst stage. Only media that can support mouse embryos are used in the human IVF system.

Success rates for IVF procedures vary between 5 and 30 percent per transfer and are not as high as earlier anticipated. Although in selected groups of patients and in small series, IVF pregnancy rates have been reported as high as 30 to 39 percent, most centers claim an overall success rate in the range of 14 to 17 percent. Several centers which were unable to achieve pregnancy closed after one to two years of operation. Overall results at Rush-Presbyterian-St. Luke's, expressed in pregnancies per transfer, are 35 percent for all pregnancies, including so-called chemical pregnancies (positive pregnancy test, early abortion) and 14 percent for clinical pregnancies. The success rates for IVF, however, have to be looked at in the context of the efficiency of human reproduction under normal circumstances. The so-called "effective fecundability," which is the probability of conception during a single cycle resulting in a live birth, is only 0.2 to 0.25 for a 25-year-old woman. This means that, in a given cycle, young fertile couples have a 20 to 25 percent chance for conception. Human reproduction is a relatively inefficient process and, in this respect, IVF techniques offer reasonably good results. We hope that further improvements in IVF technology will increase the IVF success rates.

Introduction of IVF procedures allowed scientists to observe, for the first time, human fertilization and early phases of human embryonic development. Although our knowledge of early steps in human reproduction has increased almost logarithmically since the first successful IVF procedure, a lot remains to be learned, not only to improve IVF success rates, but also to better understand and control human fertility. However, for legal and ethical reasons, many questions pertaining to early human reproduction cannot be answered by the human IVF program. Because of this, we are developing a primate IVF program in conjunction with, and as a direct extension of, the human IVF activities. We anticipate that the primate IVF program will further strengthen quality control of the human system, will permit evaluation and introduction of new methodology, will improve our success rates, and will introduce new and exciting research opportunities.

Alcohol and the Heart: A Match Made in Heaven or Hell?

James W. Merricks, M.D. '34, William Graettinger, M.D. '75, John Graettinger, M.D. Rush University marshal, and John H. Olwin, M.D. '35.

By **William F. Graettinger, M.D. '75**

The following report by Dr. Graettinger was featured during Reunion Weekend '85 as a Department of Internal Medicine Grand Rounds presentation offered to alumni for CME credit. Dr. Graettinger is an assistant professor of medicine at the University of New Mexico School of Medicine, and director of both the cardiovascular fellowship program and the cardiac noninvasive laboratory of the Albuquerque Veterans Administration Medical Center. His current research interests include validation and application of quantitative echo-doppler techniques, supported by a grant from the American Heart Association, New Mexico Affiliate; and the effects of acute chronic alcohol ingestion on the cardiovascular system, supported by a grant from the Veterans Administration.

At rest, acute intoxication (Blood alcohol levels or BALs of 150mg/100ml) in normal nondrinking young volunteers causes a decrease in peripheral vascular resistance and a dose-dependent depression of left ventricular function (manifest by decreased ejection fraction and rate of pressure development), with resultant compensatory increase in heart rate. The alcohol withdrawal state is characterized by a decrease in peripheral vascular resistance with secondary increase in cardiac output. During mild exercise, compensatory sympathetic mechanisms are invoked which maintain ventricular function at or near normal levels. At higher levels of exercise, moderately high doses of alcohol (BAL of 200mg/100ml) overcome these compensatory mechanisms and produce a decrease in left ventricular function.

Prior exposure to alcohol appears to modify its hemodynamic effects. In individuals who chronically consume alcohol, yet who have no signs or symptoms of heart disease, preclinical left ventricular dysfunction can be demonstrated by an abnormal increase in left ventricular end diastolic pressure in response to an increase in afterload. This suggests a decrease in left ventricular functional reserve as a result of chronic alcohol ingestion. However, in response to alcohol ingestion, depression of left ventricular function occurs at higher BALs than those which cause dysfunction in nondrinkers. In individuals who manifest overt heart failure, BALs which cause no demonstrable effects in nondrinkers will cause exacerbation of heart failure. All of these changes occur at BALs which are commonly attained during "social" drinking.

Alterations of myocardial cellular metabolism including increased oxygen consumption, inhibition of the sodium-potassium pump and decreased actin-myosin interactions occur acutely with exposure to alcohol. Chronic exposure causes changes in enzymatic binding, decreased membrane fluidity, increased sarcolemmal permeability to sodium, decreased protein synthesis and alterations in membrane phospholipids. The role of these changes in the hemodynamic alterations discussed above is unclear. Some or all of these changes may, over time, cause myocardial injury which results in permanent heart damage.

Alcohol or its first metabolic product, acetaldehyde, may cause cardiac damage by direct toxic effects. Nutritional deficiencies, especially of thiamine, were previously thought to be etiologic in alcoholic heart disease, but do not appear to play a major role in its development. Toxic additives (cobalt and lead) have caused sporadic outbreaks of heart failure but are the exception rather than the rule.

Alcohol appears to be the most common etiology of secondary, nonischemic, dilated cardiomyopathy in the United States. Alcoholic cardiomyopathy is under diagnosed, probably due to the difficulties encountered in obtaining an accurate alcohol consumption history. It should be considered in the differential of unexplained congestive heart failure in individuals less than 50 years of age with a history of chronic alcohol consumption.

Alcoholic cardiomyopathy is characterized by signs and symptoms of pulmonary and systemic venous congestion, atrial arrythmias and atypical chest pain. Patients

may also present with systemic or pulmonary embolism, as in other dilated cardiomyopathies. Sudden death is more common in alcoholics and patients with alcoholic cardiomyopathy than in the nondrinking population. Other causes of dilated cardiomyopathy must be excluded, with particular attention paid to history of sustained hypertension, chronic mitral regurgitation and coronary artery disease.

Prognosis in patients with alcoholic cardiomyopathy is worse if symptoms of congestive heart failure have been present for a long time prior to diagnosis, if the patient continues to drink, and if cardiomegaly is persistent. Many cases have been reported in which patients have improved with *total* abstinence from alcohol. The therapy, therefore, includes abstinence, digitalis and diuretics in the acute phase, in some cases, and measures to assure adequate nutrition. Abstinence is the only therapeutic modality that has been shown to positively affect prognosis.

The Holiday Heart Syndrome, described by Ettinger in the late 70s, is the clinical picture of a previously normal individual who presents with atrial dysrhythmias after binge drinking, superimposed on a history of chronic alcohol consumption. The most common dysrhythmia is atrial fibrillation and, less common, atrial flutter. The patient's electrocardiogram and chest x-ray is usually normal before and after the arrythmias. The peak incidence is during and just after major holidays, hence the name Holiday Heart Syndrome.

Moderate alcohol consumption (one to two ounces per day) has been related to an increase in high density lipoprotein (HDL) blood levels, which are inversely related to coronary artery disease (CAD) risk; a decrease in low density lipoprotein (LDL) blood levels, which are directly related to CAD risk; and a decrease in the incidence and mortality of CAD in some studies. Although other studies yield conflicting results, this epidemiological data appears to be solid. Recent data suggests that the increase in HDL is of HDL sub-types which are not protective for CAD, so that the mechanism by which alcohol exerts its protective effects is unclear. Due to the other noncardiac effects of alcohol, each practitioner must make the decision whether or not to recommend the consumption of moderate alcohol in an effort to reduce CAD in each patient.

Data for acute myocardial injury during alcohol intoxication includes biochemical and enzymatic abnormalities and the occurrence of acute myocardial infarction with normal coronaries. Small intramyocardial vessel disease is more common in chronic alcohol users and may be in part responsible for the observed indicators of injury. A causal relationship between alcohol ingestion and coronary vasospasm has been established and may also play a role. And finally, *in situ* thrombosis with clot lysis has been postulated as an etiology of acute injury.

Dr. Graettinger briefly discussed some of his preliminary work documenting acute injury in a small number of acutely intoxicated patients by abnormalities of the myocardial specific fraction of creatine kinase. The discussion was concluded by a summary of the cardiovascular effects of alcohol and questions were entertained from the audience.

Members of the Class of '35 standing for a round of applause at the Commencement Banquet.

Commencement Banquet 1985

The traditional Commencement Banquet, a highlight of Reunion Weekend, spotlighted **Samuel G. Taylor III, M.D. '32,** as this year's Distinguished Alumnus. Winners of Rush Medical College faculty awards and recipients of honorary Alpha Omega Alpha memberships were also recognized. (See the following stories.)

As master of ceremonies, **R. Joseph Olk, M.D. '75,** Alumni Association president, welcomed members of the Classes of 1935 and 1985 as special guests. Graduates celebrating their five and ten-year reunions, along with other alumni, Rush Medical College faculty, families and friends were also warmly greeted as they gathered in the Gold Coast Room of the Drake Hotel, where dinner was followed by dancing.

Leo M. Henikoff, M.D., president of Rush-Presbyterian-St. Luke's, used the occasion to announce the establishment of the **Ralph C. Brown, M.D.,** Chair of Internal Medicine (see Medical Center News). The late Dr. Brown, a **1904 graduate** of Rush, was the father of Rush alumnus and Trustee, **R. Gordon Brown, M.D. '39.**

Dr. Henikoff explained that although this action had yet to be placed before the Medical Center's Board of Trustees, both he and Dr. Gordie Brown agreed that "there could be no better place than a gathering of the Alumni Association to make this preliminary announcement."

Dean Henry P. Russe, M.D., noted that "Rush Medical College continues to produce the very highest quality physician," citing the clinicopathological conference presented earlier that morning by **James Goodrich, Class of 1985,** followed by Medical Grand Rounds on alcohol and the heart, given by **William F. Graettinger, M.D., Class of 1975.**

"The academic achievements of our students and their selection for competitive residency training positions (see page 39) continues to demonstrate our stature among major medical schools in the United States," Dr. Russe added. "Rush is a vibrant and exciting place because of the excellence of our students, the interests and excellence of its faculty and staff, and especially because of the continued interest and support of its alumni. My thanks and congratulations to all of you."

The Class of 1985 stood as Dr. Olk presented them for formal induction into the Alumni Association of Rush Medical College. He singled out **Nicki Lekas, Class of '85,** who served as the official liaison between the Alumni Association and her class, and announced that **Nina Paleologos, Cathy Rives Silverman** and **Wendy Stock** will serve as class agents for 1985. He also encouraged the graduates to develop and maintain an interest in the Alumni Association and stressed the need for their active participation in alumni affairs.

Betsy Rest, selected by the graduating class to respond on their behalf, thanked the Alumni Association "for this warm and elegant welcome into your ranks. I'm sure it's the beginning of a long and lasting friendship.

"Well, Class of '85," she continued, "we made it. We get to be alumni now. Lest you new graduates get so carried away with graduating that you forget what medical school was like, I thought I'd give you a capsule summary of what filled our thoughts during the past four years.

"First year, of course, was dominated by doubts. Doubts about whether we could make it through the first anatomy lab, let alone the whole year. New study habits were learned, such as how to read while sleeping or while driving to school, how to remove the smell of formaldehyde. . .Would we ever know it all?

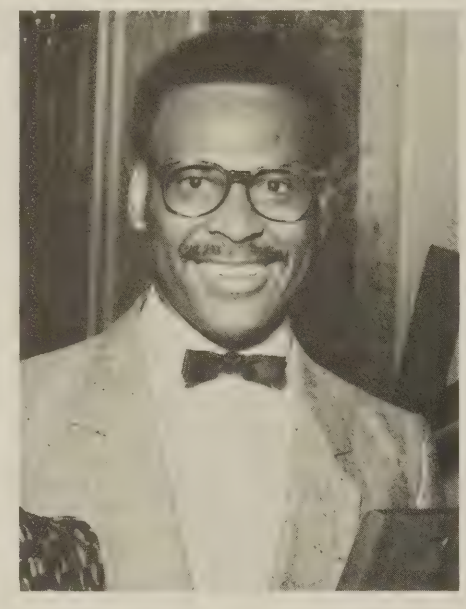
"By the second year, we *thought* we knew it all. "We were sure we could handle everything, until it came to Part I of the national boards. That, I think, was to keep us humble. This was also the year we first dealt with real patients, taking histories and doing physicals. . .

"Third year was the year no one slept. Medicine, surgery, ob-gyn, etc., occupied our days, our nights and everything else. Fourth year finally came and we were at the top of the heap—traveling to 5,000 interviews in one week, a sort of, if it's Tuesday, this must be Hopkins kind of thing. Balancing goals, families, friends we somehow each came out with a match list which was to determine our future.

"Many things helped us get through this time. Tonight, we'd like to thank families and friends, husbands, wives, parents and children who supported our effort over the past four years. We really couldn't have done it without you folks and we appreciate your help. Also, the cohesiveness of the class with its many diverse interests and personalities was a support. There were many very important relationships established. We had a dedicated faculty and administration who worked for and with us all the way through. Our class would like to thank all of these individuals."

Betsy Rest, M.D. '85

Commencement Banquet: Award Winners



Cedric Coleman, M.D.

Roger C. Bone, M.D., as "hooder" at Commencement.

The following were singled out for special honors by vote of the Class of '85 and received their awards at the Commencement Banquet.

Alexander C. Templeton, M.D., senior attending and professor in the Department of Pathology, was presented the Daniel Brainard Award *in absentia* as the outstanding teacher in the basic sciences;

John A. Schaffner, M.D. '74, associate attending and assistant professor in the Department of Internal Medicine, was voted the outstanding physician-teacher and received the Phoenix Award; and

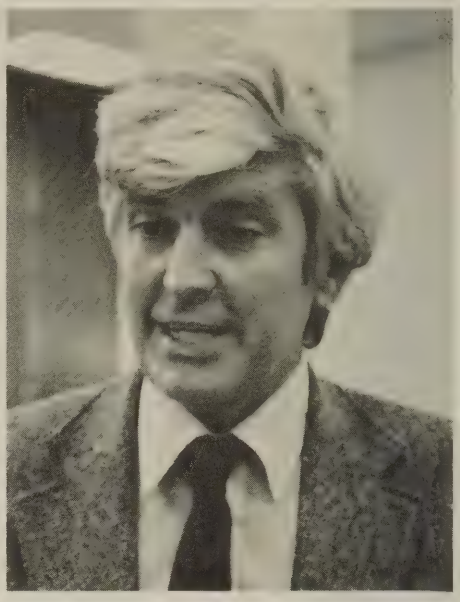
Cedric Coleman, M.D., resident in the Department of Internal Medicine, received the Aesculapius Award as the outstanding resident-physician.

The awards were presented by **Betsy Rest, Class of '85,** who had served as president of the student council during her senior year.

Recognized also was Roger C. Bone, M.D., the Ralph C. Brown, M.D., Professor and Chairman of the Department of Internal Medicine, who was selected by the graduates to present their doctor of medicine hoods at the commencement ceremony.

Bradley Hubbard, Class of '85 and president of the Zeta Chapter of Alpha Omega Alpha, the medical honor society, presented honorary AOA membership awards to an alumnus and a faculty member "who have made significant contributions to medical science and related fields."

Honored were: Robert C. Carton, M.D., senior attending and professor in the Department of Internal Medicine, and director of pulmonary medicine; and **Hans W. Lawrence, M.D. '27,** an avid supporter of Rush Medical College and its students. Dr. Lawrence, who was presented the award *in absentia,* has spent 50 years in the area of preventive medicine, toxicology and applied physiology. He was a medical director of Proctor and Gamble for 20 years and, after retiring in 1963, was involved in setting up the medical department at NASA.



Alexander Templeton, M.D.

John Schaffner, M.D. '74

Robert Carton, M.D.

Distinguished Alumnus: Samuel G. Taylor III, M.D.

The Rush Medical College Alumni Association's highest honor was awarded this year to **Samuel G. Taylor III, M.D. '32.**

James W. Merricks, M.D. '34, introduced Dr. Taylor, his "good friend and colleague," as the 1985 Distinguished Alumnus and presented the award at the Commencement Banquet during Reunion Weekend.

Dr. Taylor was one of the first clinicians in the country to recognize the potential importance of hormones in the treatment of some forms of cancer, particularly of the breast. He was a member of the Tumor Council at the University of Illinois College of Medicine for almost 25 years and served as director of both the Steroid Therapy Division and the Tumor Clinic at Illinois from 1950 to 1971.

In 1954, under Dr. Taylor's leadership, the Section of Medical Oncology in the Department of Medicine was established at Rush-Presbyterian-St. Luke's and continued under his direction until 1971.

In October, 1984, a well attended symposium was held at the Medical Center marking the 30th anniversary of the founding of "Sam's Oncology Section," as well as celebrating his 80th birthday. Today the oncology section is one of the most active participants in cooperative clinical cancer trials in the country.

Noted for his leadership in medical oncology, Dr. Taylor was a trustee and consultant to the National Cancer Institute; advisor to the Cancer Control Program; chairman of the Committee on Cancer of the American College of Physicians; president of the Illinois Cancer Council; and director of the Cancer Council Comprehensive Cancer Center Program. In 1978, the Samuel G. Taylor III, M.D., Chair of Oncology was established in his honor at Rush University.

"Dr. Taylor's disposition still radiates sunshine, even after the many, many years he has spent fighting that dread disease known as cancer," Dr. Merricks said. "If I were a cancer cell, and Sam was called in for treatment, I'd quick pack my bag, grab the next rocket ship for outer space, and leave no forwarding address."

Dr. Taylor accepted the award and then took a look at the future of oncology, predicting that many more types of cancer will be cured by the turn of the century. The incidence of tumors of certain other sites will have dropped precipitously by then, he said, because of changes in lifestyle, smoking, exposure to other carcinogens, diet and so forth. "For those in doubt," Dr. Taylor suggested, "look at what has happened just since 1940, when I first entered the field."

Dr. Taylor noted the marked improvement in the rate of surgical techniques and radiation, and the development of the specialty of radiation therapy. Improved biochemical markers and diagnostic radiology, magnetic resonance, and other techniques have made early diagnosis and, therefore, early therapy possible. With the multidisciplinary team approach, radiologist, surgeon and the medical oncologist, "work together and make a very adequate approach to the problem.

"All this," Dr. Taylor continued, "has made possible the miracle of cures of disseminated cancer such as choriocarcinoma which was the first, leukemia, Hodgkins disease, lymphoma, testicular cancer, Wilm's tumor, and osteosarcoma. These are all the results we've seen very recently and they are really miracles.

"Where cures have not been accomplished, prolonged survivals, improved quality of life and palliation are possible in prostate cancer, breast cancer, lung cancer and occasionally in other tumor sites. The identification of certain common carcinogens and the avoidance of such as tobacco will undoubtedly reduce the incidence of pancreatic, bladder, head, neck and lung cancer in the future."

Dr. Taylor turned to the Class of '85, saying that "as you start your residencies in no matter what field, you can contribute to the goal, set by the National Cancer Program, to reduce the incidence of cancer mortality by 50 percent by the year 2000. Keep ever alert to where and to whom you can refer your patients for the best treatment. Lifestyle can prevent the development of most cancers, especially lung cancer, which is a self-inflicted cancer. If you can persuade one patient to stop smoking, you may have not only saved a life, but helped me with my predictions.

"If all goes as I predict, you'd better think twice before you select oncology as your specialty. You might find yourself in the same predicament that my colleague, Dr. Janet Wolters, had when she lost her job as director of the Respiratory Center for Polio Victims when Salk eliminated all her patients. And, luckily for me, I had the chance to give her an appointment in the newly established Section of Medical Oncology. Perhaps immunology may destroy our section and we'll be looking for a job in the Institute for the Treatment of the Common Cold."

Samuel G. Taylor III, M.D. '32, surrounded by his family.

Rush University Commencement

Three hundred fifty-six students were named to receive degrees from Rush University at its 13th annual commencement exercises June 8 at Medinah Temple.

Degrees were conferred by Harold Byron Smith, Jr., chairman of the Medical Center's Board of Trustees, and Leo M. Henikoff, M.D., president of the Medical Center and the University.

This year Rush granted 117 doctor of medicine degrees, seven doctor of nursing science degrees, and four doctor of philosophy degrees from The Graduate College. (One graduate received both an M.D. and a Ph.D. degree.)

The College of Nursing had 186 graduates, including 65 receiving master of science degrees and 114, bachelor of science. The College of Health Sciences conferred 49 degrees—15 bachelor of science with a major in medical technology and a total of 34 master of science degrees: 11 with a major in health systems management; 10, clinical nutrition; six, audiology; five, speech/language pathology; and two, medical physics.

An honorary degree of doctor of humane letters was awarded to Edward N. Brandt, Jr., M.D., Ph.D., chancellor of the University of Maryland at Baltimore, who delivered the commencement address.

Speaking before Rush graduates, Dr. Brandt emphasized that "it is simply not enough to serve our patients well.

"We must also contribute to societal decision making," Dr. Brandt urged. "That means getting involved. It means taking the time to understand the issues, problems and potential solutions for them. It means speaking out to our fellow citizens, government officials and our elected representatives. They must know how we think about issues and methods for problem solving. That is the only way we can determine what happens next."

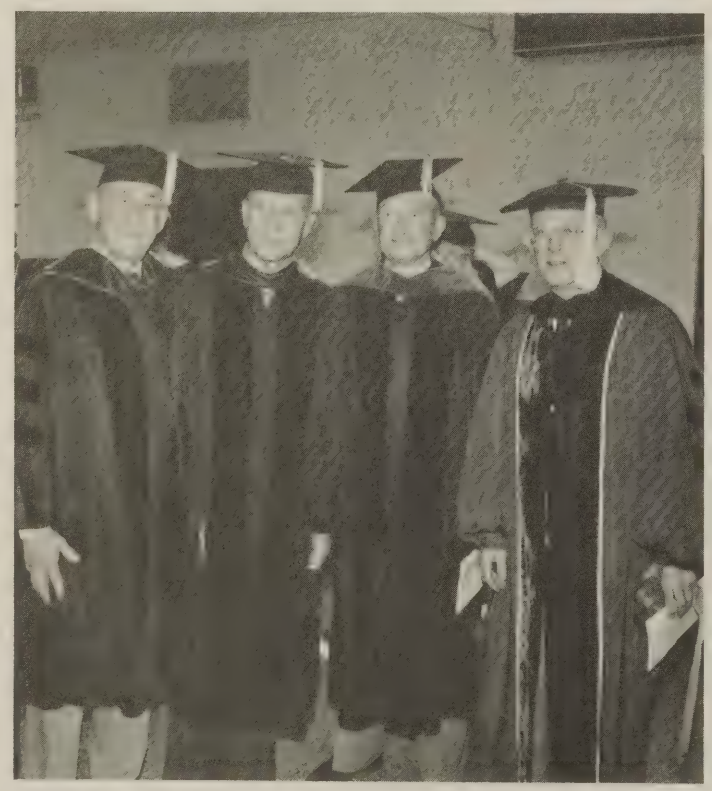
Until this past January, Dr. Brandt was assistant secretary for health in the U.S. Department of Health and Human Services. During his four years in that post he testified before Congress more than 90 times and has been credited with being the driving force behind the government's ongoing efforts to find the cause of and cure for AIDS (Acquired Immune Deficiency Syndrome).

Dr. Brandt earned his M.D. and a Ph.D. degree in biostatistics at the University of Oklahoma Medical Center. A faculty member there from 1961 to 1970, he also served as associate dean of the medical school, associate director of the medical center and chairman of the School of Health's Department of Biostatistics and Epidemiology.

In 1970, he joined the University of Texas at Galveston and seven years later became vice chancellor for health affairs in the University of Texas System Administration.

Once in Washington, Dr. Brandt accepted a presidential appointment to the Executive Board of the World Health Organization in 1982 and served as a United States delegate to WHO as well as to the Pan American Health Organization until last year.

Dr. Brandt was named an Outstanding Educator of America in 1972; he received an American College of International Physicians award in 1982.

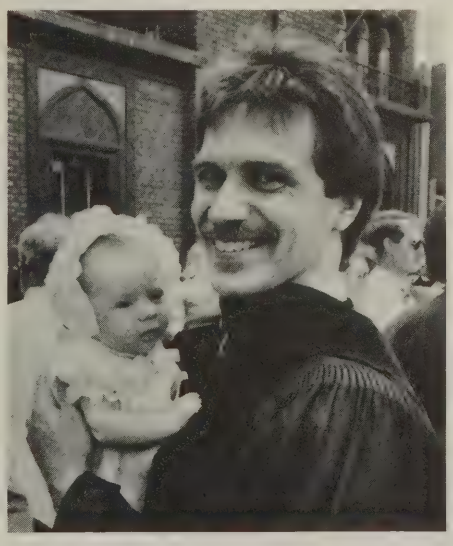


Members of the Class of '35, Jack Segal, M.D., Maurice Schneider, M.D., Ralph B. Cloward, M.D., and Marshall P. Welles, M.D., prepare for the commencement march.

Jeffrey Bernfield, M.D. '85

Student Honors and Awards

Pamela Sue Martell, M.D. '85, and family.



Lon McPherson, M.D. '85, with daughter, Brittany.

Honors presented at the eighth annual Rush University awards ceremony, held the morning of commencement, included the following which recognized medical students:

Alpha Omega Alpha Honor Medical Society

Undergraduate membership is extended to medical students who give promise of becoming leaders in the field of medicine. Members of the Rush Medical College Zeta Chapter are:

Richard M. Baley
Thomas R. Chauncey
*Candace Warner Dorsher
*Peter T. Dorsher
*John G. Fitz Gibbon, Jr.
*James M. Goodrich
John J. Hayes
*Bradley L. Hubbard
Ned R. Jacobson
*Karen S. Kawala
Steven Knezevich
*Nicki E. Lekas
Charles R. Denver Lindley
William M. McLeish
*Michael C. Moran
Ellen Beth Rest
*Wendy Stock
*John R. Tauscher
Caryn M. Vogel

*Installed as members in 1984.

The Dayton Ballis Humanities Fellowship to a Rush Medical College student for academic excellence in the humanities related to medicine—Emily J. Senay.

The Nathan M. Freer Prize, endowed in 1892, is given to the outstanding senior medical student as voted by the faculty—James M. Goodrich.

The Henry M. Lyman Memorial Prize, endowed in 1908, is given each year to a junior medical student for outstanding work as voted by the faculty—Susan Anderson-Nelson.

The Ciba-Geigy Award for outstanding community service by a sophomore medical student—David N. Schwartz.

The Lemmon Company Student Award to the graduating medical student who has excelled in the study of obstetrics and gynecology as demonstrated by excellence in scholarship and concern for patients—Chandler S. Barnes.

The Sir William Osler Pathology Prize to the medical students who have demonstrated outstanding achievement in diagnostic or experimental pathology—Bradley A. Bertram and Karen S. Kawala.

The Undergraduate Cardiology Award to the graduating student who has had the best performance in a cardiology elective course—Bradley L. Hubbard.

The James B. Herrick Internal Medicine Award to the graduating student who has demonstrated outstanding achievement in internal medicine—James M. Goodrich.

Samuel G. Taylor III Prize to the graduating student who has demonstrated excellent achievement in medical oncology—Lon H. McPherson.

The Nephrology Award from the Muehrcke Family Foundation to the graduating student who has demonstrated outstanding achievement in the field of nephrology—Karen S. Kawala.

The Department of Family Practice Award to the graduating student who has demonstrated academic excellence in family medicine—Linda Evans-Beckman.

The Sandoz Award to the graduating student who has demonstrated outstanding achievement in the field of psychiatry—Cathy M. Rives.

The Upjohn Achievement Award to the senior medical student with the best research project—Gary M. Kramer.

The American Medical Women's Association Scholarship and Achievement Citation—Candace Warner Dorsher, Karen S. Kawala, Nicki E. Lekas, Ellen Beth Rest, Wendy Stock and Caryn M. Vogel.

Medicine Is Her Third Career

The following story spotlighting one of Rush's newest alumni originally appeared in NewsRounds, *a publication for employees and students at the Medical Center.*

For Cathy Rives Silverman, embarking on her third professional career—now as a doctor of medicine—making a contribution is uppermost in mind.

"I like to contribute to what's around me," says Cathy, who was an actress and a teacher before starting Rush Medical College as an "older" student at age 28. And, true to form, she soon got involved in a number of projects.

First, as a summer project in the dean's office, she did a literature review on the status of medical education and problem-based learning. The research was used as background information in the development of the alternative curriculum program (which is offered to a limited number of students for the first two years of medical school. Instruction is primarily in small groups, using a clinical problem as the focus for discussing basic science).

Cathy also was a student advisor for the ongoing multidisciplinary research project on student adaptation to medical school. Her interest resulted in three papers and she presented one, on the role alcohol plays in students' lives, at the fifteenth annual medical-scientific conference of the American Medical Society on Alcoholism.

As actress and teacher, Cathy helped high school students write and perform their own work about their feelings during the desegregation process in Atlanta in the early 1970s. She was also at the Academy Theatre from 1970 to 1974, and then moved to Minneapolis to form an experimental theatrè company called "At the Foot of the Mountain."

For three years (before going back to school and getting a bachelor's degree in psychology from UCLA) Cathy appeared in some plays and did all the theatre jobs that are the behind-the-scenes fabric of every successful production.

She put that experience to use at Rush in an educational project designed to teach residents in pediatrics how to deal with patient-family crisis situations.

Cathy devised patient-doctor simulations, with herself playing the role of a bereaved mother whose child had died in the hospital. The simulations were also videotaped so that the residents could see and study themselves and their reactions. Cathy also wrote a simulation outlining an encounter between a physician and teenage mother suspected of child abuse.

"I had a chance to be creative and help at the same time," says Cathy, who especially likes to do roles about relationships. This fact may have something to do with her choice of specialty for residency—psychiatry.

"Psychiary is creative, scientific, very people-oriented and, for me, the most exciting field of medicine," Cathy says. Her enthusiasm and commitment are reflected in the fact that she received the Sandoz Award—"for the graduating student who demonstrated outstanding achievement in the field of psychiatry."

She began her residency at the Medical Center after returning from a honeymoon in Oregon; her wedding was June 9, the day after commencement.

Cathy Rives Silverman, M.D. '85

Wendy Stock, M.D. '85, and Amy Light, M.D. '85.

A Fond Look Back

By **Ralph B. Cloward, M.D. '35**

It is a great honor and privilege to act as class agent for the Class of 1935, and to be asked to speak on behalf of the 50-year graduates. I am pleased to see so many of my classmates here, demonstrating that our vital signs are still stable! I was happy to learn that many of them, like myself, are still in active practice.

The Alumni Association has asked me to give "A Fond Look Back." I presume this to mean reminiscences of what was happening in the country, in Chicago and at Rush Medical College 50 years ago. Reminiscences come easy after you have passed your 75th birthday!

Well, 1934 and 1935 were memorable years. The first half of the decade had witnessed the devastation of the Great Depression. By the time Franklin D. Roosevelt became President on March 4, 1933, every last bank in the nation had had to close its doors.

Will Rogers said about Roosevelt's election, "America hasn't been as happy in three years. No money, no banks, no work, no food, no nothing. But the whole country is with him, just so he does something. If he burned down the Capitol, we would cheer and say, well, we at last got a fire started anyhow."

And fire he did start; The New Deal, Social Security, The Wagner Labor Act and the alphabet agencies, all in order to spur economic recovery.

When I started my last year at Rush, 1934, Flossie and I had just married. We rented a noisy third floor, one-room apartment at 1818 Ogden Avenue, next to the el. We could look down on the White Castle hamburger stand in the middle of Ogden Avenue, where we could buy dollar-sized hamburgers for five cents each, to supplement our lean diet.

We had a bed that fell down out of the wall, and a small wooden radio so we could listen to Amos and Andy and Edgar Bergen and Charley McCarthy. Once a month we would ride the el to the North Side and dance at the Aragon Ballroom to the music of Wayne King, or we'd save up the price of a show and see the vaudeville at the Chicago Theatre.

Some of the activities that occupied our time as senior medical students included giving anesthetics to kids for tonsillectomies, pouring ether out of a can on a mask until the pupils dilated and respirations ceased; giving weekly intramuscular injections of mercury or bismuth in the bottoms of 40 to 50 patients with syphillis; spending two weeks at the Infectious Disease Hospital, doing lumbar punctures on kids with purulent meningitis, which had a 98 percent mortality rate; and, finally, the activity which influenced my decision to become a neurosurgeon: the six weeks I spent on the OB service during January and February, doing home deliveries.

During that period, I delivered 36 babies. I recall riding for an hour at midnight on a Halsted Avenue unheated streetcar in sub-zero weather. At the end of the line, trudging through knee-deep snow for two blocks carrying my heavy instrument bag, I finally arrived at the lonely house with a porch light left on, just in time to hear the cries of the baby that I had been sent to deliver! In those days, if the baby came before we arrived, we did not get credit for the delivery! Compared to that type of medical practice, brain surgery seemed like a breeze!

Permit me to share with you a poem that I read * at our golden wedding anniversary celebration last year. It sums up the philosophy of those of us who have enjoyed 50 years of medicine, and I hope will sustain each of the Class of '85 as you begin your long and hopefully rewarding professional careers.

Life's Finest Gifts

When you get on and you've lived a lot
and the blood in your veins isn't quite so hot,
and your eyes are dimmer than what they were
and the page on a book has a misty blur,
strange as the case may seem to be
then is the time you'll clearly see.

You'll see yourself as you really are
when you've lived a lot and you've traveled far;
when your strength gives out and your muscles tire
you'll see the folly of mad desires;
you'll see what then to your eyes had hid—
the countless trivial things you did.

For often the blindest are youthful eyes;
age must come e'er man grows wise.
Youth makes much of the mountain peaks,
the strife for fame and the goal he seeks,
but age sits down with the setting sun
and enjoys the useful deed he's done.

You'll sigh for the friends that were cast aside
with a hasty word or a show of pride,
and you'll laugh at medals which you prize
because you'll see them through different eyes.
You'll understand how little they really meant
for which so much of your strength was spent.

You'll see as always an old man sees,
that the waves die down with the fading breeze,
and the pomps of life never last for long,
the great sink back to the common throng,
but you'll understand when the struggle ends
that the finest gifts in life are friends!

We of the Class of 1935 add our best wishes to the members of the Class of 1985! Aloha!

*Dr. Cloward not only read this poem, he wrote it.

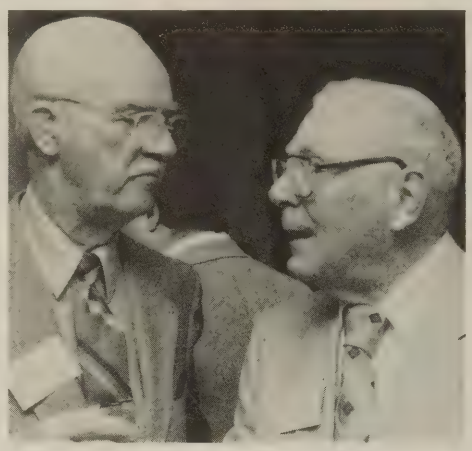
Words of Advice from the Class of '35

Members of the 50-year reunion class were asked for some words of advice to our newest alumni, the '85 graduates. Here's what they had to say:

"Be honest with your patients. Listen to your patients, even those who are intellectually far below you or educated far less than you. Try to be a healer, not a money maker. Spend time with your patients. Be their friend."
Leo R. Brown, M.D.

"Stick to your principles!"
Gordon T. Burns, M.D.

"A new Rush graduate is well equipped to develop into whatever grade of physician one chooses to be: an outstanding one, a good one, or a less than acceptable one. This holds true whether one chooses to be a specialist in any field or a family physician. Any goal is achievable, but talent alone is not enough. One must have a compassionate interest in one's patients. One must have an enduring desire to broaden the base-line of medical knowledge. Further, one must place monetary gain clearly in a subordinate position. Lastly, in every respect one must strive to live an exemplary life, not only for one's own welfare but also for the good of one's chosen profession."
S. Gordon Castigliano, M.D.



Durward G. Hall, M.D. '35, and William P. Frank, M.D. '35.

Albert Rogers, M.D. '35, and H. Street Dickerman, M.D. '35.

Below — Ralph Fitts, M.D. '35, and Bernadine Siebers-DeValois, M.D. '35.

"Concern yourself with patient care, not with dollars or tax shelters."
John H. Clark, M.D.

"Grasp every opportunity to merit the faith of your fellow men. Live your life according to the rules of historical experience. Let your scientific thinking be tempered with skepticism, but let not your actions be paralyzed by it."
Ralph B. Cloward M.D., F.A.C.S.

"The practice of medicine is undergoing a rapid and fundamental change: increasing amounts of external control by hospitals, insurance companies and governmental forces may sound the death knell for private practice as we have known it in the past. Be alert to deal with these changes."
William L. Curtis, M.D.

"Remember—patients are persons and not just case numbers. They need empathy and compassion, as well as good professional care. Practice wholistic medicine. Treat a total person."
Bernadine Siebers-DeValois, M.D.

"Treat the patient, not the disease."
Joseph C. Ehrlich, M.D.

"Try to be: professional, yet retain a sense of humor; honest, if not sure of the diagnosis, get consultation; presentable, neat and clean (no smoking, drinking, or bad language)—it will earn respect; and aware of options, both private and group practices."
Ralph L. Fitts, M.D.

"Maintain better communication with Rush than I have. Don't limit your interests and education to medicine. Develop interest in research. Your best security is your health."
Charles J. Frankel, M.D.

"Have Fun!"
A. Stone Freedberg, M.D.

"Be the best person you can be."
Elmer A. Friedman, M.D.

"Seek and find decisive and humanitarian service above self in our profession! Render some to your patients while cultivating equanimity, peace, and international understanding."
Durward G. Hall, M.D.

"Be sure to keep yourself in good physical condition."
H. Sidney Heersma, M.D.

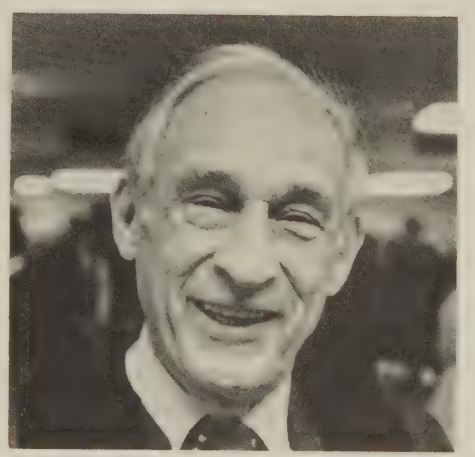
"Remember—patient care is caring for the patient."
Herman G. Helpern, M.D.

"Patient response is the best satisfaction. Since 'the grass is always greener,' I see from my years of hospital practice that private practice is the 'way to go' unless one is really interested in and fitted for academics."
Kate H. Kohn, M.D.

"There is more long to short-term satisfaction in work than anything else except a good book or fine clinical result."
Robert B. Lewy, M.D.

"Patients are people."
Wilder P. Montgomery, M.D.

"Maintain an active interest in music, literature, and the arts. Too frequently, physicians spend so much time in the practice of medicine and activities related to continuing medical education that they forget they are supposed to be well-educated people."
Arthur M. Olsen, M.D.



Jack Segal, M.D. '35

Ralph B. Cloward, M.D. '35, and Sharon Gates, alumni relations office.

Below, left — Mrs. and Dr. Elmer Friedman, Class of '35, with Helen Holt, M.D. '34, Kate Kohn, M.D. '35, and Robert Lewy, M.D. '35.

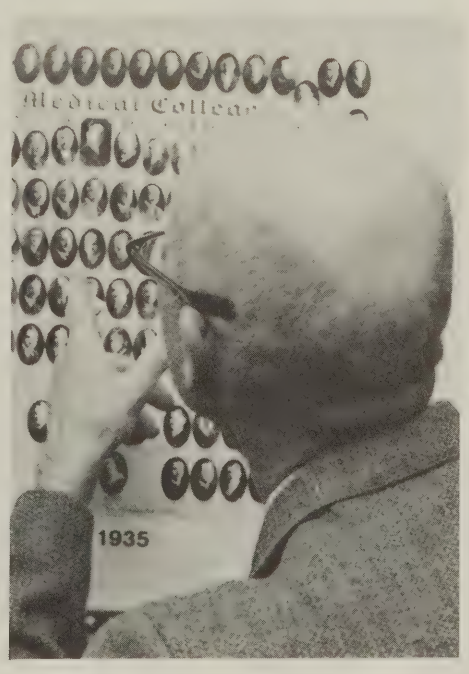
"Try always to maintain an open mind."
John H. Olwin, M.D.

"Start your practice where you truly want to live for the rest of your life. If going into pediatrics, be sure you can live with the telephone in dealing with anxious mothers (and sometimes, fathers). In today's medical world, especially in pediatrics, have a subspecialty to bolster your practice. The greatest joy of medicine is the opportunity to be of service. Every patient is a special challenge and, in a reciprocal way, every patient contributes something to the life of a doctor—a rewarding experience."
E. Henry Running, M.D.

"Get a government job or group practice."
Walter F. Schwartz, M.D.

"Be compassionate. Listen to your patients."
Jack Segal, M.D.

"If possible, look ahead to the type of service you want to perform and aim in that one direction."
Marshall P. Welles, M.D.



Something New in Fundraising at Rush

"Commitment"—for a group of devoted Rush alumni, it meant giving up a precious Saturday with their families or, in one case, coveted tickets to the Masters Golf Tournament in Augusta, Georgia, to spend a full day at their alma mater to discuss ways they could help encourage increased philanthropy from fellow graduates.

On Saturday, April 13, a carefully selected cadre of young Rush graduates who are, themselves, giving at leadership levels, was invited to participate in the first meeting of the fledgling "Alumni Philanthropic Leadership Committee," chaired by **R. Joseph Olk, M.D. '75.**

These energetic and enthusiastic alumni came together, many for the first time since graduation, in the President's Conference Room on the 11th floor of the Professional Building at Rush-Presbyterian-St. Luke's Medical Center. Attendees included, in addition to Dr. Olk, a practicing ophthalmologist in St. Louis, Missouri, the following:

Thomas A. Deutsch, M.D. '79, of Wilmette, Illinois, who is practicing ophthalmology; **Daniel Duran, M.D. '74,** of Louisville, Kentucky, orthopedic surgery; **Steven Gitelis, M.D. '75,** of Downers Grove, Illinois, orthopedic surgery; **Richard E. Melcher, M.D. '75,** of Augusta, Georgia, geriatrics/family practice.

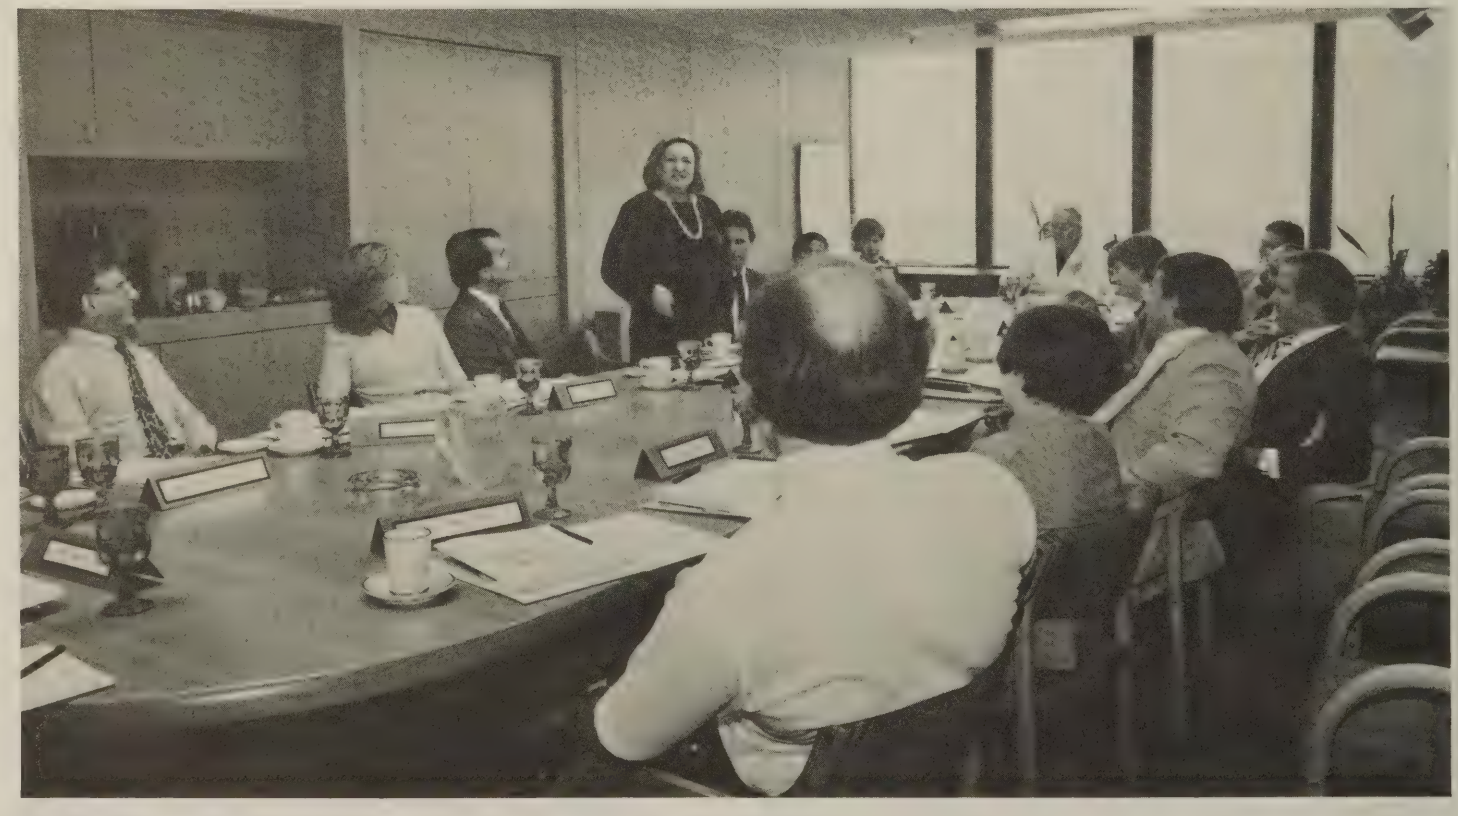
Also, Walter E. Meyer III, M.D. '74, of Huntsville, Alabama, gastroenterology; **Rita O. Pucci, M.D. '74,** of Chicago, Illinois, general surgery; **Ronald W. Quenzer, M.D. '73,** of Albuquerque, New Mexico, infectious disease; **Ellen Smith, M.D. '75,** of Chicago, Illinois, preventive medicine; and **April Teitelbaum, M.D. '77,** of Los Angeles, California, hematology/oncology.

Other volunteers who were unable to attend but offered to help include:

Joseph P. Bernardini, M.D. '75, of Vineland, New Jersey, orthopedic surgery; **Frank Capizzo, M.D. '74,** of Barrington, Rhode Island, internal medicine; **Daniel J. Hennessy, M.D. '75,** of Atlanta, Georgia, ophthalmology; **Ronald D. Nelson, M.D. '74,** of South Bend, Indiana, cardiology; and **Kenneth S. Shapiro, M.D. '75,** of West Nyack, New York, internal medicine.

Leo M. Henikoff, M.D., Medical Center president, stressed how "at home" he felt as he looked around the conference table. He remembered committee members, now enjoying successful careers, as eager prospective students when he was dean of admissions and, later, acting dean of the College. Dr. Henikoff said he was happy to be back at Rush (after five years as dean of Temple University's College of Medicine) and elaborated on his hopes for the maturation of Rush University, which has the rich heritage of Rush Medical College as its foundation..

Sheldon Garber, secretary of the Medical Center's Board of Trustees, gave a report on the environmental forces affecting our institution and medical education in general. A presentation by Henry P. Russe, M.D., dean of Rush Medical College, focused on our areas of strength, which include maximum six-year accreditation by the Liaison Committee on Medical Education; early success of the innovative alternative curriculum program, which com-



April Teitelbaum, M.D. '77, at the first meeting of the Philanthropic Leadership Committee.

bines independent study with instruction in small groups using a clinical problem as the focus for discussing basic science; improved organization of the student body; increased research activity; and progress in faculty development. Potential weaknesses were also discussed as Dr. Russe mentioned concerns for strengthening the uniformity of research excellence throughout the College, and the uncertainty of state capitation funds, without which tuition rates will soar.

Gerald S. Gotterer, M.D., Ph.D., associate dean of medical student programs, spoke on the longitudinal study of student adaptation to medical school; the alternative curriculum; and the impact of diversified training opportunities for students, presented by the expansion of the ANCHOR Organization for Health Maintenance, the affiliated hospital network and newly acquired occupational health centers. John E. Trufant, Ed.D., vice president for academic resources, presented an overview of the short and long-term needs for student financial assistance. His full report, reprinted on page 32, generated numerous questions from the audience and a lively discussion continued over lunch.

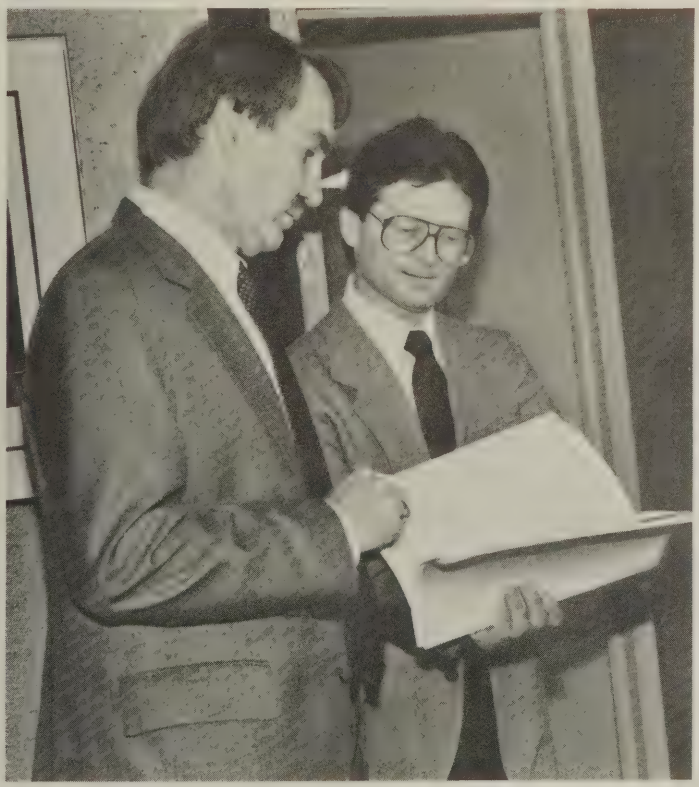
The afternoon session was devoted to philanthropy.

Dorothy H. Gardner, associate vice president for philanthropy and communication at the Medical Center, summarized endowment policies over the years and stressed that all 33 endowed chairs (some fully funded, some nearing completion; some from a single source, others funded by multiple family and grateful patient sources) benefit Rush Medical College and its students. She also illustrated the significant impact of deferred giving arrangements, which provide critical funds to strengthen the institution in its three-fold mission of education, research and patient care.

The working session was introduced by Vicki J. Woodward, director of alumni relations, who reflected on the slow but steady progress achieved in alumni giving figures for Rush graduates. While the Class Agent Network will continue to strive to increase donor counts to respectable levels, the role of the Philanthropic Leadership Committee is to help identify and personally solicit colleagues capable of support at the $1,500 level, and to increase membership in the Benjamin Rush Society from the post-1973 constituency.

The committee's initial charge was to focus on the Class of '75 for potential leadership prospects for their 10th reunion gift and assignments were accepted by volunteers for personal followup. A date was set for a conference call to allow committee members to report on the success of their efforts. Their ongoing involvement as a sub-committee, to be re-activated during the annual alumni appeal, was confirmed.

In closing the meeting, Dr. Olk expressed warm thanks and appreciation to all members of the Philanthropic Leadership Committee for serving as important role models for their peers and for their assiduous commitment on behalf of Rush Medical College.



John E. Trufant, Ed.D., vice president for academic resources at Rush University, and Richard Melcher, M.D. '75.

R. Joseph Olk, M.D.'75 (right), and Gerald S. Gotterer, M.D., Ph.D., associate dean for medical student programs.

Student Financial Aid

By John E. Trufant, Ed.D.
Vice President, Academic Resources, Rush University

The following was originally presented at the first meeting of the Rush Medical College Philanthropic Leadership Committee on April 13, 1985.

It is always a special pleasure for me to have the opportunity to talk with Rush Medical College alumni about student financial aid. As you may know, presenting the need for financial aid has fallen to me regularly during the past several years. It is gratifying to report that at least some of those efforts have been successful. This past year the Woman's Board completed its half-million-dollar pledge to student financial aid, which, they tell me, was one of the most welcomed campaigns among their constituents.

Certainly, financial aid has received its share of attention during the past several years under the Reagan administration. I picked up the *Chicago Tribune* last week to read an article with the headline: ''Medical-loan program hit.'' According to the story, a new audit of the Health Education Assistance Loan program contends that medical and dental students have received half a billion dollars in government-backed education loans, with little concern for whether they need the money, what they're spending it on or whether it will be repaid. Growing numbers of defaults are endangering the program's insurance fund, the story continues, and the government could be liable for up to $3 billion by 1990.

Needless to say, too much of the publicity has been negative. Former Senator Percy was especially critical of professional students who were not repaying their loans—and he had the right to be. Unfortunately, he chose to highlight a very small group of graduates. The data show, in fact, that those students with the highest amount of loans are the most likely to repay those loans. We are very proud that the default rate for Rush medical graduates on the health professions student loan is about four percent, about two percent on Rush loans and about six percent on national direct student loans. Our experience, by the way, indicates that at least some of these are simply 90 days behind in payment, but that they have not forsaken their commitment to repay.

Let me quickly provide a few statistics to indicate the current situation on Rush medical student financial aid. In 1981-82 the average amount of indebtedness of a Rush medical student was $25,400. The estimate for this year is $35,000, an increase of nearly 40 percent in just four years. One student this year will have borrowed more than $80,000. This year 57 students will have debts of $40,000 or more, which places Rush fourth of 98 medical schools reporting these data. In 1981-82, we ranked 21st. The amount of loans as a ratio to total aid for Rush medical students has grown from 72 percent in 1981-82 to 85 percent this year, placing us 29th of 119 reporting medical schools. This statistic shows how little scholarship aid we have available. In fact, the amount of scholarship aid from all sources to Rush medical students this year was $879,197, which is 35 percent less than what the students in 1981-82 received.

Loans are the heart of most financial aid programs, and that is certainly true of ours. In 1984-85, Rush medical students as a group borrowed $5,396,426. These loans were: from Rush sources—which include contributions from alumni — $570,000; from the IIHELA loan fund, $2,434,434; and from other sources—mostly the guaranteed student loan—$2,391,392. These loans must, of course, be repaid. For that student whom I mentioned earlier, $80,000 will mean a monthly repayment, in three years, of more than $600; in future years that will grow to $1500 a month, an annual debt payment of $18,000. Fortunately, much of the repayments will be in interest that the alum will be able to deduct from federal income taxes, assuming such deductions are still in force.

Let me quickly address the short and long-range issues. The short term, i.e., the next several years, appear at the moment to be a time of some breathing space for us. We have at least two years left on the IIHELA loan program. That will provide sufficient funds to enable us essentially to tell all applicants, irrespective of need, that we can provide the necessary funds to help them finance their medical education, at least for several years ahead. Of course, if the guaranteed loan were to be more severely restricted, I am uncertain that we could make that commitment. Beyond 1987, we will either have no IIHELA funds left or very restricted amounts. If that is the case and the restrictions on the guaranteed loan program are enacted, our alternatives would be few.

The first, and most likely, is to turn to the HEAL loan—that is, the Health Education Assistance Loan. This program, sponsored by the federal government, provides loans to medical students at an interest rate, beginning at the time of loan origination, of 3½ percent above the 90-day treasury bill rate. At the moment, I think the HEAL rate is hovering around 14 percent. In the recent heyday of inflation, it reached 20 percent. A second alternative is to include ability to pay in the admission criteria. This approach is exceptionally objectionable to most of us in higher education, especially to those of us who, without financial aid programs, would never have been able to pursue college degrees. Of course, a third alternative—and one that we have been working on since I have been at Rush—is the development of philanthropic support for student financial aid. There is no doubt that the long-term stability of Rush Medical College aid programs will depend on a base of philanthropic support. The era of scholarships is gone for professional education; our goal is to be able to provide a balanced package of student financial aid—balanced, if you will, with loans that enable students to manage the repayment schedules. Part of our effort in this regard, for example, is to charge only five percent interest on Rush loans. We believe that the difference in interest rates between low interest Rush loans and the high interest charges on external loans amounts to a significant scholarship.

The long-term scenario looks very troublesome for student financial aid, not only for professional students but for students in all of higher education. Every dollar of support decreases that uncertainty and makes us more capable of building the quality program that matches our mission and goals. The alumni have certainly become a bright spot in this somewhat gloomy future.

Benjamin Rush Society: The Apex of Alumni Giving

The annual meeting and dinner of the Benjamin Rush Society held on June 6 was a wonderful event. Forty-eight members, including alumni and friends of Rush Medical College, gathered in a spirit of camaraderie typical of Rush. Joining those of us in the Chicago area were alumni and friends from California, Georgia, Hawaii, downstate Illinois, Michigan, Missouri, New Jersey, New York and Wisconsin.

Medical Center president, Leo M. Henikoff, M.D., paid tribute to the vision and commitment of the founders of the Benjamin Rush Society, five of whom were at the meeting: **R. Kennedy Gilchrist, M.D. '31, Stanton A. Friedberg, M.D. '34,** George W. Stuppy, M.D., **Samuel G. Taylor III, M.D. '32,** and **Frederic A. dePeyster, M.D. '40.** In expressing his appreciation for our support, Dr. Henikoff spoke of the vital spirit of Rush which lives on in its students as they become alumni and champion the needs of their alma mater. Dr. Henikoff was delighted to note that among the younger members of the Benjamin Rush Society present, he had interviewed 10 as incoming students, before he left Rush in 1979 for Temple University.

Stressing the continuing rich teaching heritage of Rush, Dean Henry P. Russe, M.D., reminded us that we are celebrating 148 years of a tradition of faculty excellence this year, and that as important as Rush's contribution has been to academic medicine, perhaps the College has made an even greater contribution to the health of America in the education and training of excellent and caring practitioners. Dr. Russe said he is very gratified by the outstanding Benjamin Rush Society support of faculty development programs, and he has asked us to continue this as a priority project again next year. (See Message from the Dean for his full report on faculty development.)

Gifts from members of the Benjamin Rush Society in support of Rush Medical College for the fiscal year ending June 30, 1985, totalled $261,200, including unrestricted support/faculty development, $201,350; student loans, $40,850; and student scholarships, $19,000. Included in these figures are bequests from the estates of **Orpheus W. Barlow, M.D. '36, Norbert C. Barwasser, M.D. '34** and Frank E. Trobaugh, Jr., M.D., who, at the time of his death, was the Elodia Kehm Professor of Hematology at Rush-Presbyterian-St. Luke's. Their thoughtful foresight is deeply appreciated. In addition, ten new Benjamin Rush Society members, five of whom are younger alumni, enrolled during the year.

There are now 1,300 graduates of the new Rush Medical College and the Benjamin Rush Society is proud to claim 17 as members who are making leadership gifts annually. **Richard E. Melcher, M.D. '75,** has graciously accepted the chairmanship of the Benjamin Rush Society for the coming year. He has also been elected to serve on the Executive Council of the Alumni Association for the 1985-87 term. Dr. Melcher lives in Augusta, Georgia, and serves as director of geriatric ambulatory care at the Medical College of Georgia and as the assistant director of the Georgia War Veterans Nursing Home. Energetic, creative and grateful to Rush for his training, he is dedicated to building upon the success of the Benjamin Rush Society. Rich has my full support and I ask that you give him yours.

My role as chairman has been gratifying and your generous response was magnificent; the society is firmly positioned as the apex of alumni giving. My sincere thanks to each and every one of you for your continued loyalty and confidence.

Frederic A. dePeyster, M.D. '40
Immediate Past Chairman
The Benjamin Rush Society

Stanley E. Monroe, M.D. '36, with his wife, Flora.

Medical Center News

In Brief. . .

● Delegates from colleges, universities and learned societies from across the country gathered at the formal installation of Leo M. Henikoff, M.D., as president of Rush University on May 2 at Medinah Temple. The convocation culminated a two-day celebration which included an academic symposium on "The Role of the Academic Medical Center in the 21st Century." Speakers were: David E. Rogers, M.D., president of the Robert Wood Johnson Foundation; Virginia V. Weldon, M.D., vice president of Washington University Medical Center (St. Louis); and Columbia University economist, Eli Ginzberg, Ph.D.

● A liver transplant program has been established at Rush-Presbyterian-St. Luke's under the direction of James W. Williams, M.D., one of the foremost liver transplant surgeons in the Midwest. Dr. Williams has been appointed director of the Section of Transplantation in the Department of General Surgery and has been named the Jack Fraser Smith Professor of Surgery. He and his associate, Santiago R. Vera, M.D., came to Rush-Presbyterian-St. Luke's from the University of Tennessee Medical Center (UTMC) where they had developed one of the leading transplantation programs in the country. Drs. Williams and Vera performed more than 60 liver transplants at UTMC and established a survival rate that is among the best of the 27 liver transplant centers in the United States. The first liver transplant surgery at Rush-Presbyterian-St. Luke's was performed in August. Current transplant capabilities at the Medical Center include kidney, heart, liver, bone, bone marrow and cornea.

● The Chicago West Project, a cooperative revitalization effort that includes Rush-Presbyterian-St. Luke's, was officially launched May 23 in ceremonies at the Medical Center. The project was initiated two years ago and has helped pave the way for construction north of the Eisenhower Expressway on the city's near west side. An integral part of the effort is the Medical Center's five-story administrative building, linked to a one-story data center, now under construction in the "triangle" area bounded by Van Buren Street, Paulina Street, and Ogden Avenue.

● Joseph R. Christian, M.D., the Woman's Board Professor and Chairman of Pediatrics, retired September 1. Dr. Christian has headed the pediatric department since his arrival at the Medical Center in 1961. To recognize his many achievements and long service, an academic symposium was held in his honor May 30.

● Rodolfo R. Llinas, M.D., Ph.D., professor and chairman, Department of Physiology and Biophysics, New York University School of Medicine, was the keynote speaker for University Research Week. The celebration centered on a two-day lecture series, scientific symposium and poster session featuring researchers representing all four Rush University colleges. Outstanding student investigators who were recognized included **Karen Kawala, Class of '85,** who gave a presentation on "Prognosis of Lupus Nephritis."

● The medical staff of Rush-Presbyterian-St. Luke's honored 32 of its members for 25 or more years of service at its annual dinner last spring. Among those receiving awards was **Stanley E. Lawton, M.D. '26,** emeritus physician and professor in the Department of General Surgery. Dr. Lawton was recognized for 55 years of service.

● The Medical Center has signed an affiliation agreement with MacNeal Hospital, Berwyn, Illinois, and with Marianjoy Rehabilitation Center, Wheaton, Illinois, bringing the number of hospitals in the patient care network to 17.

● In May, State Senators Charles Chew and Glenn Dawson, who had each been hospitalized at Rush-Presbyterian-St. Luke's last year, presented resolutions, passed by the Illinois Senate, to the two Medical Center physicians supervising their care. Steven G. Economou, M.D., the Helen Shedd Keith Professor and Chairman of General Surgery, and Michael M. Ramsey, M.D., senior attending, internal medicine, were cited for their "dedication, hard work and outstanding service in the field of medicine."

● The National Fund for Medical Education awarded a $77,600 grant to Gerald S. Gotterer, M.D., Ph.D., associate dean for medical student programs, Rush Medical College, to expand his longitudinal study of medical students by conducting a parallel survey of students in the innovative alternative curriculum program. (Students in the alternative curriculum learn basic science through independent study and small group instruction without lectures. All students take the standard clinical curriculum in the third and fourth year.) The initial project focuses on the Class of 1986 in a study of student characteristics and demographics and how they impact success in medical school and preference for specialties. The parallel study, which will also look at the impact of the alternative versus traditional curriculum, began with the first-year class this fall. Only 12 innovative grants were awarded by the National Fund for Medical Education this year. Dr. Gotterer's project was selected from among 86 applications.

● Oil paintings, drawings, photography and ceramics were featured at the Rush University Student/Faculty Art Fair in April. This was the first year that faculty members participated in the annual event, which is sponsored by the Subcommittee on Art and Cultural Affairs of the Committee on Student Affairs. According to Armando Susmano, M.D., subcommittee chairman, "It's nice to show people that medical students do more than study, and faculty members do more than teach."

Appointment Made to Ralph C. Brown, M.D., Chair

Roger C. Bone, M.D., has been appointed to the **Ralph C. Brown, M.D.,** Chair of Internal Medicine. The appointment was announced by Leo M. Henikoff, M.D., president of Rush-Presbyterian-St. Luke's Medical Center, at the June meeting of the Board of Trustees.

Dr. Bone is the first holder of the Brown Chair, which was established in 1970 by family and friends of Dr. Brown. A 1904 graduate of Rush Medical College, Dr. Brown served as professor of medicine and was a member of the Presbyterian Hospital medical staff until his death in 1954. His son, **R. Gordon Brown, M.D. '39,** who for many years served as president of the Alumni Association, is an associate professor of internal medicine at Rush, and a member of the senior attending staff and a Trustee at the Medical Center.

Dr. Bone joined the Medical Center in 1984 as chairman of the Department of Internal Medicine. A renowned specialist in pulmonary and critical care medicine, he had been professor of medicine at the University of Arkansas for Medical Sciences, and chief of the pulmonary division at that institution as well as the Veterans Administration.

Dr. Bone received his B.A. degree from Hendrix College in Arkansas and his B.M.S. and M.D. degrees from the University of Arkansas Medical School. He completed his internship and residency in medicine at the Parkland Memorial Hospital in Dallas, Texas, and was a fellow in the internal medicine department (cardiopulmonary section) at the University of Texas Southwestern Medical School.

He is the author of more than 150 scientific articles and has edited five books on respiratory diseases. A respected educator, he was elected to receive the Outstanding Teacher "Golden Apple Award" at the University of Arkansas Medical Center on three occasions. Dr. Bone was also chosen by the Rush Class of 1985 for the honor of "hooder" at commencement ceremonies at Medinah Temple.

Ralph C. Brown, M.D., was a respected authority in the field of gastroenterology. Following graduation from Rush, he interned at Cook County Hospital and studied at Vienna's Pathological Institute. During his many years at Presbyterian Hospital, Dr. Brown also served as clinical professor of medicine at Rush and at The University of Chicago. He was editor of the section of gastroenterology in the *Yearbook of Medicine* from 1923 to 1932 and authored a chapter on peptic ulcer in the *Oxford Textbook of Medicine.*

More than 100 friends and colleagues attended a reception honoring John S. Graettinger, M.D., on his retirement as director of graduate medical education at Rush. Alumni included Lisa M. Yaremko, M.D. '84, Steven J. Rottman, M.D. '75 (of California), Dawn Maria Warren, M.D. '77, Thomas P. Bleck, M.D. '77, John Schaffner, M.D. '74, Mary Kay Tobin, M.D. '77, his son William Graettinger, M.D. '75 (of New Mexico), and Stephen Humowiecki, M.D. '75. Dr. Graettinger continues to serve as university marshal.

Alumni Giving Honor Roll

Special thanks to all alumni listed below for your financial support of your alma mater. Philanthropy from Rush graduates insures the continued well-being of Rush Medical College and its students. It helps Dean Henry P. Russe, M.D., maintain the standards of excellence synonymous with a Rush education.

This Honor Roll acknowledges all outright gifts and pledges received in response to the recently concluded 1984-85 fund drive. Donors to all purposes are listed in categories based on their cumulative giving this fiscal year, which ended on June 30, 1985.

We are especially grateful to those alumni from anniversary classes who participated in the reunion class gift effort by making additional commitments beyond their annual appeal contributions. Thanks, too, to those volunteers who extended themselves on behalf of Rush Medical College to encourage increased alumni giving from their colleagues and friends.

Your continued investment in our future is greatly appreciated and we thank you for your generosity.

†Deceased

Members of the Rush Chapter of Alpha Omega Alpha, the national medical honor society, at their annual banquet and lecture included: top row — Frederic A. dePeyster, M.D. '40 (councillor), James Goodrich, Charles Lindley, Thomas Chauncey, Kelly Volmer, Gholam Mohammadzadeh, Mark Huey, Keith Rezin; middle row — Susan Anderson-Nelson, Brad Hubbard, David Horan, M.D. (lecturer), Lauren Baker, Judith Bressler; bottom row — John FitzGibbon, Blase Vitello, Ned Jacobson and Robert Raschke.

Class of '85 Residency Appointments

From:
The 120 members of the Class of '85 entered Rush Medical College from 53 undergraduate colleges in 20 states. The average entering age was 23.4 years; 62 percent men and 38 percent women. Fourteen already had masters' degrees and five had doctorates. Most students had majored in science, but their backgrounds were diverse, representing more than 30 different study concentrations that ranged from anthropology to zoology.

To:
For postgraduate education, 87 are remaining in the Midwest. The 60 who joined programs in Illinois included 20 who are now residents at Rush-Presbyterian-St. Luke's. Seventy entered the primary care fields of internal medicine, family practice, pediatrics and obstetrics/gynecology. Overall, 78 percent of those participating in the National Residency Matching Program received one of their first three choices. A complete list of residency appointments follows.

Fellows, Residents Join House Staff at Medical Center

Nearly 150 residents and fellows— including 25 graduates of Rush Medical College—recently joined the house staff of Rush-Presbyterian-St. Luke's Medical Center.

Following is a list of the new members of the house staff (as of August 1). Fellows are indicated with an asterisk(*).

Allergy/Immunology

*Marilyn A. Tomasko
M.D. '81 - University of Illinois
Training - Medical Center of Delaware
Wilmington, Delaware

Anesthesiology

Patrick C. Callahan
M.D. '85 - Rush Medical College

Michael A. Chavin
M.D. '83 - Rush Medical College
Training - University Hospital
San Diego, California
Jackson Memorial Hospital
Miami, Florida

*Daniel Feingold
M.D. '84 - Chicago Medical School
Training - Louis A. Weiss Memorial Hospital
Chicago, Illinois

John D. Hegarty
M.D. '85 - University of Illinois

Jonathan Kind
M.D. '85 - Chicago Medical School

Howard S. Konowitz
M.D. '82 - Chicago Medical School
Training - Northwestern University/Evanston Hospital
Evanston, Illinois

John E. McConnell
D.O. '84 - Chicago College of Osteopathic Medicine
Training - Cook County Hospital
Chicago, Illinois

Robert W. Molnar
D.O. '84 - Chicago College of Osteopathic Medicine
Training - Botsford General Hospital
Farmington Hills, Michigan

Cardiology

***John T. Barron**
M.D. '82 - Rush Medical College
Ph.D. '78 - University of Cincinnati
Training — University of Illinois Hospital
Chicago, Illinois
Christ Hospital, Oak Lawn, Illinois

*Leslie A. Brookfield
M.D. '81 - Medical College of Ohio
Training - Northwestern University/McGaw Medical Center
Chicago, Illinois

***David J. Dobrin**
M.D. '81 - Rush Medical College
Training - Rush-Presbyterian-St. Luke's Medical Center
Mt. Sinai Hospital
Chicago, Illinois

Cardiovascular/Thoracic Surgery

Frank P. Catinella
M.D. '78 - New York University
Training - North Shore University Hospital
Manhasset, New York
New York University Medical Center
New York, New York
Maimonides Medical Center
Brooklyn, New York

John J. Tyner
M.D. '79 - Emory University
Training - University of Texas Southwestern Medical School/Parkland Memorial Hospital
Dallas, Texas

Dental Surgery

Timothy J. Glupker
D.D.S. '85 - University of Michigan

Robert B. John
D.D.S. '85 - University of Illinois

Dermatology

Kenneth Bielinski
M.D. '84 - Chicago Medical School
Training - Northwestern University
Chicago, Illinois

Diagnostic Radiology

Mark E. Fruin
M.D. '84 - University of Illinois
Training - St. Francis Hospital Medical Center
Peoria, Illinois

*Robert J. Gould
M.D. '81 - University of Illinois
Training - Northwestern Memorial Hospital
Chicago, Illinois
Evanston Hospital
Evanston, Illinois

*Carl E. Johnson
M.D. '81 - Loyola University
Training — University of Illinois
Chicago, Illinois
Loyola University Medical Center
Maywood, Illinois

Lorraine J. Ling
M.D. '83 - University of Minnesota
Training - Children's Memorial Hospital
Chicago, Illinois

*John Mukai
M.D. '80 - University of Massachusetts
Training - Memorial Hospital
Worcester, Massachusetts
St. Vincent Hospital
Worcester, Massachusetts

Chanhi Park
M.D. '84 - Albert Einstein College of Medicine
Training - Morristown Memorial Hospital
Morristown, New Jersey

Barbara Tellerman
M.D. '83 - Boston University
Training - Michael Reese Hospital and Medical Center
Chicago, Illinois

Digestive Diseases

*Robert Beswick
M.D. '81 - University of Illinois
Training - University of Illinois/West Side Veterans Administration Hospital
Chicago, Illinois

Family Practice

Dean S. Cohen
D.O. '84 - Chicago College of Osteopathic Medicine
Training - Grandview Hospital
Dayton, Ohio

Dora D. Dixie
M.D. '85 - University of Illinois

Shelley M. Drew
D.O. '84 - Michigan State University College of Osteopathic Medicine
Training - Chicago Osteopathic Hospitals
Chicago, Illinois

Linda Evans-Beckman
M.D. '85 - Rush Medical College

Madeline Getto
D.O. '84 - Chicago College of Osteopathic Medicine
Training - Lansing General Hospital
Lansing, Michigan

Mark D. Goodman
M.D. '85 - University of Nebraska

James J. Magee
M.D. '85 - University of Illinois

Paul R. Omastiak
M.D. '81 - St. Louis University
Training - St. John's Mercy Medical Center
St. Louis, Missouri

Brian V. Phillips
M.D. '85 - Wayne State University

Susan M. Piestrak
M.D. '85 - Wayne State University

Wendy A. Shanahan
M.D. '85 - The University of Chicago

General Surgery

Robert E. Brockman
M.D. '85 - Loyola University

James A. Davidson
M.D. '85 - University of Missouri

Michael R. DeHaan
M.D. ' 85 - University of Illinois

*John L. Ehlert
M.D. '75 - University of Wisconsin
Training - St. Mary's Hospital
Grand Rapids, Michigan

Thomas H. Fendon
M.D. '85 - University of Illinois

John F. Gibbs
M.D. '85 - University of California-San Diego

Matthew J. Hyser
M.D. '85 - Rush Medical College

Steven Knezevich
M.D. '85 - Rush Medical College

William T. Long
M.D. '85 - University of California-San Diego

J. Stephen Marshall
M.D. '83 - Southern Illinois University
Training - St. Francis Hospital
Peoria, Illinois

Mark A. Mason
M.D. '85 - University of Michigan

James C. Rex
M.D. '85 - University of Pittsburgh

*Howard Sankary
M.D. '79 - Bowman Gray School of Medicine
Training - University of California-Irvine

Fred Turner
M.D. '85 - Rush Medical College

Carlos Valdivieso
M.D. '66 - San Marcos University, Peru
Training - Bravo Chico General Hospital
Lima, Peru

Hand Surgery

*Suzanne M. Ackley
M.D. '80 - Albany Medical College
Training - Albany Medical Center
Albany, New York
University of Maryland
Baltimore, Maryland

Fellows, Residents Join House Staff at Medical Center

Hematology

*Norman Heching
M.D. '81 - Yeshiva University, Tel Aviv University, Israel
Training - Hines Veterans Administration Hospital
Hines, Illinois

*Ban Teong Toh
M.B.B.S. '78 - Faculty of Medicine
University of Malaya
Training - Cook County Hospital
Chicago, Illinois

Internal Medicine

Barb Amsler
M.D. '85 - University of Wisconsin

John E. Trufant, Ed.D., dean of The Graduate College, with David Simon, Class of '85, who received both an M.D. and a Ph.D. degree.

Class Notes

1918

Harold D. Caylor and his wife, Henrietta, came back to Rush-Presbyterian-St. Luke's in May to participate in the inaugural ceremonies which marked the formal installation of Leo M. Henikoff, M.D., as president of the Medical Center. At 90 years of age, Harold was the oldest alumnus to attend the ceremonies. A retired general surgeon, he is one of the founders of the Caylor-Nickel Medical Center, which includes a clinic, hospital, research institute and foundation in Bluffton, Indiana.

1931

John G. Hand is retired and celebrated his 81st birthday this year. He's living in Springfield, Pennsylvania.

1934

Theodore N. Zekman has two Chicago institutions to be proud of—his thriving ophthalmology practice and his daughter, WBBM-TV investigative reporter, Pamela Zekman. Pam, who was recently featured in *Sunday*, the *Chicago Tribune Magazine*, has earned two Pulitzer Prizes and numerous other broadcasting awards. She credits her father with supporting her early endeavors as an ice skater, artist (her works adorn the walls of his office waiting room), and her move into reporting.

1935

Most of the following notes have been condensed from information submitted for the Class of '35 Memory Book, compiled in the spring for the 50-year reunion.

Richard F. Boyd, who specialized in preventive medicine and public health, lives in San Diego, California. Since retirement, he enjoys reading, golf and travel.

Leo R. Brown completed his residency at Mount Sinai Hospital in Chicago and was in private practice for six months before taking a position with the Veterans Administration Hospital, first in Washington, D.C., and then at the facility near Hampton, Virginia. He joined the United States Army Medical Corps in 1942 and served until 1946, when he became a major in the Medical Corps Reserve. He opened a general practice office in Gary, Indiana, in 1946 and practiced there until 1977, when he moved his office to Merrillville. He retired last year. Leo and his wife have two children, both teachers, and four grandsons. They enjoy traveling and attending classical music concerts.

Gordon T. Burns practices obstetrics and gynecology in Rockford, Illinois, and was a founding member of the Rockford Clinic in 1952. His hobbies include gardening.

S. Gordon Castigliano completed a preceptorship and postgraduate course in surgery, then became certified by the American Board of Radiology after a three-year residency in irradiation therapy. He was one of the first trainees in oncology under the auspices of the National Cancer Institute, headed by Dr. Ludvig Hektoen. He served his three-year traineeship at the American Oncologic Hospital (AOH) in Philadelphia. After becoming a fellow in the American College of Surgeons in 1944, he became chief of staff at AOH and was also a professor and head of the department at Temple University School of Dentistry. He has served in numerous leadership positions in cancer societies, written three textbook sections and published more than 60 articles. Since his retirement, he lives in Venice, Florida, where he enjoys golf, fishing and sculpturing.

John H. Clark practiced in Vernal, Utah, for five years before joining the United States Army in 1940. He received Legion of Merit and Purple Heart awards for service on Guadalcanal, and retired a lieutenant colonel in 1945. After additional general surgery training, he opened a practice in Salt Lake City, Utah, and became an associate clinical professor at the University of Utah. He is a diplomate of the American Board of Surgery and a fellow of both the American College of Surgeons (president, Utah Chapter, 1962) and the Southwestern Surgical Congress (president, 1968-69). His numerous professional activities also include serving as a member and 1968 chairman of the Utah Licensing Board, member of the Flex test committee, and chairman of the task force to implement the improved Flex licensing examination. He received the Distinguished Service Award from the Utah State Medical Association in 1980 and was honored as Utah Doctor of the Year in 1982. Since retirement, he's continued to be involved in medical licensure as past president of the Federation of State Medical Boards. He and his wife, Doris, have two children.

Ralph B. Cloward trained in neurology and neurosurgery at The University of Chicago before returning home to Honolulu, Hawaii, to open a private practice. He says he was the only neurosurgeon in the Pacific when the Japanese attacked Pearl Harbor, and therefore treated many of the military and civilian casualties of the war. In 1943 he developed the posterior lumbar interbody fusion technique to treat lumbar disc disease and, in 1956, developed a similar procedure for cervical disc disease, an operation now used worldwide. He has invented more than 100 surgical instruments, published 83 articles and traveled to 37 states and 27 foreign countries to lecture and perform operations. In addition to his active surgical practice, he enjoys photography, music and golf.

William L. Curtis practiced general medicine for 15 years in Grays Harbor, Washington, before beginning a radiology residency at the University of Denver. He returned to Seattle in 1955 and practiced radiology until his retirement in 1981. Widowed, he's now living in Covenant Shores on Lake Washington and is busy painting, woodturning and reading films for a doctor in San Juan Islands. He has a daughter in Seattle.

Bernadine Siebers-DeValois, after a rotating internship and one-year residency in pediatrics, was commissioned as a missionary of the Reformed Church in America to the

Class Notes

Christian Medical College and Hospital in Vellore, South India. In 1941 she undertook postgraduate studies at the University of Montreal and the University of Toronto, became a fellow in the Royal College of Surgeons, and then completed a residency in ENT at the University of Michigan. She returned to India in 1945 as a professor at Christian Medical College and Hospital, and the following year married Dr. J. J. DeValois, who founded and served as principal of the Agricultural Institute, Katpadi, Church of South India. Bernadine served as a part-time medical consultant in a World Neighbors Village Extension Program in India until 1960. She also served short terms as medical consultant for World Neighbors in Colombia, South America, and Nigeria, Africa, from 1961-62. Returning to the U.S., Bernadine was a staff member of Pine Rest Christian Hospital, Grand Rapids, Michigan, from 1964 until her retirement in 1974. She now lives in Holland, Michigan, and lists her hobbies as reading, gardening, church activities and keeping in touch with friends around the world. A "second mother" to two sons and two daughters, she has 15 grandchildren.

H. Street Dickerman, Jr., semi-retired, lives in Springfield, Illinois, where he practiced internal medicine from 1937-81. He interned at Presbyterian Hospital and at the Municipal Contagious Disease Hospital in Chicago and completed a residency at Kings County Hospital in Brooklyn, New York. From 1941-45 he served as an Air Force flight surgeon. He is now associated with the Federal Disability Program, and also enjoys golf, gardening and bridge.

Joseph C. Ehrlich, semi-retired in cardiology, practiced in Chicago from 1936 until he became a medical officer in 1942, earning the rank of lieutenant colonel. After the war he began a private practice in Phoenix, Arizona, where he still lives. His hobbies include opera and historical reading.

Ralph L. Fitts interned at Blodgett Memorial Hospital in Grand Rapids, Michigan, before establishing a 40-year internal medicine practice there, principally with **Summer M. Wells,** an earlier Rush graduate. He was in the Air Force Medical Corps from 1942 to 1946, then served in the Army Tropical Medicine School and South Pacific Service. He retired a lieutenant colonel with 24 years of active and reserve service. Ralph moved to Rio Rancho, New Mexico, in 1975 with plans to retire, but worked five years at Lovelace Medical Center of Albuquerque before actually retiring in 1980. He and his wife, Stella, have a daughter and four grandchildren. Ralph's hobbies include gardening, lapidary (rock work and collecting) and church and health care committee activities.

Charles J. Frankel, semi-retired in orthopedic surgery and legal medicine, was the sports physician at the University of Virginia from 1936-1967. He received his L.L.B. degree from the University of Virginia Law School in 1957. He is professor emeritus at the University of Virginia Medical School in Charlottesville and is chief editor of the lawyer's medical encyclopedia. Charles says he is the oldest semi-active member of the faculty. "I stopped operating at the age of 67, but I hope to continue other activities until at least age 80," he writes, adding that he's "still married to the same lovely girl (42 years). They have a son who is a banker.

A. Stone Freedberg began a research fellowship in medicine at Beth Israel Hospital and Harvard Medical School in Boston in 1938, studying carotid sinus reflexes and then fever. In 1941 he joined the medical research department and by the time he left in 1974 he was acting physician-in-chief, Beth Israel Hospital, and professor (now emeritus) of medicine at Harvard. He has published more than 140 papers on various aspects of thyroidology and the relationship of the thyroid to the heart. He was a Guggenheim Fellow, Department of Pharmacology, Oxford University, and received a Pioneer Award from the Nuclear Society. He has also served as an officer or consultant to many national medical societies. "If the art of living is to make accurate guesses on the basis of inadequate data," he writes, "I've done well in the main areas: wife and family, choices of work, and Boston to live in." His older son is a drama teacher in Hague, Holland, and the younger, a psychiatrist practicing in Newton. He has four grandchildren, the oldest an applicant to medical school. In addition to his active practice, he enjoys cooking, music and art.

Elmer A. Friedman has enjoyed an active E.N.T. practice at Michael Reese Hospital and Medical Center since graduation from Rush, although he stopped doing head and neck surgery last fall. He plans to continue practicing as long as he is "able and interested."

Durward G. Hall practiced at the Smith-Glynn-Callaway Clinic in Springfield, Missouri, from 1936-40 before serving six years with the United States Army at Camp Grant. In 1947 he took an 18-month "refresher" as chief resident, surgical services, at both Walter Reed General Hospital and Roosevelt Hospital in New York City. He returned to the Springfield clinic in 1948 and served as its chief surgeon and administrator for 12 years. Durward was elected to the U.S. House of Representatives for six terms, voluntarily retiring in 1973. He was then co-founder and a seven-year charter regent of Uniformed Services, University of the Health Sciences, Bethesda, Maryland. He retired in 1981 but last year was elected to the Academy of Senior Professionals in St. Petersburg, Florida, where he now spends some time as an assistant in teaching, counseling, guidance and research. Sailing, walking and keeping track of his granddaughters, one of whom is enrolled at Tulane School of Medicine, also keeps him busy.

H. Sidney Heersma, semi-retired in pediatrics, spent his first two years after graduation working at Presbyterian Hospital, then began a 47-year practice in Kalamazoo, Michigan. He served on the Community Mental Health Board for 16 years, including seven months as acting director. The Intensive Care Center and a local resi-

dence for retarded citizens were both named in his honor. He now practices in the mornings and serves as a consultant to the special education department of the school system and a clinic for handicapped children. He and his wife, Ellen, celebrated their golden wedding anniversary last year. They have two children and four granddaughters.

Herman G. Helpern trained in internal medicine at Bellevue Hospital and Mount Sinai Hospital in New York, and established a private practice there in 1938. He still practices full time at Doctor's Hospital and at Mount Sinai, where a floor of the Annenberg Building has been named the Herman G. Helpern, M.D., Ambulatory Care Floor. He's been married for 50 years and has two children. His daughter is a physician/internist/hematologist with two children of her own and married to a professor of physiology at Harvard Medical School; his son is in business and finance in Chicago.

Kate H. Kohn is nearing retirement from chairmanship of the Department of Rehabilitation Medicine at Michael Reese Hospital and Medical Center. She has been a clinical professor at the University of Illinois since 1961, and is continuing her research into EMG control of functional electrical stimulation in paraplegics. While her two sons were growing up, she did volunteer work for the Chicago Heart Association (becoming president in 1970). She ran an industrial medical office in a dress factory; served as an induction physician for the Women's Auxiliary Army Corps during World War II, and worked with the Red Cross Blood Bank during the Korean conflict. She worked part time in various clinics and participated in clinical research until 1952, when Louis Katz, M.D., drew her into the field of rehabilitation medicine. Her hobbies include sailing, swimming and fishing.

Robert Lewy has an active ENT practice in Chicago. His after-hours hobbies include ornithology and medical history.

Wilder P. Montgomery, semi-retired, is a consultant in pulmonary diseases to the Appeals Council of the United States Social Security Administration. He was an associate clinical professor of medicine at Howard University College of Medicine in Washington, D.C., and an attending at the D.C. Chest Clinics. He also served on the D.C. Board of Police and Fire Surgeons and the D.C. Lung Association board. He lists his hobbies as golf, bridge, travel, and Civil War and Mayan history.

James J. O'Halloran served in the medical department of Deere and Company, Moline, Illinois, from 1935 to 1971. He's a fellow in the American Occupational Medical Association and the American College of Preventive Medicine, and a diplomate of the American Board of Preventive Medicine. Since his retirement, he lives in East Moline, Illinois, with his wife, Camille. They have two daughters and one grandchild.

Arthur M. Olsen, semi-retired in pulmonary medicine and bronchoesophagology, completed a three-year residency at Mayo Graduate School in 1940 and stayed on as a consultant to the Mayo Clinic for the next 36 years. He became section head in 1949 and served as division chairman from 1967-72. Arthur was named a professor of medicine in the Mayo Graduate School of Medicine in 1957. His bibliography includes about 175 articles, and he has served as president of many medical societies. He was particularly active in the American College of Chest Physicians, having served as chairman of the board of regents, president, and director of international activities, and continues to serve as consultant for international affairs. Now living in Rochester, Minnesota, he lists his hobbies as international travel, photography and golf. He has four children.

John H. Olwin practiced general surgery and, in recent years, began focusing on peripheral vascular disease. He supervised the Clinical Coagulation Laboratory at Presbyterian, and then Presbyterian-St. Luke's Hospital, until 1969. He's done extensive research into coagulation and vascular disease, and is currently "into" essential and toxic metals and their relationship to health and disease. He and his wife, Betty, live in Evanston, not far from their two daughters and three grandchildren. They enjoy sailing, tennis and watercolors, and "every 50 years we attend a reunion at Rush."

E. Henry Running, semi-retired in pediatrics, was a founder of and chief of pediatrics at the Arizona Crippled Children's Hospital in Phoenix, serving full time from 1936-83. He represented Arizona at the White House Conference on Children and Youth, the Salk Vaccine Conference in 1960 and the March of Dimes Conference in 1968. He's been an active member of a number of medical and health care societies and commissions,including serving 35 years on the board of Blood Systems, Inc., and one term with the Atomic Energy Commission. Married, he has five children and 10 grandchildren.

Walter F. Schwartz practiced dermatology in Pasadena, California, from 1939 until his retirement in 1980. He also served 38 months in the Air Force and as a part-time instructor for the University of Southern California Medical School. After retiring he spent 3½ years raising cattle and now reading, collectibles, wood carving and physical fitness keep him busy.

Jack Segal, semi-retired in general surgery, is a consultant for disability evaluations, preemployment examinations and dispensary call for the Occupational Health Service of Los Angeles County in California. He served as chief of surgical services in numerous military hospitals while working with the United States Army Medical Corps from 1936-53. He then opened a private surgical practice in Pasadena. In 1969 he became medical/surgical program director for Metropolitan State Hospital in Norwalk, and from 1975-79 was a member of the West End Medical Group in Los Angeles. The Beverly Hills resident lists his hobbies as traveling, swimming, reading and horse racing. "Happily remarried," Jack celebrated his 26th wedding anniversary in May. He has a son in the biochemistry field.

Class Notes

Irving Slott is a senior attending physician at Cook County Hospital and maintains an active internal medicine practice. He's a former president of the medical staff at Columbus Hospital and is still a senior attending physician there. Irving served as medical director for the State Athletic Commission and as a faculty member at the University of Illinois Medical School. He still remembers medical school days when he was captain of the basketball team that won the intramural championship (in 1932) and of the runner-up softball team.

Marshall P. Welles went to China with his wife and son in 1938 as a medical missionary of the Presbyterian Church. He worked in a 60-bed hospital during the Sino-Japanese War. As the war worsened, he and his family were sent to the Philippines, where, shortly after the bombing of Pearl Harbor, they were interned as civilian prisoners-of-war for three years. After liberation, he returned to the United States to study surgery for a year at the University of Pennsylvania, then undertook a year-long fellowship. In 1947 he and his family (three children by then) returned to China for two years, then opened a 25-bed missionary hospital in Bangkok, Thailand, for the Church of Christ. He now lives in Pasadena, California, where he oversees a Presbyterian retirement facility and works for an HMO.

Simon L. Wolters interned at Orange Memorial Hospital, Orange, New Jersey, and did his residency in obstetrics and gynecology at the Chicago Lying-In Hospital. He served in New Guinea with the United States Army Medical Corps from 1941 to 1945. Simon was an instructor at The University of Chicago Medical School and was associated with the Permanente Medical Group of South California before he retired in 1981. He now lives in Ontario, California, where he enjoys music, travel and reading.

Robert S. Westphal lives in Modesto, California, since retiring from his preventive medicine practice. His hobbies include gardening, carpentry and reading.

1937

Robert G. Mindrup has an active family practice in Jerseyville, Illinois, but still finds time to travel, golf, restore antique clocks, and read stories to his four-year-old grandson.

1939

Philip Kramer is professor emeritus of gastroenterology and a member of the Admissions Committee of Boston University School of Medicine (BUSM). After his discharge from the U.S. Army in 1946, he attended an internal medicine refresher course at Massachusetts Memorial Hospital (now University Hospital), BUSM. He was offered a fellowship in gastroenterology by Franz J. Ingelfinger, M.D., who launched him into a career in academic medicine. Phil served as chief of gastroenterology at the V.A. Hospital in Syracuse, New York; Boston City Hospital in Boston; and University Hospital in Boston. He served as president of the medical staff at University Hospital, which honored him with an award as "Caring Physician," and he was elected an Alpha Omega Alpha faculty member in 1980. Board-certified, he has also published nearly 90 scientific papers and abstracts.

1942

Isaac E. Michael is practicing internal medicine in Indianapolis, Indiana, where he is affiliated with St. Vincent Hospital.

John R. Tobin Jr., dean of Loyola University's Stritch School of Medicine, has been appointed associate provost for the Loyola University Medical Center, Maywood, Illinois.

1975

J. Brian Hancock was awarded the Certificate for Excellence in Teaching (Best Volunteer Faculty) by the graduating class of the College of Human Medicine at Michigan State University. Brian, a general and thoracic surgeon, is affiliated with St. Mary's Hospital in Saginaw.

Stephen R. Humowiecki says he knows the decade has flown because his oldest son, Mark, became a teenager when the 10-year anniversary rolled around. Stephen is practicing medicine in Oak Park, Illinois.

R. Joseph Olk, Alumni Association president, is one of 11 American ophthalmologists elected this year to membership in The Retina Society. The society's 150 members were selected for their medical and surgical experience, literary contributions and experience as retina specialists. Joe, who is in private practice in St. Louis, has published more than 30 papers on diseases of the retina and vitreous. He is also an assistant professor of clinical ophthalmology at Washington University School of Medicine.

Ellen Smith received a master of public health degree from the University of Illinois at Chicago on June 7. She was elected a member of the Delta Omega Society, a national honorary public health fraternity established to encourage research and recognize achievement in public health. She also received the Alan W. Donaldson Memorial Award, the highest honor granted by the University of Illinois School of Public Health. Ellen is an active member of the Rush Philanthropic Leadership Committee. Although she was tied up with her graduation from U. of I. during the day on Friday, she attended reunion festivities at Rush Thursday evening and came to the banquet at the Drake with her husband, Barry Von Der Meulen, Friday night.

1977

Charles S. Colodny was elected to a three-year term on the board of directors of the Illinois Academy of Family Physicians at its annual meeting in May. Charles has held numerous positions in the academy, including chairman of the Illinois Conference of Family Practice Residents, member of the Family Practice Teaching Committee, and member of the Commission on Education. He is affiliated with Condell Memorial Hospital in Libertyville, Illinois.

Gary M. Deutsch is in private practice

as a general internist in Ventura, California. He has a teaching position through UCLA at Ventura County Medical Center and is also affiliated with Santa Paula Hospital. Gary and his wife, Debra, have three sons, "who are learning the California lifestyle." His own free time allows tennis, soccer, surfing and skiing.

David Stair has been practicing primary care medicine in Southington, Connecticut, since his certification by the American Board of Internal Medicine. He is completing a master's degree in philosophy and is a Ph.D. candidate at Yale University. He and his wife, Ginger, have two daughters, Sara and Erica.

1979

Timothy Burke was awarded the National Foundation for Infectious Disease-Upjohn Fellowship for 1985-86 and is studying at the University of Iowa in Iowa City. He had served with the National Health Service Corps for three years and completed his internal medicine residency at Southern Illinois University.

John Dongas recently returned to the Section of Cardiology at Loyola University Medical Center.

Mary Ellen Gruszka is practicing pediatrics and pediatric rheumatology in Berwyn and Countryside, Illinois.

Michael Kolinsky is practicing internal medicine in New Orleans, Louisiana, and lives around the corner from **Robert Balkan.** Michael has two children, Nicole, nearly 3, and one-year-old Danny.

1980

The following notes are condensed from information submitted for the Class of '80 Memory Book, compiled in the spring for the 5-year reunion.

Jose F. Allongo, Jr., worked at a migrant health center/clinic in southeast Florida to fulfill his obligation to the National Health Service Corps. He completed an internal medicine residency and then started an epidemiology/public health residency, with plans to join a large multi-specialty group in West Palm Beach this summer. He and his wife have two children.

David M. Appleby and **Grace T. Chu** married in 1980 and then entered internships in general surgery and internal medicine, respectively, at the University of Pittsburgh. Grace won the Humanitarian Award in her final year as a resident. She completed her commitment to the National Health Service Corps by starting private practices in two physician-depleted communities near Pittsburgh. David completed two years of general surgery training and a year of orthopedics study and published two papers. The couple enjoys traveling and hopes to move West next year. "We don't have any kids yet," they add, "but lots of plans."

Thomas F. Baier planned to join a three-man orthopedic group in Gurnee, Illinois, this summer. He completed an orthopedic residency in Springfield and served as chief resident his final year. He and his wife, Nancy, have two children.

Mary C. Barton was planning to begin a cardiology fellowship at the University of Minnesota this summer. After her residency in internal medicine, she worked as an emergency room physician in Easter, Pennsylvania, and remained active in the American Medical Association, serving on the Council on Medical Education. Mary swims competitively and enjoys skiing, bicycling and scuba diving. She's also traveled extensively through Europe and Africa.

Frank L. Bearden interned at the Cleveland Clinic, completed an internal medicine residency at Allegany General Hospital in Pittsburgh, Pennsylvania, and followed it with a fellowship (clinical research) in endocrinology at the University Hospital, Case Western Reserve University, Cleveland, Ohio.

Michael G. Blackburn completed a residency in internal medicine at the University of Washington, Spokane, in 1983, became board certified and opened a private practice in Puyallup, Washington, that same year. He and his wife have two children.

Stephen Borowitz just finished the second year of a fellowship in pediatric gastroenterology and nutrition, sponsored by the Cystic Fibrosis Foundation at Vanderbilt University. He and his wife live in Nashville, Tennessee. "No children yet," he writes, "but I still have my two golden retrievers."

Bruce H. Campbell began a two-year fellowship in head and neck surgery at M.D. Anderson Hospital in Houston, Texas, this summer. He enjoyed his residency and research work in otolaryngology at the Medical College of Wisconsin, Milwaukee, and plans to continue in academics. He and his wife, Kathi, have two children, Daniel, 2, and Sarah, 3 months.

Robert A. Chase completed an internship, residency and research fellowship in molecular biology at the University of Iowa. He is now a clinical fellow in infectious disease at Rush-Presbyterian-St. Luke's and lives in Winfield, Illinois, with his wife and daughter, Kari, 2.

Mary T. Cunnane completed an internship and residency in obstetrics/gynecology at the University of Rochester, New York. She then spent two years in outpatient and emergency room medicine as a general medical officer for the Indian Health Service in the Navajo area of Kayenta, Arizona, where she enjoyed white water river rafting, hiking and skiing. She married **Martin E. Hickey, Class of '77,** in 1984. She resumed her obstetrics/gynecology residency at the University of New Mexico, Albuquerque, in 1983 and, in April, and was looking forward to her "chief year."

Ilham Deloomy finished his internship in internal medicine at Tulane, then spent three years in a federally funded clinic in a Mexican neighborhood in Dallas, Texas, to fulfill his obligation to the National Health Service Corps. He was planning to resume residency training in internal

Class Notes

medicine this summer at Rutger's Medical Center, New Brunswick, New Jersey.

Frances Deppe has a full-time physical medicine practice at the Rehabilitation Institute of Chicago, working with both in-and-outpatients, EMGs, consultants, resident teaching and research. Frances has plans to go into private practice and "budget my time better" but now her two-year-old daughter "manages to keep the entire household busy."

William Donaldson and **Valerie Perks-Donaldson** married in 1982 and have a daughter, Emily, born in June, 1984. Valerie did a residency in internal medicine at Rush-Presbyterian-St. Luke's and at Cornell-New York Hospital, and became board certified in 1983. She now works full time in the emergency room at White Plains Hospital and also works part time for the Peer Review Organization in Westchester County. William did a surgery internship at Rush-Presbyterian-St. Luke's and an orthopedic residency at the Hospital for Special Surgery in New York City, where he was planning to start a fellowship in scoliosis this summer.

Randy J. Epstein completed his internship and a residency in ophthalmology at Rush-Presbyterian-St. Luke's, then accepted a two-year NIH-sponsored fellowship in corneal transplantation and research at Emory University in Atlanta, Georgia. He recently returned from Colombia, South America, where he lectured on corneal immunology, and continues his research on the use of extended wear contact lenses in children and the pathogenesis of corneal neovascularization. Randy plans to join the ophthalmology department at Rush in 1986 and open an office in Highland Park. He and his wife, Kayla, have a two-year-old daughter, Rachel.

David T. Fletcher completed a residency in preventive medicine/public health in 1983, which included a master of public health degree from the University of California-Berkeley. He was active in the Berkeley and Haight-Asbury Free Clinics, did his thesis on the free clinic movement, and was published in *The Lancet* and *American Medical News*. He was appointed training director for a preventive medicine residency at Madigan Army Medical Center in Tacoma, Washington, and was involved with the U.S. invasion of Grenada. As a result, he became a conscientious objector and is seeking discharge from the Army and subsequent transfer to the U.S. Public Health Service. David is active in the peace movement and continues to do a lot of medical writing. He and his wife, Wanda, have a daughter, Janine, 2.

Julie Freischlag is "still a resident" in general surgery at the University of California-Los Angeles; she spent two years in the middle of her residency doing research in neutrophil function. She plans to remain at UCLA for a fellowship in vascular surgery, starting next year. In 1983 she married John Oval, M.D., who is interested in aerospace medicine research. "Work keeps us busy," she writes, "but we find time to travel and, hopefully, see each other."

Robert Glinert interned at Evanston Hospital, then joined **Mary Rascia-Forman** and **Neal Epstein** at the University of Rochester's Associated Hospitals Program in internal medicine. He then practiced for a year before entering fellowship training in allergy and clinical immunology at the University of Michigan. He and his wife, Judith (an ophthalmology resident), have a daughter, Emily, 2.

Paul Gorman did his internal medicine residency at Rush-Presbyterian-St. Luke's, serving as chief resident during his final year. He now has a private practice in Astoria, Oregon. In his spare time, he enjoys steelhead fishing.

Catherine (Kit) Grotelueschen finished her internal medicine residency at Rush-Presbyterian-St. Luke's and, in 1983, began teaching in the Department of Medicine at Grant Hospital of Chicago, first as a teaching attending, and then as assistant program director in charge of resident selection. She was planing to open a private practice in the western suburbs this summer. "And to make things even more exciting," she writes, "Jim and I had a baby boy last August!"

Richard Hayes passed the diagnostic radiology boards in 1984, did a six-month fellowship in ultrasound/CT, then joined the staff at William Beaumont Hospital in Royal Oak, Michigan, in January. He and his wife, Kathy, live in Troy, Michigan. "My biggest problem," he jokes, "is trying to cheer for both the Tigers and the White Sox."

Donald Heiman did a three-year internal medicine residency at the University of Cincinnati Medical Center before beginning a fellowship in infectious diseases at Yale University. He's currently investigating receptors on neutrophils. he and his wife, Helen, have a daughter, Jessica, 2.

Edward A. Hirsch is a partner in Kishwaukee Medical Associates, Ltd., a seven-physician group in Sycamore/DeKalb, Illinois. He is also an assistant professor of family medicine at the Chicago Medical School. Last year, Ed was elected into fellowship in the AAFP. He and his wife, Beth, have two sons, Daniel, born in May, 1984, and Patrick, born July 9.

Jean Holley is completing a fellowship in nephrology at The University of Chicago, where she'll be a nephrology instructor next year.

Carol Krohm is a clinical instructor at the Rockford Community Health Center-University of Illinois College of Medicine. She is board certified in family practice and had a solo private practice in Harvard, Illinois, for 1½ years. Her son, Benjamin Summers, was born in June, 1983.

Andrea Lang started a private practice in internal medicine at Glen Ellyn Clinic after completing her residency. She is now the director of the Urgent Care Department in the suburban Chicago clinic.

Scott Lederhaus did a one-year surgical internship at the University of California-Davis, then transferred to

Class Notes

the University of California-Irvine for neurosurgical training. He and his wife, Janet, had quadruplets in November, 1983—the three boys and one girl were born prematurely at 29 weeks, but all are doing well. They were expecting a "singleton" in August and, Scott says, "Please keep us in mind if you have any extra diaper coupons." They plan to return to the Chicago area next year.

Jay L. Levin began a fellowship in adult and pediatric spinal surgery at Rush-Presbyterian-St. Luke's this summer. He and his wife have a son, Daniel, "a constant source of enjoyment and excitement in our lives." Jay has recently agreed to serve as co-agent for the Class of 1980 with **Herman Sloane**, replacing **John Buckley.**

Barbara Loeb writes that "practice, charity and children keep me hopping." She completed an internal medicine residency at Loyola University, then started a private practice in Downers Grove, Illinois, with staff privileges at Good Samaritan and Elmhurst Memorial hospitals. She and her husband, Dr. Koteawara Batchu, opened a charity hospital in a rural town in southern India in 1984, to provide free care to women and children. Dr. Batchu traveled to Bhopal after the gas leak to take supplies to the victims, and the couple plan more projects in India. They also have two daughters, Rachael and Amy.

Steven A. Maier did his internship and residency in family practice at the University of California-Los Angeles, and is now a full partner in a group practice at Redondo Beach Medical Center. He is also a clinical instructor at UCLA and volunteers at the Venice Family Clinic, which serves the indigent Hispanic population of West Los Angeles. "For fun I live in the water at Hermosa Beach, where the average age is 30, and 'dabble' in windsurfing, catamaraning, surfing, skiing and scuba diving."

Philip J. Maple completed his internship and residency in internal medicine at the University of Texas Affiliated Hospitals. In 1983 he became one of four chief residents for Hermann Hospital, M.D. Anderson Hospital and St. Joseph's Hospital. He's had a private practice with Houston Medical Associates since 1984 and remains a voluntary faculty member for Hermann Hospital. Philip is board certified and a member of the Professional Advisory Committee for Home Care Temporaries, a home care nursing organization.

Wayne Margolis met his wife, Lisa, during his internal medicine residency at Parkland Hospital in Dallas. He was expecting to complete a cardiology fellowship at the University of Texas at Houston in June and then planned to open a private practice in non-invasive, invasive and interventional cardiology.

Marilyn Marx is completing a residency in general surgery at the University of Texas Medical Branch in Galveston. After two years of residency, she spent two years in laboratory research on gastrointestinal physiology and hormones, and carcinoma of the gastrointestinal tract. When she completes her residency, she plans a career in academic surgery.

Carolyn Mies spent two years as a resident at Tufts-New England Medical Center and an additional year at the New England Deaconess Hospital, where she was chief resident. She is now chief fellow in surgical pathology at Memorial Sloan-Kettering Cancer Center in New York.

Marjorie Mintz-Rosenbaum completed her dermatology residency at Northwestern University and now has a private practice in Chicago. She is also studying cutaneous lymphomas and related clinical problems at Northwestern. She and her husband, Bob, now have two children, Michael and Sara. "I am told that I am (in)famous for having been pregnant twice during an internship and never missing a day," she says. "Now. . .the kids have learned to recognize me in a crowd."

Marilyn Mitchell completed her residency in obstetrics/gynecology at The University of Chicago, then joined the faculty and staff of Northwestern University/Prentice Women's Hospital. She is also director of the ob/gyne section of the Near North Health Service, a large clinic near Cabrini/Old Town, which provides care on a sliding scale basis.

Sara Monroe was chief resident in internal medicine at the Medical College of Virginia. She then joined a large multi-specialty practice that has a contract with a major HMO. She and her husband, Paul, "have two(!) children, Rachel, 3, and Nicholas, 1½, and are contemplating a third." They live in Richmond.

Edson B. Moody, Jr., is in graduate school, studying biomedical engineering. His wife, **Virginia J. Welch-Moody** interned at the West Virginia University Medical Center in Morgantown, then served two years as general medical officer in the U.S. Army, stationed at Fort Monmouth, New Jersey. She's now a psychiatry resident at the University of Pennsylvania Hospital in Philadelphia. The couple lives in Allentown, New Jersey.

Richard S. Murray completed an internal medicine residency at the University of Minnesota Hospitals; **Neal Epstein** was there the first year, and **John McClean** was an oncology fellow. Richard stayed an extra year as chief resident and, in July, 1984, entered private practice as part of a large group practice, the St. Charles Clinic near St. Louis, Missouri (his hometown). He and his wife, Leslie, have a daughter, Clare, born in May, 1984. "Fatherhood suits me very well, so far," he writes.

Madeleine Neems has a private practice in internal medicine in Lake Forest, Illinois.

Russell M. Petrak finished a fellowship in infectious diseases at Rush-Presbyterian-St. Luke's and is now director of infectious diseases and infection control officer at MacNeal Hospital in Berwyn, Illinois. He and his wife, Sue Schreder (former head nurse of 3 Pavilion at the Medical Center) have a two-year-old daughter, Allison, and live in Westchester, Ill.

Class Notes

Mary Rascia-Forman is an internist at an ambulatory care center for the Jefferson County Department of Public Health in Birmingham, Alabama. Her husband, John, is finishing his cardiothoracic surgery training at the University of Alabama, "where slavery has been perfected," she writes. They have a one-year-old son, Wally.

William Ross writes that his "search for happiness continues: I survived my family practice residency; I married a beautiful nurse, who I hope will support me as I grow more and more decrepit; I opened a private practice in Long Beach, California, in partnership with my best friend; my cat does not respect me; and I bought a house I cannot afford." A postscript — son, Ian, was born in June.

Aimee St. Pierre has finished her psychiatry residency and is now in private practice in Chicago. She joined the faculty of Rush-Presbyterian-St. Luke's Department of Psychiatry in July, 1984.

Gail Schewitz was an intern and resident in pediatrics at Mount Sinai Hospital, Manhattan, and just completed the second year of a fellowship in pediatric hematology/oncology there. After the third year of her fellowship, she plans to join the staff as an attending in pediatric hematology/oncology. She and her husband, Bruce Doctor, a musician, have a daughter, Lynne, who is almost 2.

John T. Schousboe completed his residency in internal medicine in Portland, Oregon, then became a registrar in medicine in Christchurch, New Zealand. He was planning to return to Chicago this summer for a fellowship in rheumatology at Northwestern University. He and his wife have two children.

Gregory W. Schroff interned in surgery at Michael Reese Hospital and Medical Center, then worked for the Chicago Department of Public Health in a west side clinic for 2½ years to satisfy his Public Health Service obligation. After completing residency in anesthesia at Loma Linda Medical Center in California, he plans to practice on the west coast. Gregory and Becky have a "terrific (sailor) son," Stuart, 3.

John Segreti completed his internal medicine residency at Rush-Presbyterian-St. Luke's, served as chief resident from 1983 to 1984 and is now a fellow in infectious diseases at the Medical Center. He and his wife, Jeanne, announced the birth of their first child, Dania, in May.

Glen D. Solomon became actively involved in research on migraine headaches while completing his internal medicine residency, and has had numerous papers published on the subject. Now in the final year of his Air Force commitment, he is practicing both general internal medicine and headache medicine at the U.S. Air Force Medical Center at Scott Air Force Base in Illinois. He also teaches in a family practice training program and conducts research in migraine prophylaxis. He and his wife hope to return to Chicago next year.

Demetra Soter completed a residency in pediatrics at Cook County Hospital, then created a pediatric fellowship in pediatric critical care (i.e. trauma, burns, drowning, poisoning, and accidents). She now works in County's pediatric emergency room, intensive care unit, burn unit and trauma unit. Her "baby," the MGB, is now 19 years old. After "massive body work — some by me, some by professionals," she writes, "and a paint job, it looks better than ever (much). It's *even* running, for now."

Angela G. Stewart has completed her residency in pediatrics at East Carolina University School of Medicine in Greenville, North Carolina. She's currently fulfilling her National Health Service Corps obligation and teaches at the ECU School of Medicine Department of Pediatrics. Angela spends her free time camping, water skiing, and fishing.

Daniel J. Sullivan began his internship in internal medicine, but decided to switch to emergency medicine. He's worked as an attending in the emergency room at Cook County Hospital since January, 1982. (Three years fulfills his commitment to the National Health Service Corps.) In 1983, he began law school at the IIT Kent College of Law and, in 1984, became assistant director of the emergency room and director of ambulatory emergency service at Cook County. His wife, Andria, is an artist and owns a grocery store called the Carnival. Their daughter was born in December.

Ricky A. Thomas has entered private practice full time and is affiliated with the Illinois HMO Prepaid Program in Chicago. He has two sons and a daughter, and has purchased his first home in Homewood, Illinois. He's also teaching part time at Jackson Park Hospital and Medical Center in Chicago. His wife, Sharon, is completing her residency at St. Joseph Hospital in Chicago.

Robert W. Trauscht completed a family practice residency at Lutheran General Hospital in Park Ridge, Illinois and, until recently, served as medical director of the Health Management Services division of Parkside Medical Services. He is now medical director of Parkside Lodge of Mundelein, a free-standing 80-bed substance dependency treatment center. He is also in practice with **John Kolb, Class of '81,** in Lake Zurich, Illinois. Robert and his wife, Ann (who is completing a family practice residency at Lutheran General), have two children, Robby, 5, and Elise, 2.

Elizabeth Waldron was a resident in internal medicine at Loyola University Medical Center, Maywood, and is now in private practice in Chicago. She has three children, Shaun, 18; Jamie, 6; and Erin, 2.

Karen V. Warner started a solo family practice in Durham, Connecticut, after her residency there. She's the only doctor within a 10-minute drive, "so it's busy, but a lot of fun," she writes. "I recently fulfilled a 15-year-old dream and bought a house, built in 1830, which I am renovating. I am still single, and happy that way."

Martha Weidman completed a three-year residency in otolaryngology at

Class Notes

Rush-Presbyterian-St. Luke's, then switched to diagnostic radiology. She is finishing her training in radiology at Mount Sinai Hospital Medical Center, Chicago, and plans to apply for a one-year fellowship in CT/ultrasound. Downhill skiing is a current passion and free time is spent on "glorious vacations": Greece, Cancun, Germany, Austria and Amsterdam.

Peter C. Witt completed an internal medicine residency in 1983, and is board certified. After a G.I. fellowship (at V.A. Medical Center and Johnson City Medical Center, Quillen-Dishner School of Medicine, Tennessee State University), he plans to combine private practice with teaching. He and his wife, Cynthia, were married in 1982.

Michael R. Wolfson did a one-year residency in pathology and then switched to internal medicine, completing his residency in the spring. He then went to Paris for three months to study French ("so where should I study it — in Omaha?" he quips). Recently, he joined Share Health Care Associates, an *HMO* in St. Paul, Minnesota.

Leslie T. Yamamoto had plans to join West Suburban Hospital Medical Center in Oak Park, Illinois, after completing a second residency in emergency medicine.

Craig D. Zippe completed three years of surgical training at Duke Medical Center, then moved to Providence, Rhode Island, for a two-year research fellowship (focusing on adrenal and renal physiology) at Brown University/Rhode Island Hospital. He was planning to begin a residency in urology at Presbyterian Hospital in New York this summer. "Socially, nothing permanent has happened," he writes. "I am till sending flowers to **M. Marx.**"

1981

William C. Carron started an infectious disease fellowship at Cedars-Sinai Hospital in Los Angeles this summer after completing an internal medicine residency at Los Angeles County Hospital.

Van Johnson called the alumni office to announce his wedding. On May 18, he married Diane Preacely, publicist, columnist, and writer for media such as the *Chicago Defender, DC Weekly* and WLS-TV. Van is a resident at the Illinois State Psychiatric Institute.

1982

Keith Berndtson has received a $30,000 postgraduate fellowship from the National Fund for Medical Education, which established the program to encourage careers in academic medicine. Keith plans to earn a master's degree in general studies in the humanities from The University of Chicago. His particular interests include medical ethics, cost containment and quality assurance. Keith finished his family practice residency at Lutheran General Hospital this summer.

Leslie Zun is a faculty member at Northwestern Memorial Hospital/ Northwestern University Department of Emergency Medicine. Leslie also served as president of the Emergency Medicine Residents' Association.

1983

Catherine R. Remus is working part time at Cardinal Glennon Children's Hospital in St. Louis. She and her husband, Jeff, a carpenter, are remodeling their home and raising two daughters, Elizabeth, 3½, and Virginia, 2.

John Schaffner, M.D. '74 (right), and his wife, Susan, at the Commencement Banquet with Lawrence J. Goodman, M.D. (far left), assistant dean, and John Pottage, M.D., a student advisor for the Class of '85.

Medical Center Alumni

Farid Haddad, a resident at Presbyterian Hospital in 1951, wrote to say he was glad to get the spring issue of the *Record* and find out what happened to people like Drs. **Samuel G. Taylor III, R. Gordon Brown, James W. Merricks, Stanley E. Monroe, Frederic dePeyster,** and **R. Kennedy Gilchrist.** He recently met **John Olwin, Class of '35,** and his wife during their winter vacation in Scottsdale, Arizona.

Richard A. Carleton, cardiologist and a professor in Rush's Department of Medicine from 1962-72, has been appointed to the National Heart, Lung, and Blood Advisory Council of the U.S. Department of Health and Human Services, National Heart, Lung and Blood Institute. Dr. Carleton is now chief of the cardiology division and director of the division of health education at Memorial Hospital, Pawtucket, Rhode Island. He is also a professor of medical sciences at Brown University.

In Memoriam

Since the last issue of the *Record*, the Alumni Office has been informed of the deaths of the following Rush graduates. We extend sympathy to their surviving families and friends.

Cyril J. Glaspel, M.D. '15, of Newport Beach, California, on April 22, 1985.

Those who knew Dr. Glaspel describe him as the personification of the "country doctor—a revered member of the medical profession who went to great lengths to save lives with little thought of remuneration." Together with his father, who was also a physician, he co-authored a treatise on botulism, considered one of the most authoritative on the subject. He spent most of his life in Grafton, North Dakota, and upon his retirement in 1973 was presented the city's Outstanding Citizen Award for his medical and civic contributions, which included service as city councilman, county health officer and coroner. That same year he moved to Newport Beach, California, where he and his wife, Vi, became especially involved in promoting the performing arts. A retired United States Army colonel, Dr. Glaspel was past president of the North Dakota AMA and of the Federation of State Medical Boards. He also was a member of the American College of Surgeons and served as a class agent for the Alumni Association.

David J. Margolis, M.D. '17, of Chicago, Illinois, on April 7, 1985.

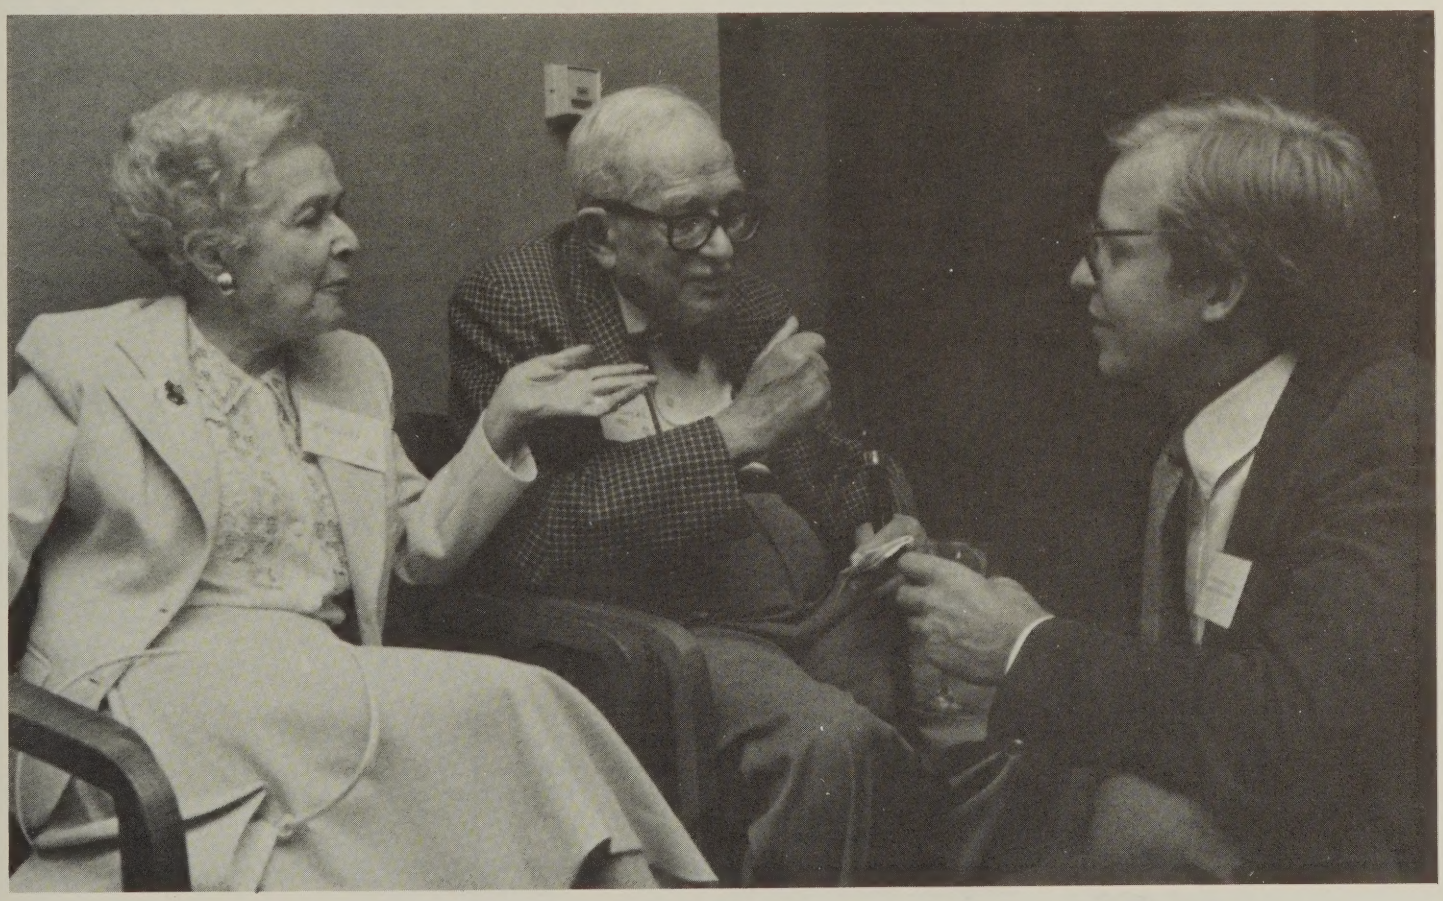
Joseph K. Calvin, M.D. '19, of Chicago, Illinois, on July 11, 1985.

Dr. Calvin, author of *Our Baby's First Seven Years*, was affectionately known as "Uncle Joe" to three generations from Hyde Park and the South Shore communities, where he practiced as a pediatrician for 60 years and made house calls until his retirement in 1979. He had served as president of the Chicago Pediatric Society, chaired the pediatric section of the Illinois Medical Society, and, for 59 years, was a member of the staff at Michael Reese Hospital. After graduating from Rush, he became the first resident in pediatrics at Cook County Hospital and, from 1921-1938, was an assistant professor of pediatrics at the University of Illinois Medical School. He is survived by his wife, Pauline; daughter, Caryl Magnus; son, Robert; and five grandchildren.

John M. Hooval, M.D. '22, of Ontario, California.

Warner S. Bump, M.D. '24, of Green Valley, Arizona, on April 20, 1984.

William E. Jahsman, M.D. '24, of Ogden, Utah, on January 5, 1985.



Julius Levy, M.D. '22, and his wife, Ethel, with Steven Maier, M.D. '80, at the Commencement Banquet. Dr. Levy, a charter member of the Benjamin Rush Society, passed away on October 10, as this issue of the Record was in final stages of production.

In Memoriam

Howard Wakefield, M.D. '25, of Camarillo, California, on March 20, 1985.

Marque L. Jackson, M.D. '29, of Atlanta, Georgia, on December 13, 1984.

Dr. Jackson was known for his ability "to reach out and put people at ease." After interning in obstetrics and surgery, he practiced in Valdosta, Georgia, for five years and then moved to Atlanta. During the next 48 years he held positions at Harris Memorial Hospital, Dwelle's Infirmary, McLendon Hospital, Hughes Spalding Southwest Community Hospital and McVicar's Infirmary at Spelman College. He had also served as medical director at Morehouse College and at the Gate City Day Nursery Association, and was one of the first Black physicians at Grady Memorial Hospital. A resolution passed by the Georgia House of Representatives commended him for his years of dedicated service as a physician. Dr. Jackson was also active in church, civic and professional organizations, including the Atlanta Medical Association, which he had served as president. He is survived by his wife, Ruth; daughters, Yvonne Wiltz and Marquelyn Smith; brother and sister-in-law, Mr. and Mrs. Roy D. Jackson; brother-in-law, Attorney and Mrs. R. E. Thomas; four grandchildren; and five nieces and nephews.

Roy M. Langdon, M.D. '29, of Chicago, Illinois, on March 18, 1985.

Franklin J. Nelson, M.D. '30, of Tulsa, Oklahoma, on June 13, 1985.

John A. Fisher, M.D. '31, of Mission, Texas, on October 30, 1984.

Arthur Rappeport, M.D. '31, of Quincy, Massachusetts, on May 7, 1985.

P. Lemon Clark II, M.D. '34, of Fayetteville, Arkansas, on January 21, 1985.

Dr. Clark practiced medicine in Oklahoma City until 1952 and then in Fayetteville until his retirement nine years ago at the age of 79. Before entering Rush Medical College, he taught sociology at Cornell University from 1923 - 1929. The author of eight books on sex, sex education and marriage, Dr. Clark served as medical editor for the Question and Answer Department of *Sexology Magazine*. He is survived by his wife, Esther; children, Joyce Haden, Ruth Moody, Anson and Dr. P. Lemon Clark III; nine grandchildren; and three great grandchildren.

Donald R. Laird, M.D. '34, of Portland, Oregon, on September 22, 1984.

Matthew McKirdie, M.D. '34, of Portland, Oregon, on December 23, 1984.

Kenneth D. Kohlstedt, M.D. '35, of Springfield, Illinois, on February 3, 1985.

M. William Rubenstein, M.D. '35, of Evanston, Illinois, on April 28, 1984.

Fred M. Sandifer, M.D. '35, of Greenwood, Mississippi, on May 8, 1985.

Bernard R. Levine, M.D. '36, of San Antonio, Texas.

Robert C. Ranquist, M.D. '36, of Frankfort, Illinois, on February 7, 1985.

Henry L. Kaplan, M.D. '37, of Livingston, New Jersey, on November 8, 1984.

James M. Marshall, M.D. '37, of Conway, South Carolina, on December 30, 1984.

Bernard A. Halperin, M.D. '38, of Newberg, Oregon, on May 13, 1985.

Dr. Halperin interned at the University of Oregon Hospitals; was a fellow and resident in pathology and internal medicine, respectively, at Cook County Hospital; and then completed a fellowship in radiology at Stanford Hospitals. During World War II he served in the United States Navy, attaining the rank of commander. Dr. Halperin was a member of numerous professional organizations including the American College of Radiology, American Thoracic Society and the American College of Nuclear Physicians. He is survived by his wife, Maurine; daughter, Julie Mills; three sisters, Lucille Allendorff, Ruth Melamed, Mrs. Paul Selinsky; and one grandson.

Leo R. Hawkes, M.D. '39, of Preston, Idaho, on January 14, 1985.

Class Agents

A special note of thanks—and welcome— to new members of the Class Agent Network:

Abraham Schultz, M.D. '30

Alumni Calendar

November 20
The Brain and the Heart: Interrelationships in Cardiac and Psychiatric Patient Management
Sponsored by the Department of Family Practice
Claude H. Searle, M.D., Conference Center
Rush-Presbyterian-St. Luke's Medical Center

Update on Gastroenterology for the Practitioner:
Focus on Upper Gastrointestinal Disease
Focus on Liver Transplantation
Sponsored by the Section of Digestive Diseases
Searle Conference Center

December 4-6
Neurology for the Non-Neurologist
Sponsored by the Department of Neurological Sciences
Westin Hotel, Chicago

December 7
Heart Management
Sponsored by the Section of Cardiology
Westin Hotel, Chicago

December 12-14
Lower Back Pain
Sponsored by the Department of Orthopedic Surgery
Searle Conference Center

February 17-21, 1986
